APPENDIX

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

There being no fixed political divisions in Manitoba, Saskatchewan and Alberta corresponding to counties in Eastern Canada, it was deemed advisable, in compiling and publishing the results of the Census of 1921, to divide these provinces for statistical purposes into "Census Divisions", each containing a certain number of rural municipalities, "local improvement districts", cities, towns and incorporated villages. The object of this demarcation was to obtain permanent units smaller than the provinces for comparisons extending over a number of years. The same "Divisions" have been adopted in the present Report.

Maps are inserted, showing the boundaries of the "Divisions" by red lines, the municipalities contained within "Divisions" by heavy black lines and the townships within municipalities by faint black lines. The numbers enclosed in red circles on the maps refer to the numbers assigned to the "Divisions"; the black figures refer to municipalities or local improvement districts (L.I.D.)

The following schedule gives the rural municipalities by name and number (the latter in parenthesis), together with the cities, towns and villages (as at Census of 1921) comprised within each "Census Division." Local Improvement Districts and Unorganized Territorial Units in Saskatchewan and Alberta are given by number only.

MANITOBA

Division No. 1 comprises the municipalities of Birch River (1), Hanover (2), La Broquerie (3), Piney (4), Ste. Anne (5), Sprague (6), Stuartburn (7), Taché (8); Unorganized parts East of the Principal Meridian between townships 3 and 10 (9).

Division No. 2 comprises the municipalities of De Salaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Indian Reserves—Roseau Band; Towns—Emerson, Morden, Morris; Villages—Gretna, Plum Coulee, Winkler.

Division No. 3 comprises the municipalities of Argyle (1), Lorne (2), Louise (3), Pembina (4), Riverside (5), Roblin (6), Strathcona (7), Turtle Mountain (8); Indian Reserves—Swan Lake; Towns—Killarney; Villages—Manitou, Pilot Mound.

Division No. 4 comprises the municipalities of Albert (1), Arthur (2), Brenda (3), Cameron (4), Edward (5), Morton (6), Whitewater (7), Winchester (8); Towns—Boissevain, Deloraine, Hartney, Melita; Villages—Napinka.

Division No. 5 comprises the municipalities of Brokenhead (1), Fort Alexander (2), Kildonan East (3), Lac du Bonnet (4), St. Clements (5), St. Paul East (6), Springfield (7), Victoria Beach (8), Whitemouth (9); Unorganized parts East of the Principal Meridian between townships 9 and 21 (10); Indian Reserves—Fort Alexander, Brokenhead; Towns—Beauséjour, Transcona; Villages—Lyall.

Division No. 6 comprises the municipalities of Cartier (1), Charleswood (2), Dufferin (3), Fort Garry (4), Grey (5), Macdonald (6), Portage la Prairie (7), Ritchot (8), St. Vital (9); Indian Reserves—Long Plain, Sioux Village; Cities—Portage la Prairie, St. Boniface, Winnipeg; Towns—Carman, Tuxedo.

Division No. 7 comprises the municipalities of Cornwallis (1), Cypress North (2), Cypress South (3), Elton (4), Norfolk North (5), Norfolk South (6), Oakland (7), Victoria (8); Indian Reserves—Indian Gardens; Cities—Brandon; Towns—Carberry; Villages—Wawanesa.

Division No. 8 comprises the municipalities of Daly (1), Glenwood (2), Pipestone (3), Sifton (4), Wallace (5), Whitehead (6), Woodworth (7); Indian Reserves—Oak Lake, Oak River; Towns—Oak Lake, Rivers, Souris, Virden; Villages—Elkhorn.

Division No. 9 comprises the municipalities of Assiniboia (1), Kildonan West (2), Rockwood (3), Rosser (4), St. Andrews (5), St. François Xavier (6), St. James (7), St. Paul West (8), Woodlands (9); Towns—Selkirk, Stonewall, Winnipeg Beach.

Division No. 10 comprises the municipalities of Glenella (1), Lakeview (2), Langford (3), Lansdowne (4), McCreary (5), Rosedale (6), Westbourne (7); Indian Reserves—Lake View; Towns—Gladstone, Neepawa.

APPENDICE

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

Le Manitoba, la Saskatchewan et l'Alberta ne possédant pas de divisions politiques correspondant aux comtés de l'est du Canada, on a cru devoir, aux fins de la compilation et de la publication des résultats du recensement de 1921, diviser ces provinces, pour les besoins de la statistique, en "divisions de recensement", chacune de celles-ci contenant un certain nombre de municipalités rurales, de "districts d'améliorations locales", de cités, de villes et de villages incorporés. En établissant ces lignes de démarcation on a créé des unités territoriales permanentes, plus petites que les provinces et facilitant les comparaisons, pendant un certain nombre d'années. Ce sont ces unités territoriales que l'on trouvera dans le présent rapport.

Sur les cartes ci-jointes, les limites des divisions sont figurées par des lignes rouges, celle des municipalités qui sont contenues dans les divisions par d'épaisses lignes noires et celles des cantons par de minces lignes noires.

Les nombres entourés d'un cercle rouge sont les numéros donnés aux divisions; les chiffres en noir sont les numéros des municipalités ou des districts d'améliorations locales (D.A.L.).

On trouvera dans la liste qui suit l'énumération des municipalités rurales, par nom et numéro (ce dernier entre parenthèses) ainsi que les cités, villes et villages (selon le recensement de 1921) composant chacune des "divisions de recensement". Les districts d'améliorations locales et les unités des territoires inorganisés de la Saskatchewan et de l'Alberta sont indiqués simplement par un numéro.

MANITOBA

Division N° 1.—Elle comprend les municipalités de: Birch-River (1), Hanover (2), La Broquerie (3), Piney (4), Ste-Anne (5), Sprague (6), Stuartburn (7), Taché (8); Parties inorganisées à l'est du méridien principal, entre les cantons 3 et 10 (9).

Division N° 2.—Elle comprend les municipalités de: DeSalaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Réserve indienne—Bande Roseau; Villes—Emerson, Morden, Morris; Villages—Gretna, Plum Coulée, Winkler.

Division N° 3.—Elle comprend les municipalités de: Argyle (1), Lorne (2), Louise (3), Pembina (4), Riverside (5), Roblin (6), Strathcona (7), Turtle Mountain (8); Réserve indienne—Swan Lake; Ville—Killarney; Villages—Manitou, Pilot Mound.

Division N° 4.—Elle comprend les municipalités de: Albert (1), Arthur (2), Brenda (3), Cameron (4), Edward (5), Morton (6), Whitewater (7), Winchester (8); Villes—Boissevain, Deloraine, Hartney, Melita; Village—Napinka.

Division N° 5.—Elle comprend les municipalités de: Brokenhead (1), Fort Alexander (2), Kildonan East (3), Lac du Bonnet (4), St-Clements (5), St-Paul East (6), Springfield (7), Victoria Beach (8), Whitemouth (9); Parties inorganisées à l'est du méridien principal, entre les cantons 9 et 21 (10); Réserves indiennes—Fort Alexander, Brokenhead; Villes—Beauséjour, Transcona; Village—Lyall.

Division N° 6.—Elle comprend les municiaplités de: Cartier (1), Charleswood (2), Dufferin (3), Fort Garry (4), Grey (5), Macdonald (6), Portage la prairie (7), Richot (8), St-Vital (9): Réserves indiennes—Long Plain, Sioux Village; Cités—Portage la Prairie, St-Boniface, Winnipeg; Villes—Carman, Tuxedo.

Division N° 7.—Elle comprend les municipalités de: Cornwallis (1), Cypress North (2), Cypress South (3), Elton (4), Norfolk North (5), Norfolk South (6), Oakland (7), Victoria (8); Réserve indienne—Indian Gardens; Cité—Brandon; Ville—Carberry; Village—Wawanesa.

Division N° 8.—Elle comprend les municipalités de: Daly (1), Glenwood (2), Pipestone (3), Sifton (4), Wallace (5), Whitehead (6), Woodworth (7); Réserves indiennes—Oak Lake, Oak River; Villes—Oak Lake, Rivers, Souris, Virden; Village—Elkhorn.

Division N° 9.—Elle comprend les municipalités de: Assiniboia (1), Kildonan West (2), Rockwood (3), Rosser (4), St-Andrews (5), St-François Xavier (6), St-James (7), St-Paul West (8), Woodlands (9); Villes—Selkirk, Stonewall, Winnipeg Beach.

Division N° 10.—Elle comprend les municipalités de: Glenella (1), Lakeview (2), Langford (3), Lansdowne (4), McCreary (5), Rosedale (6), Westbourne (7); Réserve indienne—Lake View; Villes—Gladstone, Neepawa.

Division N° 11.—Elle comprend les municiaplités de: Archie (1), Birtle (2), Blanshard (3), Clanwilliam (4), Ellice (5), Hamiota (6), Harrison (7), Miniota (8), Minto (9), Odanah (10), Saskatchewan (11), Shoal Lake (12), Strathclair (13); Réserves indiennes—Bird Tail, Rolling River, Keeseekoowenins; Villes—Birtle, Minnedosa, Rapid City; Villages—Foxwarren, Hamiota, Shoal Lake.

Division N° 12.—Elle comprend les municipalités de: Armstrong (1), Bifrost (2), Chatfield (3), Coldwell (4), Ericksdale (5), Fisher Branch (6), Gimli (7), Kreuzburg (8), St-Laurent (9), Siglunes (10), Woodlea (11); Réserve indienne—Dog Creek; Village—Gimli.

Division N° 13.—Elle comprend les municipalités de: Dauphin (1), Ethelbert (2), Lawrence (3), Mossy River (4), Ochre River (5), Ste-Rose (6); Parties inorganisées au nord du canton 20 entre les frontières orientales des municipalités de Ste-Rose et Lawrence et Lac Manitoba (7); Réserves indiennes—Ebb & Flow, Crane River; Ville—Dauphin; Village—Winnipegosis.

Division N° 14.—Elle comprend les municipalités de: Boulton (1), Gilbert Plains (2), Grandview (3), Hillsburg (4), Rossburn (5), Russell (6), Shellmouth (7), Shell River (8), Silver Creek (9); Territoire inorganisé entre les cantons 18 et 23 et entre les rangs 16 et 26 à l'ouest du méridien principal (10); Réserves indiennes—Valley River, Gamblers, Lizard Point; Villes—Grandview, Russell; Villages—Binscarth, Gilbert Plains, Roblin, Rossburn.

Division N° 15.—Elle comprend les municipalités de: Minitonas (1), Swan River (2); Parties inorganisées entre les cantons 27 et 35 et entre la frontière occidentale provinciale et le rang 23 à l'ouest du méridien principal (3); Ville—Swan River.

Division N° 16.—Elle comprend les parties inorganisées du nord; Réserves indiennes—Agence Norway House, Agence Fisher River, Agence Pas, Black River, Hollow Water, Fairford, Lake St-Martin, Little Saskatchewan, Pine Creek, Shoal River, Waterhen; Ville—The Pas.

SASKATCHEWAN

Division N° 1.—Elle com rend les municipalités de: Argyle (1), Mount Pleasant (2), Enniskillen (3), Coalfields (4), Estevan (5), Storthoaks (31), Reciprocity (32), Moose Creek (33), Browning (34), Benson (35), Antler (61), Moose Mountain (63), Brock (64), Tecumseh (65), Maryfield (91), Walpole (92), Wawken (93), Hazelwood (94), Golden West (95); Réserve indienne—Moose Mountain; Villes—Alameda Arcola, Carlyle, Carnduff, Estevan, Oxbow; Villages—Antler, Bienfait, Carievale, Fairlight, Forget, Frobisher, Gainsborough, Glen Ewen, Heward, Kennedy, Kisbey, Lampman, Manor, Maryfield, North Portal, Redvers, Roché Percée, Stoughton, Wauchope, Wawota.

Division N° 2.—Elle comprend les municipalités de: Cambria (6), Souris Valley (7), Lake Alma (8), Surprise Valley (9), Happy Valley (10), Cymri (36), Lomond (37), Laurier (38), The Gap (39), Bengough (40), Griffin (66), Weyburn (67), Brokenshell (68), Norton (69), Key West (70), Fillmore (96), Wellington (97), Scott (98), Caledonia (99), Elmsthorpe (100); Cité—Weyburn; Villes—Milestone, Ogema, Radville, Yellowgrass; Villages—Amulet, Avonlea, Bengough, Bromhead, Ceylon, Colgate, Creelman, Fillmore, Forward, Goodwater, Griffin, Halbrite, Horizon, Khedive, Lang, Macoun, McTaggart, Midale, Osage, Pangman, Tribune, Truax, Tyvan.

Division N° 3.—Elle comprend les municipalités de: Hart Butte (11), Poplar Valley (12), Willow Bunch (42), Waverley (44), Mankota (45), Glen McPherson (46), Excel (71), Lake of the Rivers (72) Stonehenge (73), Wood River (74), Pinto Creek (75), Auvergne (76), Terrell (101), Lake Johnston (102) Sutton (103), Gravelbourg (104), Glen Bain (105), Whiska Creek (106); Territoires inorganisés par unités 13, 14, 15, 16, 43; Réserve indienne—Wood Mountain; Villes—Assiniboia, Gravelbourg; Villages—Aneroid, Ardill, Congress, Ettington, Expanse, Hazenmore, Kincaid, Laflèche, Limerick, Mazenod, Meyronne, Mitchellton, Mossbank, Neville, Palmer, Ponteix, Readlyn, Spring Valley, Vanguard, Vantage, Verwood, Viceroy, Woodrow.

Division N° 4.—Elle comprend les municipalités de: Lone Tree (18), Frontier (19), White Valley (49), Reno (51), Wise Creek (77), Grassy Creek (78), Arlington (79), Lac Pelletier (107), Bone Creek (108), Carmichael (109), Piapot (110), Maple Creek (111); Territoires inorganisés par unités 17, 20,21, 22, 47, 48, 50, 52, 80, 81, 82, 112; Villes—Eastend, Maple Creek, Shaunavon; Villages—Admiral, Cadillac, Carmichael, Consul, Dollard, Hatton, Piapot, Robsart, Scotsguard, Vidora.

Division N° 5.—Elle comprend les municipalités de: Moosomin (121), Martin (122), Silverwood (123), Kingsley (124), Chester (125), Rocanville (151), Spy Hill (152), Willowdale (153), Elcapo (154), Wolseley (155), Langenburg (181), Fertile Belt (183), Grayson (184), McLeod (185), Churchbridge (211), Saltcoats (213), Cana (214), Stanley (215); Réserve indienne—Agence Crooked Lake; Villes—Bredenbury, Broadview, Fleming, Grenfell, Lemberg, Melville, Moosomin, Saltcoats, Wapella, Whitewood, Wolseley; Villages—Atwater, Bangor, Birmingham, Churchbridge, Dubuc, Duff, Esterhazy, Fenwood, Glenavon, Goodeve, Grayson, Killaly, Kipling, Langenburg, MacNutt, Neudorf, Otthon, Rocanville, Spy Hill, Stockholm, Summerberry, Tantallon, Waldron, Welwyn, Windthorst.

Division N° 6.—Elle comprend les municipalités de: Montmartre (126), Francis (127), Lajord (128), Bratt's Lake (129), Redburn (130), Indian Head (156), South Qu'Appelle (157), Edenwold (158), Sherwood (159), Pense (160), Abernethy (186), North Qu'Appelle (187), Lumsden (189), Dufferin (190), Tullymet (216), Lipton (217), Cupar (218), Longlaketon (219), McKillop (220), Sarnia (221); Réserves indiennes—Agence Qu'Appelle, Agence Assiniboine, Agence File Hill; Cité—Regina; Villes—Balgonie, Francis, Indian Head, Lumsden, Qu'Appelle, Rouleau, Sintaluta, Strasbourg; Villages—Abernethy, Balcarres, Belle Plaine, Bethune, Briercrest, B-Say-Tah, Bulyea, Chamberlain, Craven, Cupar, Dilke, Disley, Drinkwater, Dysart, Earl Grey, Edenwold, Findlater, Fort Qu'Appelle, Grand Coulée, Holdfast, Kendal, Kronau, Lebret, Lipton, Markinch, McLean, Montmartre, North Regina, Odessa, Pense, Penzance Pilot Butte, Regina Beach, Sedley, Silton, Southey, Vibank, Wilcox.

Division N° 7.—Elle comprend les municipalités de: Baildon (131), Hillsborough (132), Rodgers (133), Shamrock (134), Lawtonia (135), Coulee (136), Moose Jaw (161), Caron (162), Wheatlands (163), Chaplin (164), Morse (165), Excelsior (166), Marquis (191), Eyebrow (193), Enfield (194), Vermilion Hills (195), Craik (222), Huron (223), Maple Bush (224), Canaan (225), Victory (226), Coteau (255), King George (256); Cité—Moose Jaw; Villes—Caron, Craik, Herbert, Morse, Mortlach; Villages—Aylesbury, Birsay, Bridgeford, Brownlee, Central Butte, Chaplin, Dunblane, Ernfold, Eyebrow, Hodgeville, Keeler, Lawson, Lucky Lake, Marquis, Mawer, Parkbeg, Riverhurst, Rush Lake, Tugaske, Tuxford, Waldeck.

Division N° 8.—Elle comprend les municipalités de: Swift Current (137), Webb (138), Gull Lake (139), Big Stick (141), Bitter Lake (142), Saskatchewan Landing (167), Riverside (168), Pittville (169), Keebleville (171), Enterprise (172), Lacadena (228), Miry Creek (229), Clinworth (230), Happyland (231), Deer Forks (232), Monet (257), Fairview (258), Snipe Lake (259), Newcombe (260), Royal Canadian (261), Mantario (262); Territoires inorganisés par unités—140, 270, 227; Cité—Swift Current; Villes—Cabri, Gull Lake, Leader; Villages—Abbey, Burstall, Eatonia, Elrose, Eston, Estuary, Glidden, Hughton, Lancer, Lemsford, Pennant, Plato, Portreeve, Prelate, Richlea, Sceptre, Shackleton, Success, Tompkins, Webb.

Division N° 9.—Elle comprend les municipalités de: Calder (241), Wallace (243), Orkney (244), Garry (245), Coté (271), Sliding Hills (273), Good Lake (274), Insinger (275), St-Philips (301), Keys (303), Buchanan (304), Invermay (305), Livingston (331), Clayton (333), Preeceville (334), Hazel Dell (335); Réserve indienne—Agence Pelly; Villes—Canora, Kamsack, Yorkton; Villages—Arran, Buchanan, Calder, Hyas, Insinger, Invermay, Norquay, Pelley, Preeceville, Rama, Rhein, Sheho, Springside, Stenen, Stornoway, Sturgis, Theodore, Togo, Veregin, Willowbrook, Wroxton.

Division N° 10.—Elle comprend les municipalités de: Ituna Bon Accord (246), Kellross (247), Touchwood (248), Millington (249), Beaver (276), Emerald (277), Kutawa (278), Mount Hope (279), Foam Lake (306), Elfros (307), Big Quill (308), Prairie Rose (309), Sasman (336), Lakeview (337), Lakeside (338), Ayr (339),; Réserves indiennes—Muscowequans, Gordon, Day Star, Poorman, Fishing Lake; Villes—Wadena, Watson, Wynyard; Villages—Dafoe, Elfros, Foam Lake, Hubbard, Ituna, Jansen, Jasmin, Kandahar, Kelliher, Kuroki, Leross, Leslie, Lestock, Margo, Punnichy, Quill Lake, Quinton, Raymore, Semans, Tate.

Division N° 11.—Elle comprend les municipalités de: Last Mountain Valley (250), Big Arm (251), Arm River (252), Willner (253), Loreburn (254), Wreford (280), Wood Creek (281), McCraney (282), Rosedale (283), Rudy (284), Usborne (310), Morris (312), Lost River (313), Dundurn (314), Wolverine (340), Viscount (341), Colonsay (342), Blucher (343), Cory (344); Réserve indienne—Moose Woods; Cité—Saskatoon; Villes—Davidson, Govan, Hanley, Lanigan, Nokomis, Outlook, Sutherland, Watrous; Villages—Allan, Bladworth, Bradwell, Broderick, Clavet, Colonsay, Drake, Dundurn, Duval, Elbow Elstow, Girvin, Glenside, Guernsey, Hawarden, Imperial, Kenaston, Liberty, Lockwood, Loreburn, Meacham, Simpson, Strongfield, Venn, Viscount, Young, Zelma.

Division N° 12.—Elle comprend les municipalités de: Fertile Valley (285), Milden (286), St-Andrews (287), Pleasant Valley (288), Montrose (315), Harris (316), Marriott (317), Mountain View (318), Loganton (345), Perdue (346), Biggar (347), Bushville (348), Park (375), Eagle Creek (376), Glenside (377), Rosemount (378), Prairie (408), Battle River (438); Réserves indiennes—Mosquito, Sweet Grass, Red Pheasant; Villes—Asquith, Battleford, Biggar, Delisle, Langham, Rosetown, Zealandia; Villages—Ardath, Bounty, Conquest, Delmas, Dinsmore, Harris, Herschel, Kinley, Laura, Leney, Macrorie, McGee, Milden, Perdue, Sovereign, Spring Water, Stranraer, Swanson, Tessier, Vanscoy, Wiseton.

Division N° 13.—Elle comprend les municipalités de: Hillsburgh (289), Kindersley (290), Elma (291), Milton (292), Winslow (319), Oakdale (320), Prairiedale (321), Antelope Park (322), Grandview (349), Mariposa (350), Progress (351), Heart's Hill (352), Reford (379), Tramping Lake (380), Grass Lake (381), Eye Hill (382), Buffalo (409), Round Valley (410), Senlac (411), Cut Knife (439), Hillsdale (440), Manitou Lake (442); Réserves indiennes—Poundmaker, Little Pine, Lucky Man; Villes—Alsask, Kerrobert, Kindersley, Macklin, Scott, Unity, Wilkie; Villages—Adanac, Brock, Cavell, Cut Knife, Denzil, Dodsland, Druid, Evesham, Flaxcombe, Handel, Kelfield, Landis, Leipzig, Loverna, Luseland, Major, Marengo, Netherhill, Plenty, Rockhaven, Salvador, Senlac, Smiley, Tramping Lake.

Division N° 14.—Elle comprend les municipalités de: Kelvington (366), Ponass Lake (367), Spalding (368), Barrier Valley (397), Pleasantdale (398), Bjorkdale (426), Tisdale (427), Star City (428), Arborfield (456), Connaught (457), Willow Creek (458), Moose Range (486), Nipawin (487); Territoires inorganisés par unités 361, 363, 364, 365, 391, 393, 394, 395, 396, 421, 423, 424, 425, 451, 453, 454, 455, 481, 483, 484, 485, 488, 511, 513, 514, 515, 516, 517, 518; Réserves indiennes—Kinistino, Nut Lake, Shoal Lake, Red Earth; Villes—Melfort, Tisdale; Villages—Hudson Bay Jct., Naicam, Star City.

Division N° 15.—Elle comprend les municipalités de: St-Peter (369), Humboldt (370), Bayne (371); Grant (372), Aberdeen (373), Warman (374), Lake Lenore (399), Three Lakes (400), Hoodoo (401), Fish Creek (402), Rosthern (403), Laird (404), Carrot River (429), Invergordon (430), St-Louis (431), Weldon (459), Birch Hills (460), Prince Albert (461), Duck Lake (463), Russia (490), Buckland (491), Territoires inorganisés par unités—489, 519, 520, 521; Réserves indiennes—Pensionnat de Duck Lake, Bande One Arrow, Bande Okemassis, Bande John Smith, Bande James Smith, Bande Wahpaton; Cité—Prince Albert; Villes—Duck Lake, Humboldt, Rosthern, Vonda; Villages—Aberdeen, Beatty, Birch Hills, Bruno, Cudworth, Dalmeny, Dana, Domremy, Englefeld, Hague, Hepburn, Howell, Kinistino, Laird, Lake Lenore, Muenster, Osler, St-Brieux, St-Gregor, Wakaw, Waldheim, Warman, Weldon.

Division N° 16.—Elle comprend les municipalités de: Great Bend (405), Mayfield (406), Blaine Lake, (434), Redberry (435), Douglas (436), North Battleford (437), Leask (464), Royal (465), Meeting Lake (466), Round Hill (467), Rozilee (493), Canwood (494), Shell River (495), Medstead (497); Territoires inorganisés par unités 496, 523, 524, 525, 526, 527, 553, 554, 555, 556, 557, 587; Réserves indiennes—Agence Carleton, Thunder Child, Sturgeon Lake; Cité—North Battleford; Ville—Radisson; Villages—Blaine Lake, Borden, Canwood, Denholm, Fielding, Hafford, Krydor, Leask, Marcelin, Maymont, Parkside, Richard, Ruddell, Shellbrook, Speers.

Division N° 17.—Elle comprend les municipalités de: Meota (468), Turtle River (469), Paynton (470),Eldon (471), Wilton (472), Parkdale (498), Mervin (499), Paradise Hill (501), Britannia (502), Bright Sand (529), North Star (531); Territoires inorganisés par unités 528, 532, 558, 559, 561, 562, 588, 589, 591, 592; Réserves indiennes—Moosomin, Saultans, Meadow Lake, Waterhen, Agence Onion Lake; Ville—Lloydminster (partie); Villages—Edam, Lashburn, Maidstone. Marshall, Meota, Mervin, Paynton, Turtleford, Vawn, Waseca.

Division N° 18.—Elle comprend les parties septentrionales inorganisées; Réserves indiennes Bande Fond du Lac, Bande William Charles, Bande Cumberland, Bande Pine Bluff, Lac la Ronge, Lac Stanley, South End, Pelican Narrows, English River, Clear Lake, Canie Lake.

ALBERTA

Division N° 1.—Elle comprend les municipalités de: Flowery Plain (33), Burlington (34), Warner (36), Forty Mile (64), Eureka (65), Excelsior (92), Bow Island (94); Districts d'améliorations locales—1, 2, 3, 4, 5, 6, 31, 32, 35, 61, 62, 63, 66, 91, 93; Cité—Medicine Hat; Villes—Bow Island, Irvine, Taber; Villages—Burdett, Grassy Lake, Milk River, Walsh, Warner.

Division N° 2.—Elle comprend les municipalités de: Cochrane (10), Kerr (39), Castle River (40), Bright (69), Livingstone (70), Argyle (99); Districts d'améliorations locales—7, 8, 9, 37, 38, 67, 68, 71, 100, 101; Réserves indiennes—Réserve Peigan, Agence Blood; Cité—Lethbridge; Villes—Blairmore, Cardston, Claresholm, Coleman, Diamond City, Granum, Macleod, Magrath, Pincher Creek, Raymond; Villages—Coaldale, Coalhurst, Commerce, Cowley, Frank, Monarch, Pincher City, Stirling.

Division N° 3.—Elle comprend les municipalités de: McLean (96), Sunny South (123), King (153), Britannia (183); Districts d'améliorations locales—121, 122, 124, 125, 126, 151, 152, 154, 155, 156, 181, 182, 184, 185, 186, 211; Villes—Bassano, Brooks, Redcliffe; Villages—Alderson, Duchess, Empress, Enchant, Jenner, Retlaw, Suffield.

Division N° 4.—Elle comprend les municipalités de: Little Bow (98), Clifton (127), Harmony (128), Clear Lake (129), Marquis (157), Royal (158), Riley (159), Dinton (189), Sheep Creek (190), Stockland (191); Districts d'améliorations locales—97, 130, 131, 160, 161, 192; Parties inorganisées entre les cantons 17 et 22 ouest à la frontière provinciale; Villes—Carmangay, High River, Nanton, Okotok, Stavley, Vulcan; Villages—Barons, Blackie, Cayley, Champion, Lomond, Nobleford.

Division N° 5.—Elle comprend les municipalités de: Berry Creek (214), Bulyea (215), Acadia (241), Cereal (242), Collholme (243), Flowerdale (244), Lonebutte (245), Bertawan (271), Golden Centre (272), Sounding Creek (273), Richdale (274), Hand Hills (275), Michichi (277), Canmer (301), Stewart (302), Wiste (303), Hiram (304), Dowling Lake (305), Lambton (306), Starland (307;) Districts d'améliorations locales—212, 213, 246; Villes—Drumheller, Hanna, Youngstown; Villages—Cereal, Chinook, Craigmyle, Delia, Morrin, Munson, Oyen, Richdale, Rumsey.

Division N° 6.—Elle comprend les municipalités de: Blackfoot (218), Bow Valley (219), Shepard (220), Springbank (221), Grasswood (248), Keoma (249), Beddington (250), Carbon (278), Norquay (279), Rosebud (280), Beaver Dam (281), Ghost Pine (308), Stauffer (309), Mountain View (310), Westerdale (311); Districts d'améliorations locales—216, 217, 222, 247, 251, 252, 282; Parties inorganisées entre les cantons 21 et 31 ouest à la frontière provinciale; Réserves indiennes—Réserve Stony, Réserve Sarcee, Agence Blackfoot; Cités—Calgary, Banff (non-incorporée); Villes—Didsbury, Gleichen, Olds, Strathmore; Villages—Acme, Airdrie, Beiseker, Carbon, Carstairs, Cochrane, Crossfield, Irricana, Langdon, Rockyford, Rosebud, Three Hills, Trochu.

Division N° 7.—Elle comprend les municipalités de: Coronation (334), Sullivan Lake (335), Rosenheim (361), Hillcrest (362), Stocks (363), Flagstaff (364), Progress (365), Sifton (391), Vale (392), Huamha (393), Asquith (394), Wheatland (395), Ribstone (421), Gilt Edge (422), Battle River (423), Kinsella (424), Stirling (425), Iron Creek (455); Districts d'améliorations locales—331, 332, 333; Villes—Castor, Coronation, Hardisty, Wainwright; Villages—Alliance, Cadogan, Chauvin, Consort, Czar, Edgerton, Forestburg, Galahad, Hughenden, Irma, Killam, Lougheed, Monitor, Provost, Sedgewick, Strome, Veteran, Viking.

Division N° 8.—Elle comprend les municipalités de: Success (336), Vimy (337), Hayes (338), Pine Lake (339), Arthur (340), Dublin (366), Waverley (367) Haig (396), Lakeside (397), Lamerton (398), Crown (399), Melrose (426), Evergreen (427), Waterglen (428), Fertile Valley (429), Parkland (456), Lloyd George (457), Montgomery (458), Bigstone (459); Réserve indienne—Agence Hobbema; Cités—Red Deer, Wetaskiwin; Villes—Big Valley, Camrose, Daysland, Innisfail, Lacombe, Ponoka, Stettler; Villages—Alix, Bashaw, Bawlf, Bittern Lake, Blackfalds, Botha, Clive, Delburne, Donalda, Erskine, Ferintosh, Gadsby, Halkirk, Heisler, Millett, Mirror, New Norway, Ohaton, Penhold.

Division N° 9.—Elle comprend les municipalités de: Waterloo (312), Poplar Grove, (341), Raven (342), Prairie Creek (343), Golden West (371), Lorne (400), Lochearn (401), Blindman (430), Last West (431), Columbia (460); Districts d'améliorations locales—344, 374, 403, 432, 434, 461, 462; Territoires inorganisés par unités—433, 463, 464; Parties inorganisées entre les cantons 30 et 47 ouest à la frontière provinciale; Villages—Bentley, Bowden, North Red Deer, Rimbey, Rocky Mountain House, Sylvan Lake.

Division N° 10.—Elle comprend les municipalités de: Merton (451), Grizzly Bear (452), Buffalo Coulee (453), Lakeview (454), Wellington (481), Vermilion Valley (482), Melberta (483), Birch Lake (484), Patricia (485), Beaver Lake (486), Streamstown (511), Ethelwyn (512), Ukrainia (513), Sobor (514), Norma (515), The Pines (516), Eagle (545), Wostok (546), Leslie (547); Villes—Lloydminster (partie), Vegreville, Vermilion; Villages—Bruderheim, Chipman, Holden, Innisfree, Islay, Kitscoty, Lamont, Lavoy, Mannville, Minburn, Mundare, Ryley.

Division N° 11.—Elle comprend les municipalités de: Cornhill (487), Black Mud (488), Liberty (489), Pioneer (490), Clover Bar (517), Strathcona (518), Spruce Grove (519), Inga (520), Tomahawk (521), Sturgeon (548), Ray (549), Woodford (550), Morthen (551); District d'amélioration locale 491; Réserve indienne—Agence Edmonton; Cité—Edmonton; Villes—Beverly, Fort Saskatchewan, Leduc, Morinville, St-Albert, Stony Plain, Tofield; Villages—Alberta Beach, Seba Beach, Wabamun.

Division N° 12.—Elle comprend les municipalités de: Rocky Rapids (522), Pembina (552), Kitchener (582); Districts d'améliorations locales—496, 523, 525, 526, 527, 553, 554, 555, 556, 557, 558, 583, 584, 585, 588, 612, 615, 616; Territoires inorganisés par unités—493, 494, 495, 524, 586, 587; Parties inorganisées entre les cantons 46 et 57 ouest à la frontière provinciale; Ville—Edson; Village—Entwistle.

Division N° 13.—Elle comprend les municipalités de: Lincoln (542), Laurier, (543), Champlain (544), Boucher (572), St-Vincent (573), St-Lina (574), Wasel (575), Ashmont (605),; Districts d'améliorations locales—541, 571, 601, 602, 603, 604, 631, 632, 633, 634, 635, 661, 663, 664, 666, 695; Territoire inorganisé par unité—662; Réserves indiennes—Agence Saddle Lake, Réserve Frog Lake, White Fish Lake; Village—St-Paul de Métis.

Division N° 14.—Elle comprend les municipalités de: Smoky Lake (576), Unity (577), Opal (578), Hazelwood (579), Lockerbie (580), Pershing (581), Tawatinaw (608), Pibroch (609), Cartier (637), Nelson (638), Grosmont (668); Districts d'améliorations locales—606, 607, 610, 611, 636, 639, 640, 665, 667, 669, 696, 697, 698, 699, 726, 727, 729; Territoire inorganisé par unité—728; Ville—Athabaska; Villages—Clyde, Lac La Biche, Legal, Westlock.

Division N° 15.—Elle comprend les districts d'améliorations locales 613, 614, 641, 642, 643, 647, 670, 702, 705, 706, 707, 708, 709, 730, 731, 732, 733, 734, 735, 736, 737, 738, 764, 765, 766, 767, 794, 795, 796, 825, 826, 854, 855; Territoires inorganisés par unités—617, 618, 619, 620, 621, 622, 644, 645, 646, 648, 671, 672, 673, 674, 675, 676, 677, 678, 679, 700, 701, 703, 704, 710, 824; Parties inorganisées entre les cantons 56 et 69 ouest à la frontière provinciale et la partie de C. 69 R. 10 et 11 W.5ième méridien sud de la rivière Wapiti; Réserves indiennes—Grouard, Sturgeon Lake, Sawridge, Swan River, Drift Pile, Sucker Creek; Villes—Grouard, Peace River.

Division N° 16.—Elle comprend les municipalités de: Grande Prairie (739), Bear Lake (740), Spirit River (829), Peace (857), Fairview (858); Districts d'améliorations locales—741, 742, 769, 770, 771, 772, 797, 800, 801, 827, 828, 830, 831, 859, 860, 861, 886, 887, 888, 889, 916, 917; Territoires inorganisés par unités—890, 891, 918, 919; Parties inorganisées entre les cantons 86 et 90 et entre T.I.U. 919, et la frontière occidentale provinciale; Réserves indiennes—Saskatoon Lake, Moberly Lake, Hudson Hope, St-John, Dunvegan, Peace River; Ville—Grande Prairie; Villages—Clairmont, Spirit River.

Division N° 17.—Elle comprend le reste de la province au nord; Réserves indiennes—Long Lake, Chipewayan, Little Red River, Boyer River, Upper Hay River, Wabaska, Fort Vermilion.

Preface vii

INTRODUCTION

General Summary—
- Population by provinces ix
- Number of births, deaths and marriages ix
- Natural increase x

Births—
- Births and birth rates by provinces xii
- Masculinity of births xii
- Birth rates in other countries xiii
- Births by months xiii
- Births by age of parents xiv
- Births by nativity of parents xv
- Births by racial origin of parents xvii
- Illegitimate births xvii

Stillbirths—
- Stillbirths by legitimacy and age of mother xix
- Stillbirths by months and sex xx

Infantile Mortality—
- Infant mortality by provinces xxi
- Infant mortality by sex xxi
- Year of birth and age at death of infants xxii
- Infant mortality in other countries xxiii
- Infant mortality by months xxiii
- Infant mortality by quarters xxvi
- Infant mortality by causes xxvi
- Proportion of infant mortality rates for each sex from certain causes xxviii
- Causes of infant mortality by age-groups xxix
- Infant mortality in cities xxix

Maternal Mortality—
- Maternal mortality by age groups for provinces xxxi
- Maternal mortality according to attendance, conjugal condition and kind of birth xxxii
- Maternal mortality by causes of death xxxii
- Deaths from various causes associated with pregnancy and child-birth xxxiii

General Mortality—
- Total deaths and crude death rates by provinces xxxiv
- Crude death rates in certain other countries xxxiv
- Age distribution of decedents xxxiv
- Deaths of centenarians xxxvii
- Death rates by months xxxviii
- Adjusted or standarized death rates xxxix

Causes of Death—
- Deaths due to certain causes by provinces xl
- Causes of death for Indians xli
- Causes of death for population exclusive of Indians xliii
- Causes of death in the Registration Area as of 1921 xlv
- Communicable diseases xlvi
- Tuberculosis xlvii
- Cancer xlix
- Diseases of the heart l
- Diseases of the arteries l
- Bronchitis l
- Pneumonia l
- Diarrhoea and enteritis li
- Nephritis li
- Violent deaths li
- Proportion of total deaths from each of specified causes lii
- Proportional distribution by age-groups of deaths from certain causes lv

Maps showing Census Divisions in Prairie Provinces.

PREFACE

The present is the Sixth Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with provincial Registration Departments. It is, however, the first annual report to include the vital statistics of all provinces, as the agreement, which previously covered only the eight provinces of Prince Edward Island, Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, has been extended also to the province of Quebec as from January 1, 1926.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of these certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1926, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued monthly reports and a preliminary annual report, and supplied to the provinces of Nova Scotia, New Brunswick, Ontario, Saskatchewan and British Columbia the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the co-operating provinces are included in the present report. Attention is directed to the summary of the vital statistics of the Yukon and Northwest Territories at the end of the Introduction.

The collection of the data and the preparation of the Report were under the direction of Mr. E. S. Macphail, Chief of the Demography Branch of the Bureau, assisted by Mr. W. R. Tracey.

R. H. COATS,
Dominion Statistician.

Dominion Bureau of Statistics, January, 1928.

VITAL STATISTICS, CANADA, 1926

INTRODUCTION

This report presents statistics of births, deaths and marriages for the calendar year 1926 in the nine provinces of Canada, all of which co-operated with the Dominion Bureau of Statistics in producing a national vital statistic. As this is the first year for which the Province of Quebec has been included in the national system, the statistics of this province contained in the present report are limited to the year 1926, and comparisons with previous years back to 1921 are made only for the remaining eight provinces, which are spoken of collectively as "The Registration Area as of 1921".

While the Yukon Territory and the Northwest Territories are not included with the provinces in the figures presented, the births, deaths and marriages registered in these territories for the year 1926 are given separately at the end of the introduction. Owing to the small population of the territories, their vital statistics have in any case very small influence on the total for the Dominion.

The population of Canada by provinces for the years 1921-26 is shown in Table I. To facilitate the computation of rates for the Registration Area as of 1921, a separate total has been made for the eight provinces included in this area.

TABLE I.—POPULATION BY PROVINCES, 1921-26

Year	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	Canada (1)	Registration (2) area as of 1921
1921.....	88,615	523,837	(3) 387,876	2,361,199	2,933,662	610,118	757,510	588,454	524,582	**8,775,853**	(3) 6,414,654
1922.....	88,000	528,000	392,000	2,400,000	2,981,000	616,000	771,000	592,000	539,000	**8,907,000**	6,507,000
1923.....	88,000	530,000	396,000	2,439,000	3,019,000	621,000	783,000	596,000	544,000	**9,016,000**	6,577,000
1924.....	88,000	534,000	399,000	2,480,000	3,062,000	627,000	797,000	599,000	553,000	**9,139,000**	6,659,000
1925.....	87,000	537,000	403,000	2,520,000	3,103,000	633,000	810,000	603,000	561,000	**9,257,000**	6,737,000
1926.....	87,000	540,000	407,000	2,562,000	3,146,000	639,000	821,000	608,000	568,000	**9,378,000**	6,816,000

(1) Yukon and the Northwest Territories, with a population of 12,145 in 1921, are not included. Tables of births, deaths and marriages for these territories are, however, given at the end of this introduction.
(2) Comprising the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.
(3) Vital Statistics of Kent Co., New Brunswick, were not collected until May 1, 1921. Therefore in computing rates for that year one-third of the population of this county has been excluded, reducing the figure for New Brunswick to 379,904 and that for the Registration Area to 6,406,682.
NOTE—Population for 1921 and that of Manitoba, Saskatchewan and Alberta for 1926 are census figures. Remaining figures are estimates.

The number of births, deaths and marriages by provinces during the calendar year 1926 is given in Table II. The figures are divided into rural and urban, the urban comprising all incorporated cities and towns of 1,000 population and over, and the rural the remainder.

TABLE II.—BIRTHS, DEATHS AND MARRIAGES BY PROVINCES, 1926

Province	Births (2)	Deaths (2)	Marriages	Province	Births (2)	Deaths (2)	Marriages
Canada (1).....	**232,750**	**107,454**	**66,658**	Ontario.....	67,617	35,909	23,632

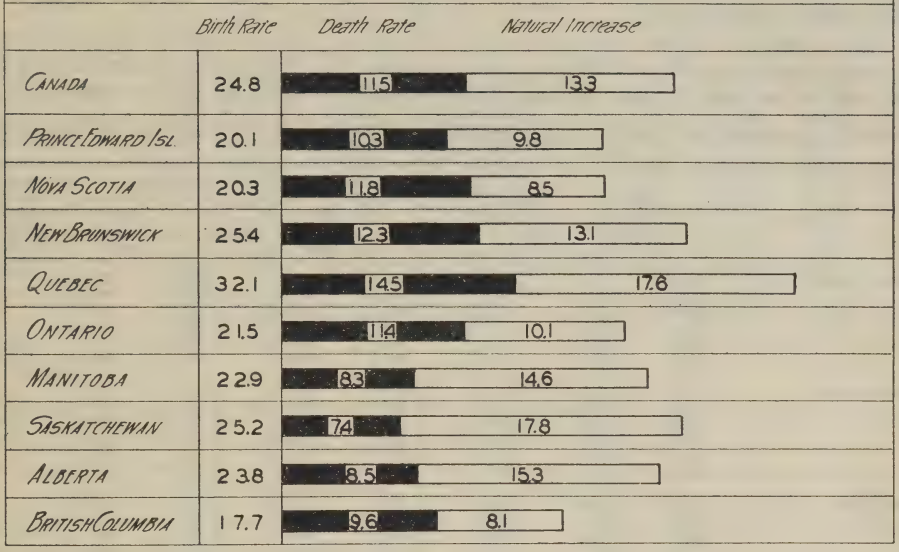
Urban.....	3,275	1,799	1,505	Urban.....	6,000	2,422	3,062
Quebec.....	82,165	37,251	17,827	British Columbia.....	10,063	5,474	4,418
Rural.....	42,228	16,805	7,409	Rural.....	3,228	1,812	808
Urban.....	39,937	20,446	10,418	Urban.....	6,835	3,662	3,610

(1) See note 1, table I. (2) Exclusive of stillbirths.
Note—"Urban" includes cities and towns of 1,000 population and over according to the census of 1921. "Rural" the remaining parts.

Natural Increase.—The natural increase to the population of the provinces of Canada by the excess of births over deaths in 1926 was 125,296. During the year there were 119,863 male births and 112,887 female births reported, making a total of 232,750 for both sexes, and in the same period the total number of deaths reported was 107,454, of which 56,979 were males as against 50,475 females. There were, therefore, 62,884 males and 62,412 females added by natural increase to the population of Canada in 1926, a difference of 472 in favour of the male sex. The rate of natural increase per 1,000 of population for both sexes combined was 13.4.



For the Registration Area as of 1921 the natural increase during the year 1926 was 80,382 or 11.8 per 1,000 of population, as compared with 88,384 or 13.1 per 1,000 in 1925. Both the absolute number and the rate for 1926 were the smallest since 1921.

BIRTH RATES, DEATH RATES AND RATES OF NATURAL INCREASE IN CANADA AND ITS PROVINCES
1926

BIRTHS

There were in all 236,813 confinements in Canada in the year 1926. Of the total number, 233,807 were single confinements, 2,970 twin confinements and 36 triple confinements. There resulted from these confinements 232,750 living births and 7,105 stillbirths. To living births single confinements contributed 227,084, twin confinements 5,562 and triple confinements 104. Table 3 (general tables) shows in full detail the manner in which single and multiple confinements contributed to the number of living births and stillbirths, male and female.

Birth Rates.—The crude birth rate (living births) per 1,000 population for 1926 was 24.8. The highest rates amongst the provinces were 32.1 for Quebec, and 25.4 for New Brunswick; the lowest were 17.7 for British Columbia and 20.1 for Prince Edward Island.

The rate for the Registration Area as of 1921 was 22.1 per 1,000 of population, as compared with 23.0 in 1925 and 26.4 in 1921. Every year of the period 1921-26 showed a fall in the rate from the preceding year, and the only instance of an increase in the absolute number of births was in 1924 when they showed a slight excess over the preceding year, though not in a proportion corresponding to the estimated increase in population.

Masculinity.—There was an excess of male births over female births in every province in 1926, the proportion ranging from 1,025 per 1,000 in Prince Edward Island to 1,076 per 1,000 in Manitoba. For the whole of Canada there were 1,062 male births per 1,000 female births. For the Registration Area as of 1921, the proportion was 1,057 per 1,000. The highest proportion for this area was 1,065 in 1921, the lowest 1,049 in 1922. Of the provinces for which comparisons can be carried back Prince Edward Island, as might be expected from its small population, has shown the widest fluctuations, varying from 985 in 1923 to 1,099 in 1925.

For comparative purposes, it may be noted that amongst the white population of the Registration Area of the United States, in the years 1915 to 1925, the yearly proportion of male births to 1,000 female births has varied between 1,055 and 1,062.

England and Wales, where the registration of births has been controlled and directed from one centre for a long period, gives a good illustration of the variation of masculinity of living births in a large population. In the fifty years from 1871 to 1920 the proportion of male births ranged from 1,032 in 1898 to 1,060 in 1919, while the highest ratio prior to the Great War was 1,043 in 1875. In 1921 the proportion of male births in England and Wales was 1,051; in 1922, 1,049; in 1923, 1,044; in 1924, 1,047; in 1925, 1,045; and in 1926, 1,041 to 1,000 females.

The number of births, the birth rates by provinces and the ratio of male to female births for the years 1921 to 1926 are shown in Table IV. The figures for Quebec and for the total of the nine provinces are, as already explained, limited to the year 1926.

TABLE IV.—BIRTHS (EXCLUSIVE OF STILLBIRTHS), RATE PER 1,000 POPULATION AND RATIO OF MALE TO FEMALE BIRTHS, 1921-26

Province		Number of living births	Rates per 1,000 pop'n.	Male births		Female births		Male births to 1,000 female births

Births by Months.—The number of births in each month is given in Table 4 of the main tables, classified as rural and urban in each province

Table VI shows by provinces the equivalent annual birth rates for each month from 1921 to 1926. To obtain these rates the number of births in the given month has been multiplied by 365 and divided by the number of days in the month before being reduced to a proportion per 1,000 of population.

TABLE VI.—BIRTH RATES (EXCLUSIVE OF STILLBIRTHS), PER 1,000 POPULATION FOR EACH MONTH BY PROVINCES, 1921-26

Province		Annual rates	Equivalent annual birth rates											
			Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

England and Wales, where the registration of births has been controlled and directed from one centre for a long period, gives a good illustration of the variation of masculinity of living births in a large population. In the fifty years from 1871 to 1920 the proportion of male births ranged from 1,032 in 1898 to 1,060 in 1919, while the highest ratio prior to the Great War was 1,043 in 1875. In 1921 the proportion of male births in England and Wales was 1,051; in 1922, 1,049; in 1923, 1,044; in 1924, 1,047; in 1925, 1,045; and in 1926, 1,041 to 1,000 females.

The number of births, the birth rates by provinces and the ratio of male to female births for the years 1921 to 1926 are shown in Table IV. The figures for Quebec and for the total of the nine provinces are, as already explained, limited to the year 1926.

TABLE IV.—BIRTHS (EXCLUSIVE OF STILLBIRTHS), RATE PER 1,000 POPULATION AND RATIO OF MALE TO FEMALE BIRTHS, 1921-26

Province		Number of living births	Rates per 1,000 pop'n.	Male births		Female births		Male births to 1,000 female births

(1) See note 1, table I.

Births by Months.—The number of births in each month is given in Table 4 of the main tables, classified as rural and urban in each province

Table VI shows by provinces the equivalent annual birth rates for each month from 1921 to 1926. To obtain these rates the number of births in the given month has been multiplied by 365 and divided by the number of days in the month before being reduced to a proportion per 1,000 of population.

TABLE VI.—BIRTH RATES (EXCLUSIVE OF STILLBIRTHS), PER 1,000 POPULATION FOR EACH MONTH BY PROVINCES, 1921–26

Province		Annual rates	Equivalent annual birth rates											
			Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

(1) See note 1, table I.

Births by Ages of Parents.—The numerical and percentage distribution of legitimate living births by ages of parents is given for the year 1926 in Table VII. In eleven instances the married mother was under 15 years of age. Twenty-eight per cent of the births were to mothers under 25 years of age while less than 7 per cent were to mothers who had passed the 40th birthday. Only 10.3 per cent of the fathers were under 25 and more than 21 per cent were 40 years or over. These percentages have been calculated on the stated ages only, but the proportion of unstated ages amongst legitimate births is negligible for either parent.

TABLE VII.—LEGITIMATE BIRTHS (EXCLUSIVE OF STILLBIRTHS) IN CANADA[1] CLASSIFIED BY AGES OF PARENTS, 1926

Mothers and fathers	Age groups								Total stated ages	Age not stated	Total
	Under 15 years	15–19 years	20–24 years	25–29 years	30–34 years	35–39 years	40–44 years	45 years and over			
No. of mothers	11	10,826	52,584	62,190	49,939	34,929	13,780	1,397	225,656	973	226,629
Per cent of mothers	(2)	4·8	23·3	27·6	22·1	15·5	6·1	0·6	100·0	–	–

(1) See note 1, table I. (2) Less than one-tenth of one per cent.

Table VIII is of similar construction to Table VII but for each of the years 1921 to 1926, and is therefore limited to the Registration Area as of 1921, since a comparison with the former years cannot be made for the province of Quebec. In so far as these figures show any definite trend, it appears to consist in a slight increase in the proportion of children born having mothers and fathers in the older age groups, a suitable point of division to bring out this trend being the 30th birthday for the mother and the 35th for the father.

TABLE VIII.—LEGITIMATE BIRTHS (EXCLUSIVE OF STILLBIRTHS) IN THE REGISTRATION AREA AS OF 1921, CLASSIFIED BY AGES OF PARENTS, 1921-26

Mothers and fathers	Age groups								Total stated ages	Age not stated	Total

(1) Less than one-tenth of one per cent.

One quarter of the married mothers of children born in 1926 in the nine provinces of Canada were 24.43 years of age; one quarter between this age and 28.89 years; one quarter between 28.89 and 34.26 years and one quarter over the latter age. These dividing points are called quartiles and the fraction of the year of age is determined on the assumption that mothers in the same year of age are evenly distributed over this from its lower to its upper limit. Quartiles for married fathers were 28.35 years; 33.31 years and 39.01 years of age. If we divide the mothers arranged according to age into ten groups of equal numbers instead of four, the dividing points, or deciles are 21.41 years, 23.50 years, 25.34 years, 27.79 years, 28.89 years, 30.82 years, 33.41 years, 35.61 years and 38.69 years. The decile points for fathers are 24.91 years, 27.28 years, 29.35 years, 31.28 years, 33.31 years, 35.48 years, 37.81 years, 40.40 years and 44.19 years.

Nativity of Parents.—Table IX shows for each province the percentage distribution of legitimate births in 1926 by the nativity of the mother.

TABLE IX.—PERCENTAGE OF LEGITIMATE CHILDREN BORN ALIVE HAVING CANADIAN BORN BRITISH BORN OR FOREIGN BORN MOTHERS, BY PROVINCES, 1926

Province	Per cent distribution of children born by nativity of mother			
	Total	Canadian born	British born	Foreign born
Canada(1)	**100·0**	**72·0**	**13·0**	**15·0**
Prince Edward Island	100·0	95·7	1·3	2·9
Nova Scotia	100·0	86·5	9·7	3·7
New Brunswick	100·0	92·3	3·5	4·2
Quebec	100·0	92·0	2·8	5·2
Ontario	100·0	68·7	20·9	10·4
Manitoba	100·0	49·2	19·4	31·4
Saskatchewan	100·0	41·5	15·4	43·1
Alberta	100·0	36·3	19·6	44·1
British Columbia	100·0	38·2	35·7	26·1

(1) See note 1, table. I.

The high proportion of Canadian born mothers to those of other nativities in the Maritime Provinces and Quebec contrasts with the position in the four western provinces and particularly in Alberta where only 36 per cent of all mothers were born in Canada. It may be noted, however, that the proportion of Canadian born mothers in the Western provinces has shown a well-marked upward trend since 1921, as indicated by the following statement.

PER CENT OF LEGITIMATE CHILDREN BORN ALIVE HAVING CANADIAN-BORN MOTHERS

—	1921 (1)	1922	1923	1924	1925	1926
Manitoba	42·3	43·5	44·9	47·4	49·0	49·2
Saskatchewan	36·1	36·4	37·9	39·4	40·8	41·5
Alberta	30·0	30·9	32·3	33·1	34·5	36·3
British Columbia	29·7	33·7	34·7	36·1	37·1	38·2

(1) Including illegitimate.

Table X, which classifies all children born alive in Canada in 1926 according to the country of birth of their parents, furnishes some idea of the extent to which the coming generation will be the product of Canadian-born, British-born or Foreign-born parents, and amongst the latter differentiates the countries from which Canadian immigrants generally come. The term "Country not specified" under "Country of Birth" includes for the father illegitimate births and births of incomplete record while for the mother it includes births of incomplete record only. It will be observed that 68.5 per cent of the children born in 1926 had Canadian-born fathers, 71.8 per cent had mothers born in Canada and in 61.4 per cent both parents were Canadian-born. It thus follows that 78.9 per cent had at least one parent born in Canada. Indeed, but for the inclusion of "Country not specified" in the total, the percentage would be even higher.

TABLE X.—NUMBER AND PER CENT PROPORTION OF BIRTHS (EXCLUSIVE OF STILLBIRTHS) HAVING FATHERS AND MOTHERS BORN IN SPECIFIED COUNTRIES, 1926

Country of birth of parent	Number of births with father, mother or both parents born in specified country			Per cent of births with father, mother or both parents born in specified country

(1) Including Galicia.
(2) Less than one-tenth of one per cent.
(3) Represents the number of births where both parents were in the same category as regards birthplace. The difference between this figure (178,155) and total births (232,750)-equals the number of births (54,595), where both parents were not in the same category as regards birthplace.
(4) This excludes the percentage (23·5) of "mixed parentage," i.e., where both parents were not in the same category by birthplace.

Racial Origin of Parents.—Table XI gives the number and per cent proportion of births during the year contributed by the principal racial groups. In addition to indicating the part played by each racial stock in contributing to the number of births the table presents a comparison of the figures for father and mother with those in which both parents were of the same racial origin, and shows some indication of the tendency toward marriage outside of the racial group. It must, however, be kept in mind that according to the preceding table 31.5 per cent of fathers and 28.2 per cent of mothers were born outside of Canada. In an unknown number of these cases the marriage took place before coming to Canada, when the opportunity of mating with persons of other racial origins may have been much more limited. The percentage of cases in which the racial origin of the mother was not stated was only 4/10 of one per cent. The cases in which the origin of the father was not stated (2.9 per cent) included illegitimate births.

TABLE XI.—NUMBER AND PER CENT PROPORTION OF BIRTHS (EXCLUSIVE OF STILLBIRTHS) HAVING FATHERS AND MOTHERS OF SPECIFIED RACIAL ORIGIN, 1926

Racial origin of parents	Number of births with father, mother or both parents of specified origin			Per cent of births with father, mother or both parents of specified origin

(1) Including "Galician."
(2) Less than one-tenth of one per cent.
(3) Represents the number of births where both parents were in the same category as regards racial origin. The difference between this figure (174,065) and the total births (232,750) equals the number of births (58,685) where both parents were not of the same category as regards racial origin.
(4) This excludes the percentage (25·2) of mixed parentage, i.e., where both parents were not in the same category by racial origin.

Illegitimate Births.—Table XII gives the number of illegitimate births in 1926, classified by age groups of the mothers for each province. In 718 cases or 11.7 per cent of the total the age of the mother was not stated. This percentage vitiates to some extent the conclusions which may be made from the stated ages. Of the 718 cases 664 occurred in the province of Quebec, these being mainly returns from the Crèches in Quebec and Montreal.

TABLE XII—ILLEGITIMATE BIRTHS (EXCLUSIVE OF STILLBIRTHS) CLASSIFIED BY AGE OF MOTHER, BY PROVINCES, 1926

The proportion of stillbirths to living births for certain age groups of married mothers in the nine provinces of Canada in 1926 is shown in the following statement. The unknown ages listed in Tables VIII and XV have been distributed proportionately among the groups. The percentage of stillbirths to living births was least in the period 20-24 years and showed a steadily advancing ratio for each older age group. This result is consistent with that of the preceding years for the Registration Area as of 1921. It is to be noted, however, that order of birth, which is presumably a factor in the proportion of stillbirths to living births, is not brought out in conjunction with the age groups.

PER CENT PROPORTION OF STILLBIRTHS TO TOTAL BIRTHS IN CANADA,[1] BY AGE OF MOTHER, 1926

Age groups of mothers	Total births	Number of stillbirths	Per cent which stillbirths form of total births

(1) See note 1, table I.

INFANT MORTALITY

Annual mortality rates for children under one year of age are usually based on a comparison of the number of deaths of infants during the year under review with the number of living births reported for the same year. The number of infant deaths in the nine provinces of Canada in 1926 totalled 23,692, giving the rate of 101.8 per 1,000 living births. For the eight provinces comprising the Registration Area as of 1921, the rate in 1926 was 79.9 per 1,000 births as compared with 78.6 in 1925, and 78.5 in 1924. It will be seen that the rate for these years showed no marked alteration, while for the years 1921-23 it was considerably higher, being 88.1 in 1921 and 1923, and 86.8 in 1922.

Infant Mortality by Sex.—The figures by sex in Table XVIII show for the year 1926 a rate of infant mortality for males in the nine provinces of Canada amounting to 112.9 per 1,000 births while the rate for females was only 90 per 1,000. Male births for the year numbered 119,863 while the female births amounted to only 112,887, the excess of males being thus 6,976; but if the infant deaths of the same year are deducted from the births of each sex to represent with reasonable accuracy the position at the end of the first year of life, the net advantage of males is reduced to 3,594.

TABLE XVIII.—NUMBER OF DEATHS UNDER ONE YEAR AND RATIO TO LIVING BIRTHS, BY SEX IN EACH PROVINCE, 1921-26

Province	Both sexes			Male			Female		
	Living births	Deaths under one year		Living births	Deaths under one year		Living births	Deaths under one year

(1) See note 1, table I.

Year of Birth and Age at Death.—Although the infant death rates in Table XVIII are based on the number of births and deaths reported in 1926, it is evident that a number of the deaths were of infants born in 1925, but who had not attained their first birthday at the time of death. The actual number of such cases was 5,190 or 21.9 per cent of the total infant mortality reported for the year, leaving 18,502 or 78.1 per cent of the total number as the deaths of infants who were born in 1926 (Table XXII). The small proportion of deaths from the births of the preceding year explains why the infant mortality rate based on the relation of the deaths in each year to the births in the same year may be properly employed even for the comparison of one year with another, except where a very considerable change in the number of births takes place between successive years. Table XIX, which presents by provinces the proportion of infant deaths in 1926 at each age under one year shows that nearly one-half of the infants who died during the year failed to live for one month and about one-third lived for less than one week. This heavy mortality amongst the newly born furnishes the reason that such a large proportion of the infant mortality of a calendar year is contributed by the births of the same year.

Infant Mortality in Other Countries.—Table XX presents a statement of the number of births and deaths of infants under one year of age for Canada and for certain other countries. In some cases the figures are preliminary. Every country for which the sexes are listed separately shows a higher rate of infant mortality among males than among females.

TABLE XX—INFANT MORTALITY IN CANADA AND IN CERTAIN OTHER COUNTRIES

Country	Year	Living births	Infant mortality: Deaths under 1 year	Infant mortality: Rate per 1,000 living births	Country	Year	Living births	Infant mortality: Deaths under 1 year	Infant mortality: Rate per 1,000 living births

Infant Mortality by Months.—Table XXI shows the number of infant deaths by months in Canada in 1926 and the rate of infant mortality for each month calculated on the living births of the same month.

TABLE XXI.—INFANT MORTALITY BY MONTH OF DEATH, 1926

—	Total	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Number of living births	232,750	19,317	18,284	21,356	21,064	20,706	19,464	19,907	19,682	19,145	18,512	17,402	17,911
Number of deaths under one yr.	23,692	1,860	1,885	2,236	2,411	2,184	1,743	1,671	2,143	2,265	1,900	1,599	1,795
Rate per 1,000 living births	101·8	96·3	103·1	104·7	114·5	105·5	89·5	83·9	108·9	118·3	102·6	91·9	100·2

In Table XXII the deaths of infants under one year of age in the nine provinces of Canada during the year 1926 are classified according to the month of birth and the month of death. The month of birth may have been either in 1925 or 1926. Vertically the figures give the distribution by months of the births of children who died under one year of age in the specified month; horizontally they give the distribution by months in 1926 of the deaths of children under one year of age born in the specified month. For example, 212 of the children born in April, 1925, died in 1926 before they had attained their first birthday; of these deaths, 62 occurred in January, 45 in February, 71 in March and 34 in April, 1926. If the figures of the table are read diagonally (omitting totals) from upper left to lower right, they give the number of children who died in 1926 in the calendar month of birth, the number who died in the month succeeding that of birth, etc. Thus the diagonal addition of the lowest set, from 765 to 654, shows that for the year 1926 the actual number of infants dying in the month of their birth was 9,064 or 38.3 per cent of the total infant mortality during the year. Diagonal addition of the set of items immediately above those last taken (from 252 to 278) shows that the number of children who died in 1926 in the month succeeding that of their birth was 3,339 or 14.1 per cent of the infant deaths during the year. The remainder, who died in a later month than that succeeding the month of their birth, numbered 11,289 or 47.6 per cent of the total infant mortality during 1926.

(1) See note 1, table I.

In Table XXIII, the infant mortality of each month is divided into three parts and a rate for each part is calculated on the births which form an appropriate denominator for that part. As the births by months for 1925 are available only for the eight provinces comprising the Registration Area as of 1921, the table is confined to that area. The table permits a comparison between the various months of 1926 in regard to (a) the mortality of infants born during the month; (b) the mortality of infants born during the preceding month; (c) the mortality of infants under one year born prior to the preceding month.

In the rate of mortality for infants born prior to the preceding month, adjustment has been made on a simple pro rata basis for the varying lengths of months, with 30.4 days as the standard. No such adjustment has been made for the other two sets of rates, since in these, owing to the concentration of deaths at the earliest ages, the variation in length of the month makes little difference and adjustment would be a matter of considerable difficulty.

The highest rate of mortality for infants born during the month was for April and the lowest for September. The highest rate for infants born during the preceding month was for December and the lowest for August. For infants born prior to the preceding month mortality was highest in April with September second and lowest in July. The position of September in the mortality of these infants contrasts with its low rate in the other two divisions, and may be attributed to the greater relative importance of diarrhœa and enteritis amongst infants who have lived through the month of their birth and the succeeding month.

To obtain a unified adjusted monthly rate of infant mortality the three rates have been combined on the assumption of an equal number of births in each month of the year. April showed the highest unified rate, 96.8 per 1,000 living births, while July, with 66.9 was the lowest month.

TABLE XXIII.—ADJUSTMENT OF INFANT MORTALITY RATES IN THE REGISTRATION AREA AS OF 1921, BY MONTHS, 1926

Month	Mortality of infants born during specified month			Mortality of infants born during preceding month			Mortality of infants born prior to preceding month				(1) Unified adjusted rates per 1,000 births
	No. of births	No. of deaths	Rate per 1,000 births	No. of births	No. of deaths	Rate per 1,000 births	No. of births	No. of deaths	Rate per 1,000 births	Rate adjusted for length of month	
	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)	(k)

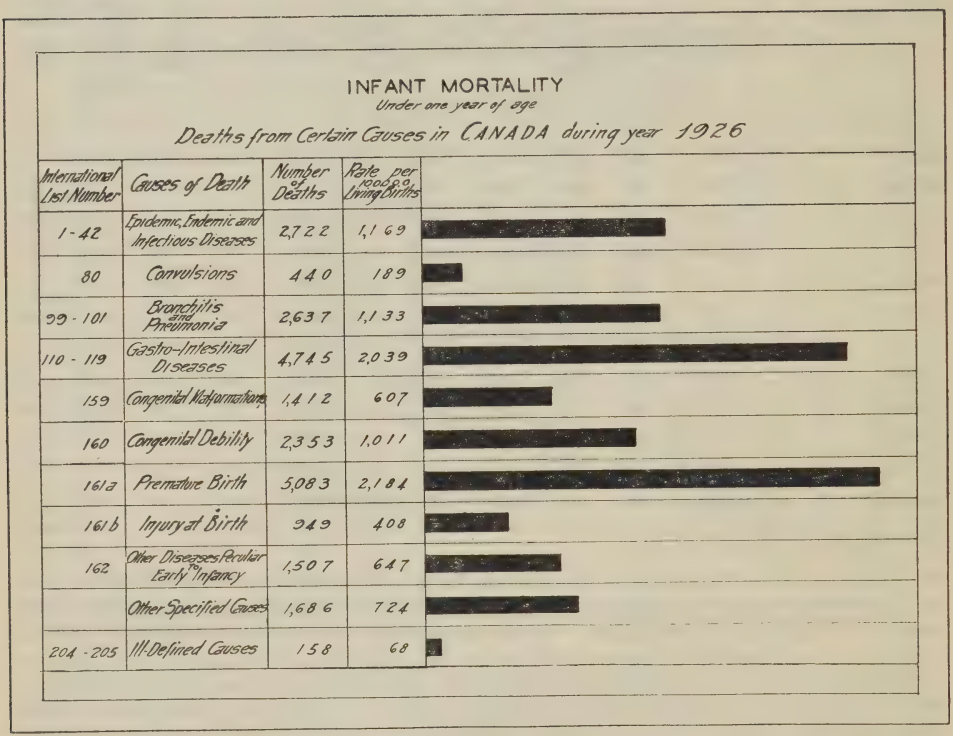
Table XXIV presents adjusted rates of infant mortality for the Registration Area as of 1921 covering the period 1923-26. These have been calculated in a similar manner to those of Table XXIII. While considerable variation is shown from year to year in the relationship between the rates for the individual months, each year shows a decline in the rate between March or April and July. The latter month has consistently the lowest rates of the year. September shows on the average rates considerably higher than any other month in the latter part of the year.

TABLE XXIV.—ADJUSTED INFANT MORTALITY RATES BY MONTHS IN THE REGISTRATION AREA AS OF 1921 FOR THE YEARS 1923-26



Year	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
1923	104·6	114·2	119·8	98·7	86·2	68·8	64·9	74·7	82·4	82·9	75·9	72·1
1924	82·8	86·0	91·2	88·3	79·0	72·8	65·9	76·0	83·3	74·0	68·0	77·9
1925	78·4	83·4	91·2	81·9	77·6	66·8	57·6	72·8	101·5	86·6	66·2	74·4
1926	74·9	86·9	87·5	96·8	85·3	70·3	66·9	71·3	82·5	76·6	68·9	83·5

Infant Mortality by Quarters.—Table XXV gives the rates of infant mortality for the four quarters of 1926. These are crude rates, expressing the ratio of the deaths in each quarter to the births in the same period. Not only does the last quarter of the year show the lowest rate, but as the number of births in this quarter compares unfavourably with those of the other three, the method of computation exaggerates the rate of this quarter, which if computed with proper adjustments would be lower yet.

TABLE XXV.—INFANT MORTALITY IN CANADA [1] FOR THE FOUR QUARTERS OF 1926

Quarter	Living births	Infant deaths	Infant death rate per 1,000 living births
1st quarter	58,957	5,981	101·4
2nd quarter	61,234	6,338	103·5
3rd quarter	58,734	6,079	103·5
4th quarter	53,825	5,294	98·4

(1) See note 1, table I.

Infant Mortality by Causes.—Of the total infant mortality reported for the nine provinces of Canada in 1926, 92.6 per cent was due to the causes of death listed by name in Table XXVI. For males the proportion of deaths from these causes was 92.5 per cent, for females 92.8 per cent. More deaths were attributed to premature birth than to any other single cause. Diarrhoea and enteritis was the second cause in importance and pneumonia, though a long distance behind, took third place by a narrow margin over congenital debility.

TABLE XXVI.—INFANT MORTALITY IN CANADA[1] BY SEX AND SPECIFIED CAUSES OF DEATH, 1926

International list No.	Causes of death	Both sexes			Male		Female	
		Number	Per cent distribution by cause of death	Rate per 100,000 living births	Number	Rate per 100,000 living births	Number	Rate per 100,000 living births

(1) See note 1, table I.

Table XXVII gives infant mortality rates by sex for the Registration Area as of 1921 during the years 1921-26, from the same list of causes as that given in Table XXVI, and affords an opportunity of observing the trend of mortality from certain causes during the five-year period.

(1)The decrease in the rate for dysentery in 1926 is largely due to a stricter interpretation of the term.
(2)Includes deaths under 3 months where there was no medical attendance.

Proportion of Infant Mortality rates for each sex from certain causes.—Table XXVIII shows for the same list of causes as given in Tables XXVI and XXVII, the per cent proportion which the death rates of male infants bore to those of female infants. For the nine provinces of Canada the figures are given for the year 1926 only; for the Registration Area as of 1921, not only 1926 figures are listed, but also those for the five years 1921-25 and for the aggregate of this five-year period, the latter set of figures being the most typical of all those in the table. It will be noted that both for the nine provinces and for the Registration Area as of 1921, the male rates for nearly all of the causes exceed the female rates. While the causes which produce low rates of mortality show violent fluctuations, the only disease amongst those listed for which the female rate was consistently worse than the male is whooping-cough.

TABLE XXVIII—PER CENT PROPORTION OF INFANT MORTALITY RATES OF MALES TO THOSE OF FEMALES, 1921-26

Int. list No.	Causes of death	Mortality rate of females taken as 100

(1)See note 1, table I.

Causes of Infant Mortality by Age-Groups.—Table XXIX presents infant mortality by age-groups for the same list of causes as in previous tables for the nine provinces of Canada in 1926. The first three months of life are divided into monthly periods and in the first month the first week of life is separated from the remaining part. The remainder of the year is given by age periods of three months. In order to establish a fair comparison between periods of different lengths equivalent weekly rates are used. To obtain these, the crude rates for the period "one week and under one month" have been multiplied by 7/23.4, those for the full monthly period by 7/30.4 and those for the three months' period by 7/91.2. As thus reduced, the rates represent a mortality per 100,000 living births over an average week of the longer periods. It should be remembered, however, that the mortality of the first week of life is by no means evenly distributed. In 1926 the number of deaths in the first 24 hours of life was well in excess of that during the remainder of the first week. For certain causes the proportion of deaths on the first day was naturally still greater. Of the 3,936 infants who died under one week of age in consequence of premature birth, 2,601 or almost two-thirds of the number succumbed in the first 24 hours. A similar, though much less pronounced inequality of distribution characterized the deaths which took place at ages between one week and one month.

The most striking point emphasized by the table is the concentration of deaths from numbers 159-162 during the first week of life. It is worth noting, however, that pneumonia also had a somewhat heavier pro rata incidence during this period than in any other portion of the year, a fact obscured by the ordinary method of presenting rates, owing to the shortness of the period. Diarrhoea and enteritis showed their highest rate in the third month of life, though the second month was a close competitor. Convulsions (a somewhat unsatisfactory rubric) were most fatal in the first week. Influenza was well distributed throughout the year. Whooping-cough was also well distributed throughout the various age-periods with the exception of the first week, but reached its peak of mortality in the third month of life.

As the aggregate deaths over a period of five years give in a matter of this sort a more typical representation of the facts than can be obtained from the results of any one year, the reader is referred to Table XXX of the Fifth Annual Report, which contains rates similar to those presented hereunder but for the Registration Area as of 1921 over the period 1921-25.

TABLE XXIX—MORTALITY RATES (EQUIVALENT WEEKLY) PER 100,000 LIVING BIRTHS FOR CERTAIN SPECIFIED CAUSES BY AGE PERIODS OF THE FIRST YEAR OF LIFE, CANADA[1], 1926

[1] See note 1, table I. [2] Less than 0·1 per 100,000 births.

Infant Mortality in Cities.—Table XXX shows the number of living births, the number of deaths under one year and the infantile death rates for cities of 40,000 and over during

the years 1921-26. For the two cities of Montreal and Quebec, however, the figures are limited to the year 1926. The highest infant mortality rate for the year 1926 was in the City of Quebec while the lowest was in Vancouver, the range from lowest to highest being very great. Of the cities for which comparisons are presented for past years it will be noted that Vancouver occupied the same enviable position in every one of the years listed, though in 1922 the Vancouver rate of 66.6 per 1,000 was very little lower than that of London, Ontario, which for that year showed a rate of 67.7. London also stood next to Vancouver in 1923, 1925 and 1926.

TABLE XXX—INFANT MORTALITY IN CITIES OF 40,000 AND OVER, 1921-26

Number		Calgary	Edmonton	Halifax	Hamilton	London	Montreal	Ottawa	Quebec	St. John	Toronto	Vancouver	Winnipeg
Living births	1921	2,086	2,136	1,836	3,498	1,458	(1)	3,250	(1)	1,225	13,378	3,298	6,323

(1) Not in Registration Area.
NOTE.—Classification of cities by population is according to the Census of 1921.

In considering the statistics of births and of infantile mortality in cities the fact that many non-residents avail themselves of the advantages of urban institutions should not be overlooked. In order to eliminate the results of births to non-resident mothers and the deaths of their infants from comparisons of infant mortality between cities, the most satisfactory method would be to transfer all births and deaths from the place where they occur to the place of residence. In default of such transfer, however, the elimination from a city total of the institutional births to non-resident mothers and the deaths of children born to such mothers should result in a rate of infant mortality very close to the correct one. Non-institutional births in the city to non-resident mothers are few in number and may without serious error be allowed to balance the births occurring elsewhere to mothers resident in the city. Table XXXI shows the computation of infant mortality in 1926 for cities of 40,000 and over on the corrected basis. The absolute figures for this table have been based on Tables 6 and 15 of the general tables. It is interesting to compare the corrected infant mortality of the cities with that given in table XXX.

TABLE XXXI.—CORRECTED INFANT MORTALITY RATES IN CITIES OF 40,000 AND OVER, 1926

Cities	Living births excluding those in institutions to non-resident mothers	Deaths under one year excluding those of non residents in institutions	Corrected infant mortality rate per 1,000 living births
Calgary, Alta	1,302	118	90·6
Edmonton, Alta	1,410	135	95·7
Halifax, N.S.	1,326	122	92·0
Hamilton, Ont.	2,584	196	75·9
London, Ont.	1,160	88	75·9
Montreal, Que.	19,340	2,797	144·6
Ottawa, Ont.	2,462	320	130·0
Quebec, Que.	4,102	769	187·5
St. John, N.B.	1,021	115	112·6
Toronto, Ont.	10,634	800	75·2
Vancouver, B.C.	2,769	160	57·8
Winnipeg, Man.	3,517	282	80·2

MATERNAL MORTALITY

Table XXXII classifies maternal deaths in 1926 by the age of decedents for each of the provinces of Canada. The deaths of women from puerperal causes in the nine provinces numbered 1,317, giving a rate of 5.7 per 1,000 living births. The highest provincial rates were 7.1, 6.5 and 6.4 per 1,000 occurring in Saskatchewan, British Columbia and New Brunswick respectively. The lowest rates of maternal mortality, 4.6 per 1,000, were found in Nova Scotia and Prince Edward Island, though the number of cases in the latter province was so small as to make the rate of little significance.

TABLE XXXII.—MATERNAL MORTALITY BY AGE GROUPS FOR PROVINCES, 1926

Age groups	Canada (1)	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.
15-19 years	(4)58	–	(2)6	2	(3)11	(2)23	3	5	5	3
20-24 years	247	–	5	9	90	75	23	23	16	6
25-29 years	256	3	8	18	88	70	14	28	10	17

Rate per 1,000 living births	**5·7**	**4·6**	**4·6**	**6·4**	**5·2**	**5·6**	**5·9**	**7·1**	**5·9**	**6·5**

(1) See note 1, table I. (2) Including one mother aged 14. (3) Including one mother aged 13. (4) See notes (2) and (3).

Classifying children born alive in the nine provinces of Canada in 1926 according to the age of the mother, and making a proportionate distribution of those for whom the age was not stated, we are enabled to make the comparison of maternal mortality by ages shown in the following statement. It will be noted that the lowest rate is for mothers between the 25th and 30th birthday. The rate for mothers from 40 to 49 years is nearly three times that of the group from 25-29 years. These results are fairly consistent with those obtained for previous years for the Registration Area as of 1921. Dissimilar proportions of first births in the different age groups introduce a hidden classification which no doubt influences the rate shown for each age group.

MATERNAL MORTALITY RATES FOR CANADA[1] BY AGE GROUPS, 1926

Age groups	Living births 1926	Maternal deaths, 1926		Age groups	Living births 1926	Maternal deaths, 1926	
		Number	Rate per 1,000 living births			Number	Rate per 1,000 living births
Under 20 years	13,094	58	4·4	30-39 years	85,993	579	6·7
20-24 years	54,953	247	4·5	40-49 "	15,340	175	11·4
25-29 "	63,345	256	4·0	50 years and over	25	2	(2)

(1) See note 1, table I. (2) Not calculated.

In Table XXXIII the maternal deaths in each province of the Registration Area as of 1921 and the rates calculated therefrom are presented for the six years 1921-26. For the eight provinces as a whole whatever trend is shown is rather in an upward than a downward direction, but this may show the effect of improvement in reporting, due to persistent efforts to secure specific information regarding deaths of women of child-bearing age.

TABLE XXXIII.—MATERNAL MORTALITY IN THE REGISTRATION AREA AS OF 1921 DURING THE YEARS 1921-26

—		Canada (1)	P.E.I.	N.S.	N.B.	Ont.	Man.	Sask.	Alta.	B.C.

(1) See note 1, table I.

Although the rate of maternal mortality has been calculated on living births, it is clear that many deaths from puerperal causes are associated with stillbirths and miscarriages. Table XXXIV shows the result of an investigation into this matter. As the information regarding the kind of birth is not on the death certificate, matching of birth and death certificates was necessitated. The rubric "no birth" includes miscarriages, abortions, ectopic gestations and those cases in which the foetus remained within the body of the mother at death. The total number of living births in 1926 was 232,750. The number of maternal deaths associated with these totalled 601, giving a rate of 2.6 per 1,000. The total number of stillbirths was 7,105; the maternal deaths associated with these, numbered 235, giving a rate of 33.1 per 1,000.

In the same table the puerperal deaths have been classified according to the conjugal condition of the decedent and the nature of the attendance received.

TABLE XXXIV.—DEATHS FROM PUERPERAL CAUSES, CLASSIFIED ACCORDING TO ATTENDANCE RECEIVED, THE CONJUGAL CONDITION OF THE DECEDENT AND THE ASSOCIATION OF THE DEATH WITH A LIVING BIRTH, A STILLBIRTH OR NO BIRTH.

Provinces	Total	Attendance received		Conjugal condition		Death associated with		
		Medical attendance	No medical attendance	(4) Married	Unmarried	Living birth	Stillbirth	No birth
Prince Edward Island	8	8	–	8	–	(1) 3	1	4

MORTALITY (ALL CAUSES)

The total number of deaths, all ages, reported in the nine provinces of Canada for the year 1926, was 107,454 in an estimated population of 9,378,000, giving a crude death rate of 11.5 per 1,000 population. The differences between provinces in the crude death rates are, of course, not necessarily the result of better health conditions or a more virile stock in one province than in another, but are largely influenced by the age composition of the respective populations. As in births and infant and maternal mortality, comparisons with past years are limited to the eight provinces forming the Registration Area as of 1921. The rate for this area in 1926, 10.3 per 1,000 of population, was lower than in the years 1921-23, but compared with a rate of 9.9 in 1924 and 1925. Table XXXVIII gives the total number of deaths and the rates by provinces for 1926, as well as the corresponding figures for the years 1921-25 for the provinces comprising the Registration Area as of 1921. For the provinces for which comparisons with past years are made, the rates for 1926 showed an increase over 1925 in Nova Scotia, Ontario, Saskatchewan, Alberta and British Columbia, while New Brunswick and Manitoba recorded no change and Prince Edward Island registered a decline in the death rate.

TABLE XXXVIII.—TOTAL DEATHS (EXCLUSIVE OF STILLBIRTHS) AND CRUDE DEATH RATES PER 1,000 POPULATION BY PROVINCES, 1921-26

Year	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	Canada [1]	Registration Area as of 1921 [2]

Italy	1925	16·8			

[1] See note 1, table I.

Age Distribution of Decedents.—The quartile and decile ages of decedents are given for each sex and for the two combined in Table XL. For an explanation of these terms the reader is referred to page xv in connection with the age distribution of parents of children born alive in 1926.

It will be noted that the first three decile ages for males are markedly lower than those for females, the fourth lower by about four years and the fifth very nearly coincident.

DEATHS UNDER EACH AGE IN CANADA
1926
100000
75000
50000
25000
0
3rd Quartile 70.70 yrs
Median Age 45.50 yrs
1st Quartile 1.83 yrs
0 1 2 3 4
UNDER 5 - 10 - 20 - 30 - 40 - 50 - 60 - 70 - 80 - 90 - 100 - 110
YEARS

From that point on the male decile points are again lower. The narrower interval for females between the fourth and fifth decile reflects the influence of deaths from puerperal causes; the lower age-level of all deciles for males than for females is due to heavier male death rates throughout the greater period of life, and exists in spite of a larger proportion of male population over 30 years of age, as a result of immigration.

TABLE XL.—QUARTILE AND DECILE AGES OF DECEDENTS BY SEX, 1926

Position in array by age		Both sexes	Male	Female
First quartile	Years of age	1·83	1·34	2·85
Second "	"	45·50	45·16	45·89
Third "	"	70·70	70·05	71·51
First decile	Months of age	0·88	0·60	1·43
Second "	"	8·56	6·60	11·74
Third "	Years of age	6·95	4·30	12·15
Fourth "	"	28·77	26·47	30·61
Fifth "	"	45·50	45·16	45·89
Sixth "	"	58·40	57·73	59·13
Seventh "	"	67·15	66·44	68·00
Eighth "	"	74·05	73·28	74·00
Ninth "	"	80·82	79·89	81·85

Table XLI shows the absolute and proportional distribution of deaths in 1926, male, female and both sexes, by age groups, and in conjunction with this the absolute and proportional distribution of the population according to the Census of 1921 by the same age groups. The purpose is that, in so far as the age-distribution of population in 1921 continues to represent conditions in 1926, the proportion of all deaths contributed by any age group may be compared with the proportion of the total population contributed by the same group. It must be pointed out, however, speaking in terms of a percentage distribution, that the population of a country which in the recent past has had heavy immigration shows a steady infiltration from the middle adult ages into the more advanced groups, unless the tide of immigration is maintained at an increasing pace. Disregarding for the moment any inaccuracy of the comparison due to this tendency, it may be noted that the first year of life, which contained only 2.3 per cent of the population in 1921, contributed 22.1 per cent of the deaths of 1926; that the age group under 5 years, with 11.5 per cent of the population, provided 28.9 per cent of deaths, and that the sum of the groups 65 years of age and over, with only 4.8 per cent of the population. accounted for 32.9 per cent of the deaths.

TABLE XLI.—NUMERICAL AND PER CENT DISTRIBUTION OF DEATHS IN CANADA[1], BY CERTAIN AGE GROUPS, 1926, TOGETHER WITH NUMERICAL AND PER CENT DISTRIBUTION OF THE POPULATION BY THE SAME AGE GROUPS, CENSUS OF 1921

Age groups	Numerical distribution						Per cent distribution

See note 1, table I.

Table XLII shows in broad age-groups for the Registration Area as of 1921 the percentage distribution of deaths by ages from 1921 to 1926. It will be perceived that the proportion of deaths under one year of age to the total mortality has decreased year by year since 1921. This is partially due to the fact that each year, with the exception of 1924, showed a smaller number of births than the preceding year. The substantial lowering of the infant mortality rate in 1924 was another factor in reducing the proportion of deaths under one year. The infant mortality rate for 1926, as already seen, was slightly higher than for 1924 or 1925, but the general mortality increased in greater proportion.

There is also a downward trend in the proportion of deaths between the first and twentieth birthdays and between the twentieth and fortieth birthdays, while the two oldest groups show a higher proportion year by year. Omitting from consideration the changing proportions under one year of age and considering the remaining deaths in two groups: namely, between the first and fortieth birthdays and over the fortieth birthday, the deaths in the latter group were 196 per cent of the former in 1921, 216 per cent in 1922, 233 per cent in 1923, 239 per cent in 1924, 258 per cent in 1925 and 266 per cent in 1926. It is an interesting question, but one which cannot be answered until the Census of 1931, to what extent this shifting proportion of deaths is due to the changing age composition and to what extent it results from the change in proportion between the death rates for the two groups.

TABLE XLII.—PER CENT DISTRIBUTION OF DEATHS BY BROAD AGE GROUPS IN THE REGISTRATION AREA AS OF 1921 DURING THE YEARS, 1921-26

Age groups	1921	1922	1923	1924	1925	1926

Deaths of Centenarians.—There were 91 deaths of reputed centenarians during the year 1926, comprising 34 male deaths and 57 female deaths. In Table XLIII these deaths are presented by provinces and by single years of age. It is, of course, impossible to vouch for the authenticity of the ages reported.

TABLE XLIII.—DEATHS OF CENTENARIANS BY PROVINCES, 1926

(1) See note 1, table I.

Death Rates by Months.—Table XLIV presents monthly death rates by provinces for the years 1921-26. The figures for Quebec and for the total of the nine provinces of Canada are necessarily limited to the year 1926, but the comparison has been carried back for the Registration Area as of 1921 as well as for the individual provinces which comprised this unit.

For Canada as a whole in 1926 the month of April, with an equivalent annual rate of 15.1 per 1,000 population, showed the highest mortality and March was second in this respect with a rate of 13.0. Influenza and pneumonia contributed in an important manner to the rates for these two months.

TABLE XLIV.—DEATH RATES (CRUDE) PER 1,000 POPULATION IN EACH PROVINCE BY MONTHS, 1921-26

Province		Annual rates	Equivalent annual death rates											
			Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

(1) See not 1, table I.

In the Registration Area as of 1921, the figure for April in 1926 stands out very conspicuously in comparison with the same month in previous years. May and June also show heavier rates in 1926 than in any of the other years listed. On the other hand, January and February are low, although higher than the preceding year, while the period August-November, taken as a whole, is lower than in any of the other years.

Adjusted or Standardized Death Rates.—Crude death rates are to some extent affected by the sex and to a very great extent by the age distribution of the population. To eliminate the influences of these factors, "adjusted" or "standardized" death rates were computed in previous reports for the Registration Area and the provinces which it comprised for the years 1921-25. These rates were based on the sex and age composition of the population of England and Wales in 1901.

In the present report similar adjusted rates for the year 1926 are presented for the nine provinces of Canada as a whole and for each one individually. For Manitoba, Saskatchewan and Alberta the computation has been made on the basis of the Census of the Prairie Provinces, 1926, in the manner described on page XXXV of the Introduction to the Third Annual Report. For the Province of Quebec and for Canada as a whole (exclusive of the territories) adjusted rates are computed for the first time and the same method is used as for the Prairie Provinces, but with the assumption that sex and age distribution of the population has remained constant since the Census of 1921. For the remaining provinces it has been assumed that the adjusted rates in 1926 should bear the same proportion to the crude rates as in 1921. It will thus be seen that the adjusted rates for the Prairie Provinces are the only ones for which a high degree of accuracy can be claimed; nevertheless the rates for other provinces serve a valuable purpose in correcting, even if somewhat roughly, the inequalities in the crude rates due to differences in sex and age composition of the population.

TABLE XLV.—CRUDE AND ADJUSTED DEATH RATES BY PROVINCES, 1926

Province	Both sexes		Male		Female	
	Crude	Adjusted	Crude	Adjusted	Crude	Adjusted
Canada [1]	**11·5**	**11·1**	**11·8**	**11·6**	**11·1**	**10·7**
Prince Edward Island	10·3	7·8	10·3	7·9	10·4	7·8
Nova Scotia	11·8	9·9	12·3	10·5	11·3	9·4

Quebec	14·5	14·0	15·0	14·4	14·1	13·7
Ontario	11·4	10·4	11·8	10·9	11·0	9·9
Manitoba	8·3	9·0	8·8	9·4	7·8	8·7
Saskatchewan	7·4	8·5	7·6	8·7	7·1	8·3
Alberta	8·5	9·7	8·8	10·1	8·1	9·4
British Columbia	9·6	10·1	10·5	11·0	8·6	9·3

[1] See note 1, table I.

It is to be noted that the crude is an actual, the "adjusted", a hypothetical rate. The latter has no other than comparative value, and its absolute size, being partly dependent on the nature of the population chosen as a standard, possesses no particular significance. The age and sex composition of the population of England and Wales in 1901 was very favourable to low mortality, and although Canada, as a country with large immigration of persons under middle age within a recent period, is also favourably constituted in this respect, the rate for the country as a whole for the two sexes combined fell on adjustment from 11.5 to 11.1 per 1,000 of population.

The differences between crude and adjusted rates in Table XLV are dependent on the age and sex composition of the various populations. For provinces with populations more favourably constituted than the standard population the adjusted rates are higher than the crude rates. For provinces less favourably constituted the reverse is true.

The following statement shows a comparison of the adjusted death rates of Canada with those of England and Wales, the Registration States of the United States and the Union of South Africa.

ADJUSTED DEATH RATES, 1926

(On age and sex distribution of population of England and Wales, Census of 1901)

Country	Both sexes	Male	Female
Canada (1)	11·1	11·6	10·7
Registration States of United States (white population)	11·3	12·1	10·5
England and Wales	10·1	11·2	9·1
Union of South Africa (white population)	10·3	11·2	9·3

(1) See note 1, table I.

CAUSES OF DEATH

About 87 per cent of all deaths from specified causes recorded in the nine provinces of Canada in 1926 were due to the thirty causes of death listed by name in Table XLVI, which gives the number of deaths by provinces from each of these causes.

TABLE XLVI.—NUMBER OF DEATHS FROM CERTAIN CAUSES BY PROVINCES, 1926

(1) See note 1, table I.

Table XLVII is based on the absolute figures of Table XLVI, and gives the death rate per 100,000 of population from each cause by provinces in 1926.

Leading Causes of Death.—It will be observed from the figures of Table XLVII that for Canada as a whole, and indeed for every province, the heaviest death rate was from diseases of the heart (International List Nos. 87-90), considered as a single cause. This rate was 122 per 100,000 of population. Diseases of early infancy (Nos. 160-163) stood next in order with a rate of 106. Their prominence indicates the importance of infant mortality to the total number of deaths, but it may be pointed out that deaths of infants under three months at which no doctor was in attendance and for which no cause has been assigned are included in No. 162. Pneumonia (Nos. 100-101) stood third in order with a rate of 90 per 100,000 and cancer (Nos. 43-49) fourth with 81. Tuberculosis of the respiratory system (No. 31) showed a rate of 69 while other forms of tuberculosis (Nos. 32-37) were responsible for 15 deaths per 100,000 of population, so that if all forms of tuberculosis were taken together the rate would be 84 per 100,000, slightly greater than that of cancer.

TABLE XLVII.—DEATH RATES PER 100,000 POPULATION FROM CERTAIN CAUSES BY PROVINCES, 1926

(1) See note 1, table I.

Causes of Death for Indians.—Table XLVIII gives by provinces the absolute number of deaths of Indians in 1926 for the same list of causes as in the two preceding tables. The figures in Table XLVIII have been abstracted from Table "J" of Appendix I. The mortality from tuberculosis is very marked, while pneumonia and influenza exacted a heavy toll. Diseases of early infancy (Nos. 160-163) accounted for 148 deaths, but deaths of infants

under 3 months without medical attendance and with no assigned cause are included under this category. Amongst the communicable diseases measles and whooping-cough produced heavy mortality.

TABLE XLVIII.—NUMBER OF DEATHS OF INDIANS FROM CERTAIN CAUSES BY PROVINCES, 1926

(1) See note 1, table I.

Table XLIX shows rates per 100,000 of the Indian population based on the absolute number of deaths given by causes in Table XLVIII. The Indian population in 1926 for the compilation of these rates was obtained for the Prairie Provinces from the Census of that year. In all other provinces except Quebec it was calculated by adding to the number of that race enumerated in the Census of 1921 its natural increase for the years 1922-26 as shown in the Vital Statistics reports for those years. This data not being available for the Province of Quebec it was assumed that the natural increase in that province was proportionate to that of the Province of Ontario. As explained in Appendix I, the term "Indian" in this report is taken to include half-breeds.

The estimates of Indian population for 1926 by provinces are as follows:—

Canada (exclusive of territories)	105,098	Ontario	27,540
Prince Edward Island	230	Manitoba	13,216
Nova Scotia	2,137	Saskatchewan	13,001
New Brunswick	1,379	Alberta	13,227
Quebec	11,951	British Columbia	22,417

It must be understood that the statistics for Indians are not looked upon as having the same degree of completeness and accuracy as those for the remainder of the population.

(1) See note 1, table I.

Causes of Death for Population Exclusive of Indians.—Table L shows the number of deaths in the population exclusive of Indians by the selected list of causes, and Table LI the rates per 100,000 calculated on the estimate of population exclusive of Indians. This estimate has been obtained by subtracting from the population figures given in Table I, the estimates of Indian population used for the rates of Table XLIX.

The comparison of the figures of Table LI with those of Table XLIX shows that the elimination of Indians has no significant effect on the rates for Canada as a whole with the exception of the rate for tuberculosis of the respiratory system. This fact is due, of course, to the small proportion of Indians in the population. forming as they do little more than one per cent of the total population of the nine provinces. In the three westernmost provinces, however, Saskatchewan, Alberta and British Columbia, their removal not only lessens the rate for all forms of tuberculosis, but also materially, though in lesser degree, those of pneumonia and influenza, while in Alberta the rate for measles is reduced from 17 to 12 per 100,000 and that of whooping cough from 14 to 12 per 100,000. The reduction of the rate for senility from 15 to 9 in British Columbia owing to the exclusion of Indians is, of course, largely attributable to the better certification of deaths of the non-Indian population. It will be noted that the total death rates from all causes in the three provinces cited are also significantly lower when the influence of Indian deaths is removed, the figure for Saskatchewan falling from 738 to 714 per 100,000, that for Alberta from 849 to 798, and the British Columbia rate from 964 to 927.

	Total deaths	**1,057**	**1,061**	**1,067**	**994**	**987**	**1,030**

Communicable Diseases.—The combined mortality for Canada from the first five diseases listed in Table XLVI, typhoid fever, measles, scarlet fever, whooping-cough and diphtheria, was 3,875, giving a rate of 42 per 100,000 of population. Quebec stood at the head of the list of provinces with a rate of 69, followed by Alberta with 49 and Saskatchewan 48, while Nova Scotia and British Columbia were the lowest provinces, with rates of 19 per 100,000. High birth rate has a very important influence on the rate from these diseases.

For the eight provinces for which comparisons are carried back to 1921, the deaths from measles and whooping-cough show violent fluctuations from year to year, while diphtheria, scarlet fever and typhoid fever exhibit a pronounced downward trend over the period 1921-1926.

Deaths from influenza in the nine provinces of Canada numbered 5,174 in 1926, giving a rate of 55 per 100,000 of population. The rates by provinces ranged from 17 in Prince Edward Island to 81 in Quebec.

For the eight provinces of the Registration Area as of 1921, influenza showed a death rate of 45 per 100,000 in 1926, this rate being the highest of the period 1921-26 except for the year 1923. The seasonal incidence of mortality from influenza shows a considerable variation from year to year. In 1923 the month of February contributed 1,144 deaths and March 1,049 deaths out of a total year's mortality of 3,578, these two months thus accounting for nearly two-thirds of the deaths from influenza during that year. In 1926, on the other hand, 927 deaths out of 3,089 during the year occurred in the month of April, and May deaths exceeded those of any of the remaining months. The figures for the eight provinces by months are given in the following statement for the years 1921-26.

DEATHS FROM INFLUENZA BY MONTHS

(Absolute figures)

Month	Registration Area as of 1921						Canada[1]
	1921	1922	1923	1924	1925	1926	1926
January	85	193	298	107	192	210	332
February	154	291	1,144	152	271	243	374
March	154	640	1,049	191	426	423	671
April	143	583	517	210	381	927	1,668
May	84	235	203	162	258	472	826
June	47	91	78	80	116	170	279

October	54	54	54	77	106	102	164
November	64	83	50	85	104	114	193
December	63	105	63	138	137	213	341
Total	**940**	**2,400**	**3,578**	**1,306**	**2,182**	**3,089**	**5,174**

[1] See note 1, table I.

Tuberculosis.—Deaths from tuberculosis of the respiratory system in 1926 numbered 6,485 and deaths from other forms of tuberculosis 1,444, making a total of 7,929 or a rate of 85 per 100,000 of population. The rates by provinces varied from 47 in Saskatchewan to 128 in Quebec. It will be evident that the age distribution of the population has an important effect on the tuberculosis rate and that for a really significant comparison between provinces the effect of differences in this respect would require to be removed; nevertheless it is quite clear that an adjustment for this purpose would not bring the rate for Ontario up to those for Quebec and the Maritime Provinces.

For the eight provinces comprising the Registration Area as of 1921, the tuberculosis death rate for 1926 was 68 per 100,000, almost identical with that of the previous year. Over the period 1921-26 the rate shows a tendency to decline.

TUBERCULOSIS (Nos. 31-37)

(Death rates per 100,000 population)

Disseminated	2	2	2	2	2	2	2

(1) See note 1, table I. (2) Less than 1 per 100,000 population.

The death rate of Indians from tuberculosis is so heavy that it has been thought well to show it separately and remove its influence from the rate for the total population. This has been done in the statement which follows and which shows absolute figures and rates for the two sexes and for the various forms. The exclusion of Indians reduces the male rate for all forms of tuberculosis from 77 to 72 and the female rate from 92 to 87.

DEATHS FROM TUBERCULOSIS AMONGST THE INDIAN AND NON-INDIAN POPULATION, 1926

(Absolute figures and rates per 100,000 inhabitants)

Cancer.—In the nine provinces of Canada cancer was given as the cause of death in 7,614 cases in 1926, a rate of 81 per 100,000 of population. Here again the age distribution of the population plays a very important part in affecting the rates of the different provinces. These rates varied from 47 in Saskatchewan to 99 in Ontario.

The cancer rate for the Registration Area as of 1921 evinces an upward trend over the period 1921-26. It is, however, unsafe to draw conclusions from so short a period. Moreover, the possible effects of improving diagnosis must be considered in this connection, while it is probable that in a country like Canada, a larger proportion of the population is coming year by year within the cancer age.

CANCER (Nos. 43-49)

(Death rate per 100,000 population)

Province	1921	1922	1923	1924	1925	1926
Prince Edward Island	87	97	94	101	100	83

Canada (1)	.....	.....	.....	.....	.....	**81**
Registration Area as of 1921	75	79	78	83	82	85

(1) See note 1, table I.

Cancer death rates by sites for each sex are given in the statement which follows. The rates cover the nine provinces of Canada for the year 1926 and the Registration Area as of 1921 for the period 1921-26. Female cancer rates are heavier than male throughout. In the yearly comparison for the Registration Area as of 1921 it will be noted that the rates from cancer of "other or unspecified organs" show a marked downward tendency for females from 1921 to 1925. It may be presumed that the decrease is largely in the cancer of "unspecified organs" and so far as these are concerned results from better certification. The practice of returning defective certificates for more specific information naturally tends to produce greater exactitude on the part of the doctors certifying. Granted that the decrease is mainly in the "unspecified" and not in the "other" organs it must have resulted in additions to some or all of the specified sites. This should be kept in mind when making comparisons for particular sites.

CANCER DEATH RATES BY SITES

(Per 100,000 population)

Site of Cancer	Registration Area as of 1921						Canada(1)
	1921	1922	1923	1924	1925	1926	1926

(1) See note 1, table I.

Diseases of the Heart.—Deaths in Canada from diseases of the heart (Int. List Nos. 87-90) numbered 11,415 in 1926, giving a rate of 122 per 100,000 of population. The rates by provinces varied from 61 in Saskatchewan to 163 in Ontario. The low rates for the Prairie Provinces are largely owing to the small proportion of persons past middle life in those provinces.

Yearly comparisons shown for the Registration Area as of 1921 reveal a marked upward trend in the rate for diseases of the heart.

DISEASES OF THE HEART (Nos. 87-90)

(Death rate per 100,000 population)

Province	1921	1922	1923	1924	1925	1926

Registration Area as of 1921	94	102	114	108	113	125

(1) See note 1, table I.

Diseases of the Arteries.—The death rate for the nine provinces of Canada from diseases of the arteries (Int. List No. 91) in the year 1926 was 53 per 100,000. For the eight provinces comprising the Registration Area as of 1921 the rate was 59, the highest shown in any year of the period 1921-26. Over this period deaths from diseases of the arteries showed a pronounced upward movement, which brought the rate from 40 per 100,000 in 1921 to the figure already noted in 1926.

Bronchitis.—The death rate in Canada from bronchitis in 1926 was 6 per 100,000 of population. For the eight provinces for which comparison with past years are made the rate was also 6. This figure was identical with the rate for 1925, slightly lower than that for 1924 and showed a large reduction from the rates for the years 1921-23.

Pneumonia.—Deaths from pneumonia (Int. List Nos. 100-101), which includes broncho-pneumonia and capillary bronchitis numbered 8,427 in 1926, giving a rate of 90 per 100,000 of population. The rates by provinces varied from 60 per 100,000 in British Columbia to 106 per 100,000 in New Brunswick. Owing to the heavy mortality amongst young infants from pneumonia the birth rate has an important influence on the death rate from pneumonia. British Columbia has the lowest birth rate of all Canadian provinces, while the birth rate of New Brunswick is exceeded only by that of Quebec.

For the Registration Area as of 1921 the pneumonia rate for 1926 compared unfavourably with the two years next preceding, but showed a substantial reduction from the rates for the years 1921-23.

PNEUMONIA (Nos. 100 and 101)

(Death rates per 100,000 population)

Province	1921	1922	1923	1924	1925	1926
Prince Edward Island	109	121	155	93	80	87
Nova Scotia	96	126	127	96	96	99
New Brunswick	132	123	114	89	112	106
Quebec	.....	.....	.....	.....	.....	103

Registration Area as of 1921	93	98	95	75	76	85

(1) See note 1, table I.

Diarrhoea and Enteritis.—Deaths from these causes numbered 5,445 in 1926 and the death rate was 58 per 100,000. The rates by provinces varied from only 10 in British Columbia to 147 in Quebec, the latter rate being very much higher than that of any other province. A heavy birth rate and heavy mortality amongst infants from these causes are the main determining factors in producing this outstanding figure.

For the eight provinces comprising the Registration Area as of 1921 the death rate from diarrhoea and enteritis was reduced from 50 per 100,000 in 1921 to 25 per 100,000 in 1926, every year showing a decrease from the preceding year. In the following statement these rates are presented together with that of Canada for 1926 and the absolute figures are divided into the deaths under two years of age and those at two years and over. The latter form a somewhat small proportion of the total figures and the remarkable reduction already noted in the Registration Area as of 1921 is mainly due to the decrease in deaths from diarrhoea and enteritis at ages under two years. To some extent this decrease in the death rate from diarrhoea and enteritis was helped by a falling birth rate.

DIARRHOEA AND ENTERITIS

		Under two years	Two years and over	Total	Rate per 100,000 population
		No.	No.	No.	
Registration Area as of 1921	1921	2,695	523	3,218	50
	1922	2,440	403	2,843	44
	1923	1,696	365	2,061	31
	1924	1,555	336	1,891	28
	1925	1,787	411	2,198	33
	1926	1,399	280	1,679	25
Canada [1]	**1926**	**4,821**	**624**	**5,445**	**58**

[1] See note 1, table I.

Nephritis.—Deaths from nephritis numbered 5,138 in 1926 giving a rate of 55 per 100,000. Rates by provinces varied from 23 in Saskatchewan to 79 in Quebec. For the Registration Area as of 1921 the rate was 46 per 100,000 in 1926. In this area nephritis has shown an increased rate year by year since 1922 when the figure stood at 32 per 100,000, a rate identical with that of the preceding year.

The increase is in chronic nephritis (including unspecified over 10 years of age), which far outweighed the deaths from the acute form in every year.

Violent Deaths—There were 680 suicides in the nine provinces of Canada in 1926, giving a rate of 7 per 100,000. The rates by provinces varied from 3 per 100,000 in Quebec and New Brunswick to 18 per 100,000 in British Columbia. For the eight provinces comprising the Registration Area as of 1921 the rate was 9 per 100,000, which was identical with that of the preceding year. Over the period 1921-26 the suicide rate for this area shows an upward tendency. Rates by sexes are given in the following statement:—

SUICIDES

(Death rate per 100,000 population)

Sex	Registration Area as of 1921						Canada [1]
	1921	1922	1923	1924	1925	1926	1926
Males	10	11	12	11	13	13	11
Females	3	4	4	4	4	4	3
Total	**7**	**7**	**8**	**8**	**9**	**9**	**7**

[1] See note 1, table I.

Violent deaths other than suicides numbered 5,189 in 1926 giving a rate of 55 per 100,000 population. The rate for the Registration Area was 57 per 100,000. Over the period 1921-26 the rate from violent deaths with the exception of suicide shows only slight fluctuations without any evidence of trend.

Homicides, in which justifiable homicides are included, numbered 126 in the year 1926.

The number of deaths from automobile accidents is shown by provinces in the statement given hereunder. For the eight provinces comprising the Registration Area as of 1921 the figures go back to that year. In the system of classification followed, deaths from collision of an automobile with a train, street car or other vehicle are attributed to the automobile.

The statement shows 606 deaths in Canada from automobile accidents in the year 1926. Of these deaths 423 occurred in the eight provinces for which comparisons are carried back. It will be noted that with the exception of 1924 every year of the period 1921-26 showed a substantial increase over the preceding year in the number of deaths from automobile accidents.

DEATHS FROM AUTOMOBILE ACCIDENTS

(1) See note 1, table I.

Deaths from drowning in the nine provinces of Canada numbered 863 in the year 1926, 758 being deaths of males and 105 of females. For the Registration Area as of 1921 there were 532 male deaths and 74 female deaths. The absolute figures by sexes and certain age groups are shown in the statement which follows.

DEATHS FROM DROWNING

The Proportionate Distribution of Deaths by Sex and Age Groups by Causes.—Table LVI gives the proportion per 1,000 which deaths due to each of the causes listed formed of the total mortality of each sex and age group in 1926. The table furnishes some interesting data as to the factors which mainly contribute to the mortality of each sex at the different periods of life. The mortality under five years of age is heavily weighted by the deaths due to the diseases of early infancy (Int. List Nos. 160-163). These diseases accounted for about one-third of the male deaths and a somewhat smaller proportion of the female deaths occurring in this age group. Diarrhoea and enteritis (Nos. 113-114) and pneumonia (Nos. 100-101) also contributed heavily to the total mortality during this period.

In the age group 5-14 years, deaths as a result of accidents (Int. List Nos. 175-203) in which also a few homicides are included, contributed about one-fifth of the male deaths from specified causes. The proportion for females was less than one-half of that for males. Tuberculosis in all forms stood next to accidents as a cause of death for males in this group, accounting for more than one-ninth of the total deaths. For females it was the chief cause, contributing more than one-sixth of the female deaths from specified causes. Other important causes for males and females at this period of life were diphtheria, appendicitis and pneumonia.

In the age group 15-29 years, tuberculosis in all its forms was the leading cause of death for both sexes. It contributed more than 27 per cent of the male deaths, and more than 41 per cent of the female deaths within these limits. Violent deaths (suicides excepted) were also a very important factor in the male mortality, accounting for 23.4 per cent of all deaths from specified causes. For females they were relatively of much less importance. Puerperal causes were assigned for some 13 per cent of female deaths at these ages.

TABLE LVI.—PROPORTION OF DEATHS FROM CERTAIN CAUSES PER 1,000 DEATHS FROM ALL SPECIFIED CAUSES BY SEX AND AGE GROUPS, 1926

Int. list No.	Causes of death	Under 5 years		5-14 years		15-29 years		30-49 years		50 years and over

(1) Less than 0·1 per 1,000 deaths.

In the age group 30-49 years, the distribution of male deaths gave less prominence to any particular cause, though deaths from tuberculosis and those from violence were most

important, accounting respectively for about 19 and 16 per cent of deaths for which the cause was specified. Over nine per cent of male deaths at this period were ascribed to diseases of the heart and nearly 7 per cent to each of pneumonia and cancer. Suicides played a more important part than at the other periods listed, 3.6 per cent of male deaths between the 30th and 50th birthday being self-inflicted. For females in the age group 30-49 years tuberculosis had the highest proportion of deaths, contributing almost 18 per cent of the total. Cancer accounted for 12.3 per cent and puerperal causes for 11.3 per cent. With regard to these two last named causes, the age group is too wide to have full significance. Between the 30th and 40th birthday puerperal causes were assigned for 18.0 and cancer for only 7.4 per cent of all deaths from specified causes; between the fortieth and fiftieth birthdays the proportion for puerperal causes was only 5.1 per cent while that of cancer rose to 16.8 per cent.

Diseases of the heart formed the most important cause of death for both sexes after the 50th birthday, accounting for about 19 per cent of the total for each sex. Cancer, nephritis, pneumonia and cerebral haemorrhage all contributed in an important way to the mortality of this age-group.

Proportionate Distribution by Age Groups of Deaths from Certain Causes.—Table LVII shows for 1926 the proportionate distribution of male and female deaths from certain specified causes by the same age groups as those in Table LVI. Those diseases included in the preceding tables whose titles indicate the class by age which is affected have been omitted from the list of causes in Table LVII.

TABLE LVII.—PROPORTION OF MALE AND FEMALE DEATHS IN EACH AGE GROUP PER 1,000 DEATHS AT ALL AGES FROM CERTAIN CAUSES, 1926

MARRIAGES

The total number of marriages reported for the nine provinces of Canada in 1926 was 66,658, giving a rate of 7.1 per 1,000 of population. The highest rate for a province was 7.8 per 1.000 in British Columbia, followed by Ontario with 7.5 per 1,000. The lowest rate was 5.3 per 1,000 in Prince Edward Island and Nova Scotia. The crude marriage rates are, of course, considerably affected by the age and sex composition of the population.

For the Registration Area as of 1921, the absolute number of marriages in 1926 showed an increase of 1,614 over the preceding year, though the number of marriages in 1926 was smaller than in 1923 or 1921. On account of the estimated increase in population from year to year the rate in 1926 shows somewhat more unfavourably than the absolute figures, nevertheless it amounted to 7.2 per 1,000 as compared with 7.0 per 1,000 in the preceding year.

The absolute figures and rates upon which this comparison is based are found in Table LVIII.

TABLE LVIII.—TOTAL MARRIAGES AND CRUDE MARRIAGE RATES PER 1,000 POPULATION BY PROVINCES, 1921-26

Year	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	**Canada** (1)	Registration Area as of 1921 (2)

(1) See note 1, table I.

Marriages by Months.—The marriage rates by months from 1921 to 1926 are shown by provinces in Table LX. For the province of Quebec and for the total of the nine provinces only the rates for 1926 can be given. The rates are equivalent annual rates: that is to say, the number of marriages in a month is multiplied by 365 and divided by the number of days in the month before the computation on the basis of population is made.

For the nine provinces as a whole in 1926, June with a rate of 11.4 marriages per 1,000 population was easily the favourite month, September with 9.9 per 1,000 occupying second place. The month of March had a marriage rate of only 3.8 per 1,000 and stood at the foot of the list.

TABLE LX.—MARRIAGE RATES PER 1,000 POPULATION IN EACH PROVINCE BY MONTHS, 1921-26

Province		Annual rates	Equivalent annual marriage rates											
			Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

(1) See note 1, table I.

For the Registration Area as of 1921 the selection of June as the favourite month was almost as pronounced and the same remark applies to September as the second month of choice. On the other hand, the unpopularity of March as a month for weddings was not

quite so marked, the rate being 4.6 per 1,000. The low figure for March is, of course, largely due to the observance of Lent and this is naturally much more in evidence with the inclusion of Quebec, a province in which the great majority of the population is Roman Catholic.

Consideration of the provinces one by one shows some pronounced differences in the choice of wedding months. In Saskatchewan and Alberta, for instance, the necessity of conducting seeding operations in the month of May militates very strongly against the marriage rate for that month and makes it almost invariably the lowest of the year in both provinces.

Prince Edward Island also had its lowest number of marriages in the month of May in 1926 as in the preceding year, but in 1922, 1923 and 1924 March and April were lower than May. In this province, where agriculture and fishing are the two chief industries, the last half of the year shows a much higher marriage rate than the first half.

The figures for the Registration Area as of 1921 show a high degree of consistency for the six years listed. Probably the most notable exception to this is in the rate for March, 1921, which was 6.9 per 1,000, a figure little lower than that for April and slightly higher than February. The latter fact is largely explained by the early incidence of Lent in that year. Of all months in the six years listed, the highest rate was that of June, 1921, standing at 13.1 per 1,000, the lowest that of March, 1925, only 4.2 per 1,000.

Conjugal Condition of Contracting Parties.—Of each 1,000 bridegrooms in 1926 there were 904 bachelors, 89 widowers and 7 divorced men while of each 1,000 brides there were 929 spinsters, 63 widows and 8 divorced women.

The proportional distribution of marriages in 1926 according to the conjugal condition of each contracting party is shown in Table LXI. Marriages between persons, one or both of whom were divorced, have been omitted from consideration in this table, as they form only 1.4 per cent of the total number of marriages reported in the year.

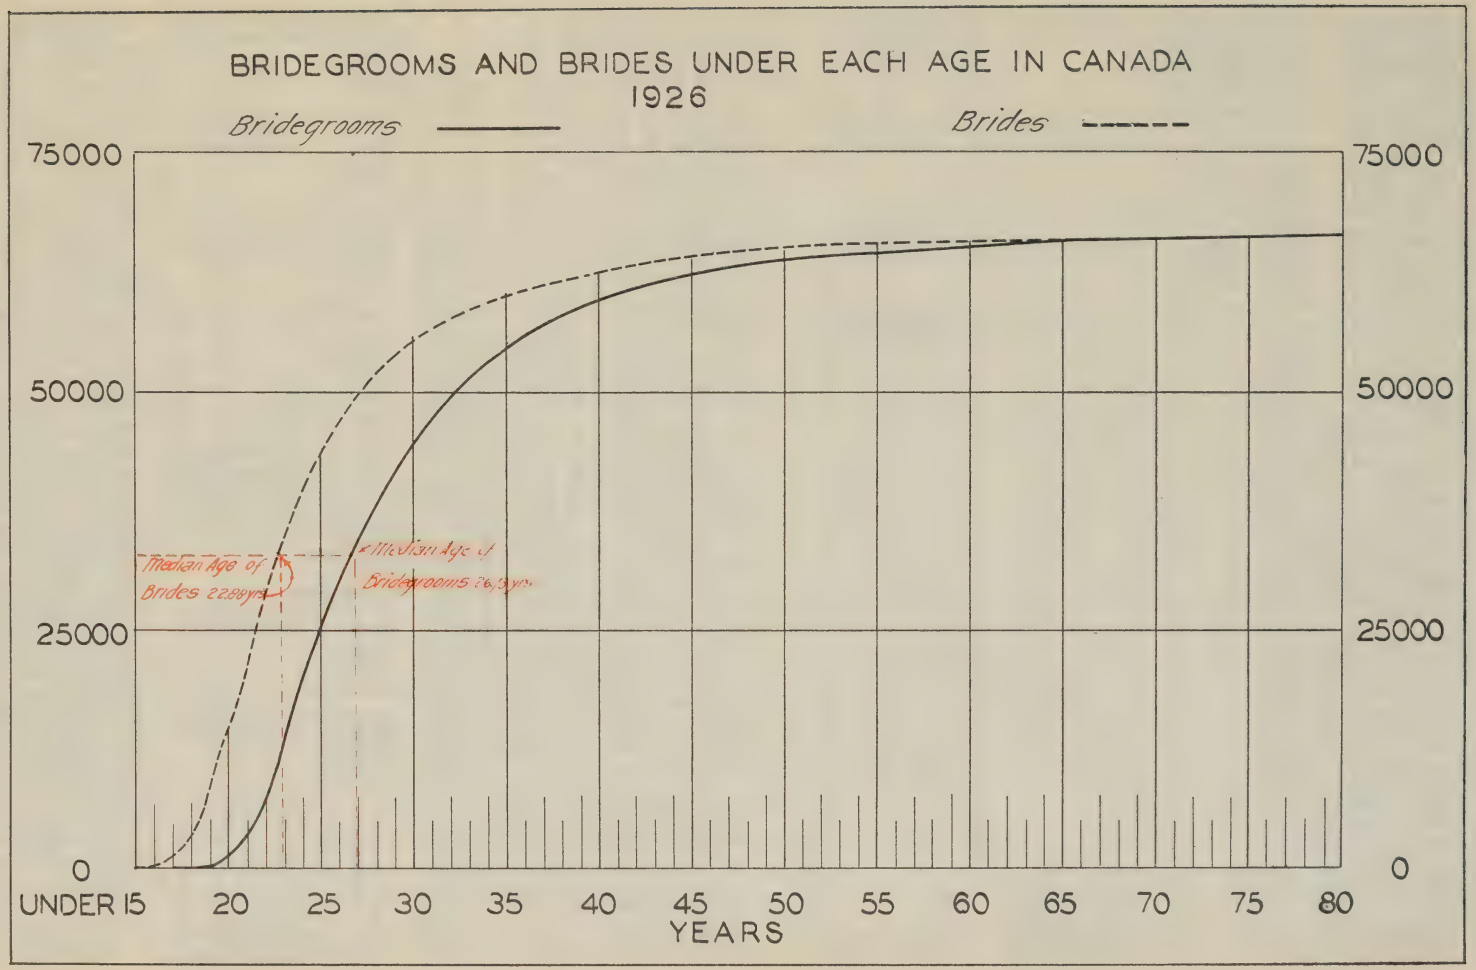

TABLE LXI.—PROPORTIONAL DISTRIBUTION OF MARRIAGES ACCORDING TO CONJUGAL CONDITION OF CONTRACTING PARTIES, EXCLUSIVE OF DIVORCED PERSONS, BY PROVINCES, 1926

Province	Total	Bachelors and		Widowers and

Age of Marriage.—The average ages of bridegrooms and brides in 1926 are listed by provinces in Table LXII, and comparisons with previous years are shown for the Registration Area as of 1921.

The average age of bridegrooms in 1926 was 29.3 years and the average age of brides 25.1 years, the average excess of the groom's age being 4.2 years.

YEARS

For the Registration Area as of 1921 the average age of bridegrooms was 29.6 years and that of brides 25.1 years in 1926, giving an average excess of 4.5 years in the age of the groom. It will be seen that the exclusion of Quebec increased the average age of grooms by about 0.3 of a year but left the average age of brides unchanged. During the years 1921 to 1926 there appears to be in the Registration Area as of 1921 a slight downward trend in the average age of grooms and brides.

TABLE LXII.—AVERAGE AGE OF CONTRACTING PARTIES, 1926

Province		Average age of grooms	Average age of brides	Average excess of groom's age over bride's

	1924	29·7	25·2	4·5
	1925	29·8	25·3	4·5
	1926	29·6	25·1	4·5

(1) See note 1, table I.

In Table LXIII marriages have been grouped, first by age of bridegroom and secondly by age of bride. It may be noted that when the contracting parties are grouped by the age of bridegrooms, the average difference in age is lower for the younger groups than for the older, being only 1.5 years for grooms from 20 to 24 years of age and 9.7 years for grooms from 45 to 49 years of age. This is easily understood when it is considered that the groom's age is generally in excess of the bride's, and therefore as his age increases the range of reasonably possible ages for the bride widens. When the parties are grouped by the age of the bride less regularity is observed. The greatest excess for a bridegroom's age is shown for brides under 20 years, those from 20-24 years stand next in this respect and the remaining age groups have a smaller average excess of the bridegroom's age.

TABLE LXIII.—RELATION BETWEEN AGES OF BRIDEGROOMS AND OF BRIDES, 1926

Average age of bride by age group of bridegroom				Average age of bridegroom by age group of bride			
Age group of bridegroom	Average age of bridegroom	Average age of bride	Average excess of bridegroom's age	Age group of bride	Average age of bride	Average age of bridegroom	Average excess of bridegroom's age

50 years and over	59·3	48·4	10·9	50 years and over	58·2	60·4	2·2

The percentage distribution of bridegrooms and brides of 1926 into six age groups is shown by provinces in Table LXIV. The largest percentage of bridegrooms under 20 years was 3.8 in New Brunswick and the smallest 1.1 in Prince Edward Island. British Columbia had the largest proportion of bridegrooms at ages 40 years and over, with 17 per cent in this age group; Prince Edward Island followed with 15.3 per cent. Quebec had the lowest proportion of bridegrooms at this age, the figure being only 9.1 per cent.

With brides as with grooms, New Brunswick led in the proportion under 20 years, this proportion, 31.8 per cent, being naturally very much larger than in the case of bridegrooms. Saskatchewan followed very closely, while at the other extreme, British Columbia had the lowest proportion under 20, with 16 per cent of its brides in this age category. The percentage of brides at 40 years and over was much smaller than that of grooms. Prince Edward Island and British Columbia showed the highest figures for this age group; the former, with 8.1 per cent of brides who had attained the 40th birthday, slightly exceeded the latter. Saskatchewan had only 4.1 per cent of its brides past the 40th birthday, a smaller figure than that of any other province. New Brunswick, in spite of its high proportion of brides under 20 years, was not conspicuously low in the age-group 40 years and over, having 5.3 per cent in this age-group.

TABLE LXIV.—PER CENT DISTRIBUTION OF MARRIAGES BY AGES OF BRIDEGROOMS AND OF BRIDES, BY PROVINCES, 1926

Province	Ages of bridegrooms							Ages of brides

(1) See note 1, table I.

The proportionate distribution of bridegrooms and brides according to age in similar manner to that of Table LXIV is presented in Table LXV for the years 1921-26 for the total of the eight provinces comprising the Registration Area as of 1921. The table shows a considerable degree of consistency over these years, with evidence of a perceptible though slight trend to an increase in the proportion of brides and grooms under 25 years of age.

TABLE LXV.—PER CENT DISTRIBUTION OF MARRIAGES BY AGES OF BRIDEGROOMS AND OF BRIDES IN THE REGISTRATION AREA AS OF 1921, DURING THE YEARS 1921-26

Years	Ages of bridegrooms							Ages of brides						
	All stated ages	Under 20 years	20-24 years	25-29 years	30-34 years	35-39 years	40 years and over	All stated ages	Under 20 years	20-24 years	25-29 years	30-34 years	35-39 years	40 years and over
1921	100·0	1·9	30·4	31·3	16·3	8·9	11·2	100·0	21·9	39·0	20·0	8·7	4·6	5·8

Marriages at Early Ages.—All of the provinces of Canada have enacted legislation fixing a minimum age for marriages, at least without the consent of parents. The provisions of the laws governing this question in the various provinces were summarized in the Third Annual Report (p. XLIV of Introduction).

Marriages in which the bride was 16 years of age or under numbered 1,329 in the nine provinces of Canada in the year 1926, thus amounting to 2 per cent of all marriages. Of these brides, 1,037 had passed the 16th birthday, 244 were 15 years of age, 46 were 14 years and 2 were only 13 years old. It is, of course, possible that there was some exaggeration of age in the case of very young brides, nevertheless the figures in Table LXVI indicate that marriages of very youthful brides are infrequent throughout Canada.

TABLE LXVI.—BRIDES OF 16 YEARS OF AGE AND UNDER, 1926

| Ages of grooms | Ages of brides by provinces | | |

in British Columbia. As might be expected, the western provinces showed a much smaller proportion of contracting parties born in Canada than was the case in the eastern provinces.

VITAL STATISTICS OF YUKON AND THE NORTHWEST TERRITORIES

The births deaths and marriages reported for the Yukon and the Northwest Territories of Canada for the year 1926 are listed in the following tables. The statistics of these territories are presented separately from those for the provinces because (1) the figures are not regarded as complete and the population for the year under review is not known with sufficient accuracy to warrant the calculation of rates, (2) the number of births, deaths and marriages is so small as to make no material difference to the total for Canada, (3) the various headings of classification used for the births, deaths and marriages of the eight provinces could not be applied to these returns, owing to lack of information.

TABLE DES MATIÈRES

PAGE

Préface lxxi

INTRODUCTION

Résumé général—
- Population par provinces lxxiii
- Nombre de naissances, décès et mariages lxxiii
- Accroissement naturel lxxiv

Naissances—
- Taux de la natalité lxxv
- Masculinité lxxv
- Taux de la natalité dans d'autres pays lxxvii
- Naissances par mois lxxvii
- Âges des pères et mères lxxviii
- Lieu de naissance des parents lxxix
- Origine raciale des pères et mères lxxxi
- Enfants illégitimes lxxxi

Mort-nés—
- Mort-nés selon l'âge de la mère, leur légitimité ou leur illégitimité lxxxiii
- Mort-nés, par mois, provinces et sexes lxxxiv

Mortalité infantile—
- Mortalité infantile, par sexe lxxxv
- Année de naissance et âge au décès lxxxvi
- Mortalité infantile en d'autres pays lxxxvii
- Mortalité infantile par mois lxxxvii
- Mortalité infantile, par trimestre xc
- Mortalité infantile, par causes xc
- Proportion de certaines causes, par sexes xcii
- Causes de mortalité infantile, par période d'âges xciii
- Mortalité infantile, par villes xciii

Mortalité puerpérale—
- Mortalité puerpérale par groupes d'âges et par provinces xcv
- Décès de causes puerpérales, classifiés selon les soins médicaux reçus, l'état conjugal et le fruit de l'accouchement xcvi
- Mortalité puerpérale, par causes de décès xcvi
- Décès non attribués directement à la grossesse ni à l'accouchement, mais qui y sont associés, 1926 xcvii

Mortalité générale—
- Taux brut de la mortalité, par groupes d'âges et par provinces xcviii
- Taux brut de la mortalité dans d'autres pays xcviii
- Répartition des décès selon les âges xcviii
- Décès de centenaires ci
- Mortalité par mois cii
- Taux ajustés ou standardisés de la mortalité ciii

Causes de décès—
- Causes spécifiées de décès, par provinces civ
- Causes de décès chez les Indiens cv
- Causes de décès de la population, sans compter les Indiens cvii
- Causes de décès dans le territoire d'enregistrement de 1921 cix
- Maladies contagieuses cx
- Tuberculose cxi
- Cancer cxiii
- Affections du cœur cxiv
- Affections des artères cxiv
- Bronchite cxiv
- Pneumonie cxiv
- Diarrhée et entérite cxv
- Néphrite cxv
- Morts violentes cxv
- Proportions de décès dus à certaines causes, par provinces cxvii
- Répartition proportionnelle des décès, par sexe et groupe d'âges selon leur cause .. cxviii

PAGE

Mariages—

Nombres absolus et taux bruts des mariages, par provinces cxx
Taux de la nuptialité en d'autres pays cxx
Répartition mensuelle des mariages cxxi
État civil des conjoints cxxii
Âge des conjoints cxxii
Mariages précoces cxxv
Lieu de naissance des conjoints cxxvi

Statistiques Vitales du Yukon et des Territoires du Nord-Ouest cxxvii

TABLEAUX D'ENSEMBLE

Résumé général—

TABLEAU 1.—Résumé général des naissances, décès et mariages dans le Canada par provinces et comtés ou divisions de recensement, 1926 ... 3
TABLEAU 2.—Résumé général des naissances, décès et mariages dans les cités et villes de 1,000 habitants et au-dessus, 1926 6

Naissances—

TABLEAU 3.—Naissances multiples classifiées selon les enfants vivants et les mort-nés, par sexe et par provinces, 1926 12
TABLEAU 4.—Naissances (mort-nés exclus) dans chaque mois, classifiées en rurales et urbaines, par provinces, 1926 13
TABLEAU 5.—Total des naissances (mort-nés exclus) et naissances dans les institutions publiques, attribuées aux mères non domiciliées dans la province, 1926 13
TABLEAU 6.—Naissances (mort-nés exclus) classifiées selon le domicile des mères, et naissances dans les institutions publiques, dans les cités et villes de 5,000 âmes et plus, 1926 14
TABLEAU 7.—Naissances (mort-nés exclus) classifiées comme légitimes ou illégitimes, par provinces, cités et villes de 5,000 habitants et plus, 1926 18
TABLEAU 8.—Naissances (mort-nés exclus) classifiées selon l'âge des parents, 1926 20
TABLEAU 9.—Naissances (mort-nés exclus) classifiées selon l'origine raciale des parents, 1926 40
TABLEAU 10.—Naissances (mort-nés exclus) classifiées selon l'âge et l'origine raciale des mères mariées, 1926 54
TABLEAU 11.—Naissances (mort-nés exclus) classifiées selon le lieu de naissance des parents, 1926 56
TABLEAU 12.—Naissances (mort-nés exclus) classifiées selon l'âge et le lieu de naissance des mères mariées, 1926 76

Mortalité infantile—

TABLEAU 13.—Décès des enfants de moins d'un an (mort-nés exclus) dans le Canada durant chaque mois, classifiés en ruraux et urbains, par provinces, 1926 81
TABLEAU 14.—Total des décès (mort-nés exclus) et décès dans les institutions publiques d'enfants de moins d'un an non domiciliés dans la province, 1926 81
TABLEAU 15.—Total des décès (mort-nés exclus) et décès dans les institutions publiques, des enfants de moins d'un an, classifiés selon le domicile, dans les cités et villes de 5,000 âmes et plus, 1926 .. 82
TABLEAU 16.—Décès des enfants de moins d'un an (mort-nés exclus) selon l'âge au moment du décès, 1926 86
TABLEAU 17.—Décès—Enfants décédés dans leur première année d'existence (mort-nés exclus) classifiés selon l'origine raciale des décédés, 1926 87
TABLEAU 18.—Décès—Enfants décédés dans leur première année d'existence (mort-nés exclus) classifiés selon le lieu de naissance des parents, pour le Canada, 1926 88
TABLEAU 19.—Décès—Enfants décédés dans leur première année d'existence (mort-nés exclus), par certaines causes spécifiques et par mois, 1926 90
TABLEAU 20.—Décès—Enfants décédés dans leur première année d'existence (mort-nés exclus), par âge et par certaines causes spécifiques, 1926 106

Mortalité générale— PAGE

APPENDICES

Appendice I—Naissances et décès de la population Indienne..... 463
TABLEAU A.—Naissances d'Indiens (mort-nés exclus) par mois et provinces, 1926..... 465
TABLEAU B.—Naissances d'Indiens (mort-nés exclus) réparties en légitimes et illégitimes, 1926..... 465
TABLEAU C.—Naissances d'Indiens (mort-nés exclus) classifiées selon l'âge des parents, Canada, 1926..... 466
TABLEAU D.—Indiens mort-nés, selon l'âge de la mère, et distinction entre naissances légitimes et illégitimes, 1926..... 468
TABLEAU E.—Enfants indiens décédés dans leur première année (mort-nés exclus) par mois et provinces, 1926..... 468
TABLEAU F.—Enfants indiens décédés dans leur première année (mort-nés exclus) par âge au décès, 1926..... 469
TABLEAU G.—Décès d'enfants indiens dans leur première année d'existence (mort-nés exclus), par sexe et par certaines causes spécifiées, dans chaque province, 1926..... 470
TABLEAU H.—Total des décès d'Indiens (mort-nés exclus) par mois et provinces, 1926..... 472
TABLEAU I—Décès d'Indiens (mort-nés exclus) par âge au décès, 1926..... 473
TABLEAU J—Causes de décès d'Indiens, par sexe, dans chaque province, 1926.. 474
TABLEAU K—Causes de décès d'Indiens selon le sexe et l'âge, Canada, 1926..... 484

Appendice II—Cédule des divisions de recensement dans les provinces des prairies..... 501

Cartes montrant les divisions de recensement dans les provinces des prairies.

PRÉFACE

Le présent rapport annuel sur les Statistiques Vitales du Canada est le sixième de la série que publie le Bureau Fédéral de la Statistique sur des données obtenues en vertu d'ententes avec les départements provinciaux. Mais il est le premier rapport annuel donnant les statistiques vitales de toutes les provinces, parce que, l'entente qui n'était antérieurement souscrite que par les provinces de l'Ile du Prince-Edouard, de Nouvelle-Ecosse, de Nouveau-Brunswick, d'Ontario, de Manitoba, de Saskatchewan, d'Alberta et de Colombie Britannique, s'étend maintenant à la province de Québec depuis le 1er janvier 1926.

Le premier, le deuxième et le troisième rapports annuels donnent un aperçu complet de l'origine et du but de cette entente entre le Dominion et les provinces pour la compilation des statistiques vitales et décrivent les progrès de ces statistiques au Canada. L'enregistrement des naissances, décès et mariages est fait par les autorités provinciales, chaque province ayant décrété l'enregistrement obligatoire suivant des formules tendant à établir certaines informations sur des bases uniformes. Des copies de ces actes sont envoyées au Bureau Fédéral de la Statistique et leur compilation sert de base au rapport annuel. En 1926, le Bureau Fédéral de la Statistique, outre la préparation de ces tableaux, a publié des bulletins mensuels et un rapport annuel préliminaire. Il a de plus fourni aux provinces de Nouvelle-Ecosse, Nouveau-Brunswick, Ontario, Saskatchewan et Colombie Britannique les compilations dont elles avaient besoin pour leurs rapports respectifs.

Comme par le passé, on a fait entrer dans ce rapport les naissances, décès et mariages de la population indienne des provinces coopérant au présent rapport. La note sur les statistiques vitales des Territoires du Nord-Ouest et du Yukon, à la fin de l'introduction, est digne d'attention.

Le dépouillement des données et la préparation du rapport ont été faits sous la direction de M. E. S. Macphail, chef de la section de Démographie du Bureau, aidé par M. W. R. Tracey.

R. H. COATS,
Statisticien du Dominion

Bureau Fédéral de la Statistique, janvier 1928.

STATISTIQUES VITALES DU CANADA, 1926

INTRODUCTION

Ce rapport présente les statistiques des naissances, des décès et des mariages de l'année civile 1926, dans les neuf provinces du Canada, toutes coopérant avec le Bureau Fédéral de la Statistique à cet égard. Comme c'est la première année que la province de Québec fait partie de ce système national, les statistiques de cette province figurant dans le présent rapport sont limitées à l'année 1926 et les comparaisons rétroactives à 1921 n'embrassent que les huit autres provinces désignées sous le nom collectif de "Territoire d'enregistrement de 1921".

Les chiffres du territoire du Yukon et des territoires du Nord-Ouest ne sont pas compris avec ceux des provinces; les naissances, les décès et les mariages inscrits dans ces territoires au cours de 1926 sont donnés séparément à la fin de cette introduction. En raison de la population minime de ces territoires, leurs statistiques vitales n'affectent guère les totaux pour l'ensemble du Canada.

La population du Canada, par provinces, pour les années 1921-26, est donnée dans le tableau I. Afin de faciliter la computation des taux du Territoire d'enregistrement de 1921, un total distinct a été fait pour les huit provinces comprises dans ce territoire.

TABLEAU I.—POPULATION PAR PROVINCES, 1921-26

Année	Î.P.-É.	N.-É.	N.-B.	Qué.	Ont.	Man.	Sask.	Alta.	C.B.	**Canada** (1)	Territoire d'enregistrement de 1921 (2)
1921...	88,615	523,837	(3)387,876	2,361,199	2,933,662	610,118	757,510	588,454	524,582	**8,775,853**	(3) 6,414,654
1922...	88,000	528,000	392,000	2,400,000	2,981,000	616,000	771,000	592,000	539,000	**8,907,000**	6,507,000
1923...	88,000	530,000	396,000	2,439,000	3,019,000	621,000	783,000	596,000	544,000	**9,016,000**	6,577,000
1924...	88,000	534,000	399,000	2,480,000	3,062,000	627,000	797,000	599,000	553,000	**9,139,000**	6,659,000
1925...	87,000	537,000	403,000	2,520,000	3,103,000	633,000	810,000	603,000	561,000	**9,257,000**	6,737,000
1926...	87,000	540,000	407,000	2,562,000	3,146,000	639,000	821,000	608,000	568,000	**9,378,000**	6,816,000

(1)Le Yukon et les Territoires du Nord-Ouest, dont la population s'élevait à 12,145 en 1921, sont exclus de ce tableau
(2)Comprenant les provinces de l'Île du Prince-Édouard, de la Nouvelle-Écosse, du Nouveau-Brunswick, de l'Ontario du Manitoba, de la Saskatchewan, de l'Alberta et de la Colombie Britannique.
(3)Les statistiques du comté de Kent, Nouveau-Brunswick n'existent que depuis le 1er mai 1921. On a donc dû exclure pour cette année-là un tiers de la population de ce comté, réduisant ainsi la population du Nouveau Brunswick à 379,904 et celle du territoire d'enregistrement à 6,406,682.
La population de 1921, et celle de 1926 pour le Manitoba, la Saskatchewan et l'Alberta, sont celles des recensements; les chiffres des autres années sont estimatifs.

Le tableau II indique le nombre de naissances, de décès et de mariages enregistrés dans chaque province en l'année 1926. Il est établi une distinction entre la population rurale et la population urbaine, la population urbaine étant celle des cités et des villes d'au moins 1,000 âmes; partout ailleurs, la population est considérée comme rurale.

TABLEAU II.—NAISSANCES, DÉCÈS ET MARIAGES, PAR PROVINCES, 1926

Provinces	Naissances (2)	Décès (2)	Mariages	Provinces	Naissances (2)	Décès (2)	Mariages
Canada (1).....	**232,750**	**107,454**	**66,658**	Ontario.....	67,617	35,909	23,632
Ruraux.....	**118,925**	**49,062**	**22,495**	Ruraux.....	26,798	13,988	5,920

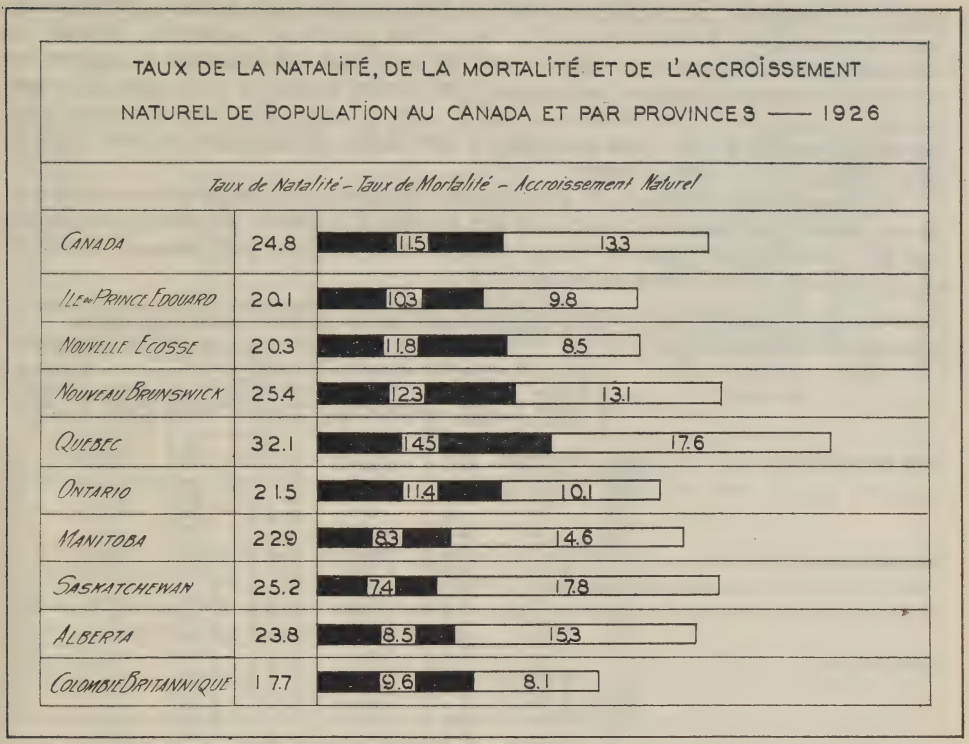
Nouveau-Brunswick.....	10,340	5,002	2,938	Alberta.....	14,456	5,159	4,503
Ruraux.....	7,065	3,203	1,433	Ruraux.....	8,456	2,737	1,441
Urbains.....	3,275	1,799	1,505	Urbains.....	6,000	2,422	3,062
Québec.....	82,165	37,251	17,827	Colombie Britannique	10,063	5,474	4,418
Ruraux.....	42,228	16,805	7,409	Ruraux.....	3,228	1,812	808
Urbains.....	39,937	20,446	10,418	Urbains.....	6,835	3,662	3,610

(1) Voir la note 1 au bas du tableau I. (2) Sans compter les mort-nés.
Note.—"Urbains", villes et cités de 1,000 âmes ou plus, au recensement de 1921.



Accroissement naturel.—L'accroissement naturel de la population des provinces par l'excédent des naissances sur les décès, en 1926, fut de 125,296 âmes. Au cours de l'année, on a constaté la naissance de 119,863 garçons et 112,887 filles, formant un total de 232,750 naissances pour les deux sexes. Durant la même période, les décès se sont élevés à 107,454, dont 56,979 chez la population masculine et 50,475 chez la population féminine. Par conséquent, la population masculine du Canada s'est accrue de 62,884 âmes et la population féminine de 62,412 âmes, par accroissement naturel, en 1926; l'accroissement de la population masculine fut donc supérieur de 472 unités à celui de la population féminine. L'accroissement naturel par 1,000 âmes, pour les deux sexes fut donc de 13.4.

TABLEAU III.—EXCÉDENT DES NAISSANCES SUR LES DÉCÈS, PAR PROVINCES, POUR CHAQUE SEXE, 1921-26

Provinces		Population masculine			Population féminine			Deux sexes	Taux de l'accroissement naturel par 1,000 âmes

(1) Voir la note 1 au bas du tableau I. (2) Sans compter les mort-nés.

Dans le territoire d'enregistrement de 1921, l'accroissement naturel au cours de l'année fut de 80,382 ou 11.8 par 1,000 âmes, comparativement à 88,384 ou 13.1 par 1,000 âmes en 1925. C'est la plus faible augmentation naturelle depuis 1921, tant en nombre absolu qu'en proportion.

NAISSANCES

En 1926, on constata 236,813 accouchements au Canada, dont 233,807 d'un seul enfant, 2,970 de deux enfants et 36 de trois enfants. En définitive, il y eut 232,750 naissances d'enfants vivants et 7,105 mort-nés. Les accouchements simples ont contribué aux naissances d'enfants vivants à concurrence de 227,084, les accouchements doubles, à concurrence de 5,562 et les triples, 104. Le tableau 3 des tableaux d'ensemble relève tous ces détails, et indique le sexe des enfants nés, soit vivants, soit morts, de ces différents accouchements.

Taux de la natalité.—Le taux brut de la natalité (naissances vivantes) par 1,000 personnes, s'établit en 1926 à 24.8. Le coefficient le plus élevé appartient au Québec et au Nouveau-Brunswick avec 32.1 et 25.4 respectivement; et le plus bas, 17.7, à la Colombie-Britannique et, 20.1 à l'Île du Prince-Édouard.

Le taux de la natalité dans le territoire d'enregistrement de 1921 était de 22.1 par 1,000 âmes, comparativement à 23.0 en 1925 et 26.4 en 1921. Chaque année de la période 1921-26 a vu un déclin dans le taux des naissances sur l'année précédente; la seule preuve d'augmentation dans le nombre absolu des naissances se voit en 1924 quand il s'élevait légèrement au-dessus de l'année précédente, augmentation toutefois qui n'était pas proportionnée à l'augmentation estimative de la population.

Masculinité.—On remarque un excédent des naissances masculines sur les naissances féminines dans chaque province en 1926, la proportion variant entre 1,025 par 1,000 dans l'Île du Prince-Édouard à 1,076 dans le Manitoba. Dans l'ensemble du Canada, on compte 1,062 naissances masculines pour 1,000 naissances féminines. Dans le territoire d'enregistrement de 1921, la proportion était de 1,057 par 1,000. La plus haute proportion dans ce territoire existait en 1921, soit 1,065 et la plus basse en 1922 avec 1,049. Parmi les provinces se prêtant à la comparaison avec le passé, c'est l'Île du Prince-Édouard qui donne la plus forte marge de fluctuation, de 985 en 1923 à 1,099 en 1925, ce qui s'explique par sa population peu considérable.

Il peut être intéressant de faire remarquer qu'aux États-Unis, durant les dix années 1915-25, parmi la population de race blanche des états soumis aux statistiques vitales, il est né entre 1,055 à 1,062 garçons par 1,000 filles.

Dans l'Angleterre et le pays de Galles, où les naissances sont exactement enregistrées depuis fort longtemps, on trouve une excellente démonstration de la variation de la masculinité des naissances d'enfants vivants au sein d'une nombreuse population. Durant les cinquante années écoulées entre 1871 et 1920, la proportion des naissances masculines par rapport aux naissances féminines oscilla entre 1,032 en 1898 à 1,060 en 1919; avant la Grande Guerre, la proportion la plus élevée avait été de 1,043 en 1875. Plus tard, on compta 1,051 naissances masculines pour 1,000 féminines en 1921, 1,049 en 1922, 1,044 en 1923, 1,047 en 1924, 1,045 en 1925 et 1,041 en 1926.

On trouvera dans le tableau IV, pour chacune des provinces, la répartition numérique et proportionnelle des naissances masculines aux naissances féminines en chacune des années 1921-26. Les chiffres de Québec et pour le total des neuf provinces sont, comme il a déjà été expliqué, relatifs à l'année 1926 seulement.

TABLEAU IV.—TAUX DES NAISSANCES (À L'EXCLUSION DES MORT-NÉS) PAR 1,000 DE POPULATION ET PROPORTION DES GARÇONS COMPARATIVEMENT AUX FILLES, 1921-26

Provinces		Nombre de naissances vivantes	Taux par 1,000 âmes	Garçons		Filles		Garçons par 1,000 filles
				Nombre	Pourcentage du total	Nombre	Pourcentage du total

(1) Voir la note 1 au bas du tableau I. (2) Population blanche.

Naissances par mois.—Le tableau 4 des tableaux d'ensemble donne le nombre des naissances déclarées dans chacun des mois de l'année et classifiées, dans chaque province, comme rurales ou urbaines.

Le tableau VI donne par provinces l'équivalent annuel de la proportion des naissances par mois de 1921 à 1926. Pour obtenir ces résultats, le nombre des naissances du mois indiqué a été multiplié par 365 et divisé par le nombre de jours contenus dans ce mois, avant d'être réduit à une proportion par 1,000 de population.

TABLEAU VI.—TAUX DES NAISSANCES (MORT-NÉS EXCLUS) PAR 1,000 DE POPULATION, EN CHAQUE MOIS PAR PROVINCES, 1921-26

Provinces		Taux annuel	Équivalent du taux annuel des naissances											
			Jan.	Fév.	Mars	Avr.	Mai	Juin	Juil.	Août	Sept.	Oct.	Nov.	Déc.

(1) Voir la note 1 au bas du tableau I.

Âge des pères et mères.—Le tableau VII est un relevé numérique et proportionnel des naissances d'enfants vivants et légitimes selon l'âge de leurs père et mère, en 1926. Dans onze cas, la mère n'avait pas encore 15 ans. Vingt-huit pour cent des naissances étaient attribuables aux mères au-dessous de 25 ans, tandis que 7 pour cent restaient aux mères qui avaient dépassé la quarantaine. Seulement 10.3 pour cent des pères étaient au-dessous de 25 ans et plus de 21 pour cent avaient 40 ans et plus. Ces pourcentages ont été calculés sur les âges connus seulement, la proportion toutefois des âges inconnus du père et de la mère, relativement aux naissances légitimes, est plutôt négligeable.

TABLEAU VII.—NAISSANCES D'ENFANTS LÉGITIMES (À L'EXCLUSION DES MORT-NÉS) DANS LE CANADA (1), CLASSIFIÉES SELON L'ÂGE DES PÈRES ET MÈRES, 1926

Pères et mères	Groupes d'âges								Total, âges connus	Âges inconnus	Total
	Moins de 15 ans	15 à 19 ans	20 à 24 ans	25 à 29 ans	30 à 34 ans	35 à 39 ans	40 à 44 ans	45 ans et plus			
Nombre des mères	11	10,826	52,584	62,190	49,939	34,929	13,780	1,397	225,656	973	226,629

Nombre des pères	–	806	22,414	51,784	55,402	46,922	29,032	19,284	225,644	985	226,629
Pourcentage des pères	–	0·4	9·9	22·9	24·6	20·8	12·9	8·5	100·0	–	–

(1) Voir la note 1 au bas du tableau I. (2) Moins d'un dixième d'un pour cent.

Les données du tableau VIII sont similaires à celles du tableau VII, mais n'embrassent que les années 1921 à 1926 et ne couvrent que le territoire d'enregistrement de 1921; donc la province du Québec n'entre pas dans ce cadre et ne peut supporter la comparaison avec les années précédentes. En autant que ces chiffres prouvent quelque variation, il ressort une légère augmentation des enfants nés de parents d'un âge un peu plus avancé, le moyen le plus commode de faire ressortir cette augmentation est de prendre pour base de calcul la 30ième année pour la mère et la 35ième pour le père.

TABLEAU VIII.—NAISSANCES D'ENFANTS LÉGITIMES (À L'EXCLUSION DES MORT-NÉS) CLASSIFIÉES SELON L'ÂGE DES PÈRES ET MÈRES, 1921-26

Pères et mères		Groupes d'âges								Total, âges connus	Âges inconnus	Total

(1) Moins d'un dixième d'un pour cent.

Un quart des mères mariées des enfants nés en 1926 dans les neuf provinces du Canada avaient 24.43 ans d'âge; un quart étaient entre cet âge et 28.89 ans; un quart entre 28.89 et 34.26 ans et le quatrième quart au-dessus de ce dernier âge. Ces points de division sont appelés quartiles, et les fractions d'année sont déterminées selon que les mères sont plus ou moins rapprochées de l'un ou l'autre quartile. Pour les pères mariés, ces quartiles sont 28.35 ans; 33.31 ans et 39.01 ans. Si au lieu de diviser les mères en quatre groupes, nous les partageons en dix groupes de nombres égaux, les déciles sont 21.41 ans, 23.50 ans, 25.34 ans, 27.79 ans, 28.89 ans, 30.82 ans, 33.41 ans, 35.61 ans et 38.69 ans. Pour les pères, les déciles sont 24.91 ans, 27.28 ans, 29.35 ans, 31.28 ans, 33.31 ans, 35.48 ans, 37.81 ans, 40.40 ans et 44.19 ans.

Lieu de naissance des parents.—Le tableau IX établit pour chacune des provinces la répartition proportionnelle des naissances légitimes en 1926, selon le lieu de naissance de la mère.

TABLEAU IX.—POURCENTAGE DES ENFANTS LÉGITIMES, NÉS VIVANTS, DONT LES MÈRES SONT NÉES AU CANADA, DANS LES AUTRES PARTIES DE L'EMPIRE BRITANNIQUE OU À L'ÉTRANGER, PAR PROVINCES, 1926

Provinces	Pourcentage des naissances, par pays d'origine de la mère			
	Total	Née au Canada	Née dans l'empire britannique	Née à l'étranger
Canada (1)	**100·0**	**72·0**	**13·0**	**15·0**
Île du Prince-Édouard	100·0	95·7	1·3	2·9
Nouvelle-Écosse	100·0	86·5	9·7	3·7
Nouveau-Brunswick	100·0	92·3	3·5	4·2
Québec	100·0	92·0	2·8	5·2
Ontario	100·0	68·7	20·9	10·4
Manitoba	100·0	49·2	19·4	31·4
Saskatchewan	100·0	41·5	15·4	43·1
Alberta	100·0	36·3	19·6	44·1
Colombie Britannique	100·0	38·2	35·7	26·1

(1) Voir la note 1 au bas du tableau I.

La forte proportion de mères nées au Canada que l'on remarque dans les provinces maritimes et dans le Québec forme un contraste frappant avec ce que l'on voit dans les quatre provinces de l'ouest, particulièrement dans l'Alberta où les mères nées au pays ne constituent que 36 pour cent de la masse. Il faut toutefois remarquer que la proportion des mères nées au Canada dans ces provinces s'est grandement accrue depuis 1921, comme le prouve le relevé suivant.

POURCENTAGE DES ENFANTS LÉGITIMES, NÉS VIVANTS, DONT LES MÈRES SONT NÉES AU CANADA

	1921 (1)	1922	1923	1924	1925	1926
Manitoba	42·3	43·5	44·9	47·4	49·0	49·2
Saskatchewan	36·1	36·4	37·9	39·4	40·8	41·5
Alberta	30·0	30·9	32·3	33·1	34·5	36·3
Colombie Britannique	29·7	33·7	34·7	36·1	37·1	38·2

(1) Comprend les illégitimes.

Le tableau X, qui classifie tous les enfants nés vivants en 1926 selon le lieu de naissance de leurs parents, nous fait connaître dans quelle mesure la génération qui pousse sera le produit de parents nés au Canada, ou dans l'Empire Britannique ou à l'étranger, il énumère également les pays d'où les immigrants généralement nous arrivent. Le mot "inconnu" dans la colonne indiquant le pays d'origine, quand il s'agit du père, s'applique aussi bien aux naissances illégitimes qu'au manque de renseignements, mais quand il s'agit de la mère, il ne faut accuser que le manque d'information. On remarquera que 68.5 pour cent des enfants nés en 1926 descendaient d'un père né au Canada, que 71.8 pour cent avaient une mère née également au Canada; enfin que 61.4 pour cent étaient le fruit de mariages entre père et mère canadiens. En fait, près de 78.9 pour cent des enfants descendaient soit d'un père, soit d'une mère du Canada.

TABLEAU X.—NOMBRE ET PROPORTION DES NAISSANCES (MORT-NÉS EXCLUS) SELON LE PAYS DE NAISSANCE DES PÈRE ET MÈRE, 1926

Pays d'origine	Nombre des enfants dont le père ou la mère ou l'un et l'autre sont nés dans les pays ci-après			Pourcentage des enfants dont le père ou la mère ou l'un et l'autre sont nés dans les pays ci-après

(1) Comprend la Galicie.
(2) Moins d'un dixième d'un pour cent.
(3) Ce chiffre représente le nombre des enfants dont le père et la mère sont nés dans le même pays. La différence entre ce chiffre (178,155) et le total des naissances (232,750) égale le nombre d'enfants (54,595) dont le père et la mère sont dans des catégories différentes.
(4) A l'exclusion du pourcentage (23·5) représenté par les enfants dont le père et la mère sont dans des catégories différentes.

Origine raciale des pères et mères.—On verra par le tableau XI le nombre et la proportion de naissances appartenant aux principaux groupes de races. Il est évidemment utile de savoir dans quelle mesure chaque race contribue au peuplement du Canada; d'autre part, il est intéressant de constater dans quelle mesure les gens de même souche ethnique se mélangent aux autres souches. Il faut toutefois tenir compte que selon le tableau précédent 31.5 pour cent des pères et 28.2 pour cent des mères étaient nés en dehors du Canada. Dans un certain nombre de ces cas, le mariage eut lieu avant de venir au Canada, quand l'occasion de s'allier à des personnes d'autre origine raciale était beaucoup plus limitée. En 1926, l'origine de la mère n'est restée inconnue que dans quatre-dixièmes d'un pourcent des naissances. A remarquer que les naissances d'enfants naturels s'ajoutent aux cas où l'origine du père est inconnue.

TABLEAU XI.—NOMBRE ET PROPORTION DES NAISSANCES (MORT-NÉS EXCLUS) SELON L'ORIGINE RACIALE DES PÈRE ET MÈRE, 1926

Origine raciale des père et mère	Nombre de nouveau-nés dont le père ou la mère, ou l'un et l'autre appartiennent aux origines ci-après			Pourcentage des nouveau-nés dont le père ou la mère, ou l'un et l'autre appartiennent aux origines ci-après

(1) Comprend "Galicienne".
(2) Moins d'un dixième d'un pour cent.
(3) Ce chiffre représente le nombre des enfants dont le père et la mère ont la même origine raciale. La différence entre ce chiffre (174,065) et le total des naissances (232,750) égale le nombre d'enfants (58,685) dont le père et la mère sont dans des catégories différentes.
(4) A l'exclusion du pourcentage (25·2) représenté par les enfants dont le père et la mère sont dans des catégories différentes.

Enfants illégitimes.—Le tableau XII est consacré aux enfants illégitimes; il les classifie selon l'âge de leur mère, dans chaque province. Dans 718 cas ou 11.7 pour cent du total, l'âge de la mère est resté inconnu. Ce pourcentage contrarie jusqu'à un certain point les conclusions qu'on pourrait tirer des âges connus. Sur ces 718 cas, 664 appartenaient à la province de Québec, et provenaient en plus grand nombre des constatations des Crèches de Québec et de Montréal.

TABLEAU XII.—NAISSANCES ILLÉGITIMES (MORT-NÉS EXCLUS) CLASSIFIÉES SELON L'ÂGE DE LA MÈRE, PAR PROVINCES, 1926

	1923	**5·0**	**2·7**	**3·5**	**2·5**	**4·1**	**3·1**	**2·7**	**2·6**	**2·9**	**3·5**
	1924	**5·3**	**2·4**	**3·7**	**2·5**	**4·0**	**3·2**	**2·7**	**2·5**	**2·7**	**3·4**
	1925	**5·1**	**2·8**	**3·2**	**2·4**	**3·8**	**3·0**	**2·7**	**3·0**	**2·6**	**3·3**
	1926	**5·3**	**1·9**	**3·0**	**2·2**	**3·9**	**2·8**	**2·6**	**2·8**	**2·9**	**3·4**

On a relevé dans l'état qui suit la proportion des mort-nés par rapport aux naissances vivantes de 1926, pour certains groupes d'âges de mères mariées; quant aux mères d'âge inconnu, dont le nombre figure aux tableaux VIII et XV, on a distribué ces naissances au *pro rata*. Le pourcentage des mort-nés, qui est le plus bas chez les mères de 20 à 24 ans, s'élève graduellement de groupe en groupe chez les mères plus âgées, résultat qui confirme les chiffres des années précédentes dans le territoire d'enregistrement de 1921. Il faut remarquer toutefois, que l'ordre des naissances, qui est probablement un facteur dans la proportion des mort-nés et des naissances vivantes, n'est pas mentionné dans les groupes d'âges.

PROPORTION DES MORT-NÉS À LA TOTALITÉ DES NAISSANCES AU CANADA,(1) SELON L'ÂGE DES MÈRES, 1926

Groupes d'âges des mères	Total, naissances	Total, mort-nés	P.c. des mort-nés proportionnellement aux naissances
15–19 ans	11,175	291	2·6
20–24 "	54,004	1,193	2·2
25–29 "	64,007	1,549	2·4
30–34 "	51,689	1,535	3·0
35–39 "	36,479	1,399	3·8
40–44 "	14,568	729	5·0
45 ans et plus	1.501	98	6·5

(1) Voir la note 1 au bas du tableau I.

Le tableau XVII est consacré à la répartition des mort-nés dans chaque province, par sexe et par mois de naissance, en 1926; on y remarque que la proportion de garçons par rapport aux filles est beaucoup plus élevée que dans les naissances d'enfants vivants.

TABLEAU XVII.—MORT-NÉS, PAR MOIS, PROVINCES ET SEXES, 1926

MORTALITÉ INFANTILE

Le taux de la mortalité chez les enfants de moins d'un an est obtenu en comparant le nombre de décès survenus durant l'année qui nous occupe aux naissances déclarées au cours de la même année. Le nombre d'enfants décédés dans les neuf provinces du Canada en 1926 représente un total de 23,692, soit 101.8 par 1,000 naissances vivantes. Pour les huit provinces comprises dans le territoire d'enregistrement de 1921, le taux en 1926 est de 79.9 par 1,000 naissances vivantes, comparativement à 78.6 en 1925 et 78.5 en 1924. On y remarque que la proportion en ces années offre peu de changement, tandis qu'en 1921-23, cette proportion était de beaucoup plus élevée, soit 88.1 en 1921 et 1923 et 86.8 en 1922.

Mortalité infantile, par sexe.—Les chiffres par sexe du tableau XVIII font connaître que la proportion de la mortalité infantile chez les garçons en 1926 s'élevait à 112.9 par 1,000 naissances, et que celle des filles n'était que de 90 par 1,000 naissances. Le nombre de naissances masculines était de 119,863 et celui de naissances féminines de 112,887 seulement; l'excédent de garçons était donc de 6,976; mais en tenant compte des sexes, si nous déduisons les décès survenus dans cette première année d'existence, l'avantage des garçons est réduit à 3,594.

(1) Voir la note 1 au bas du tableau I.

Année de naissance et âge au décès.—Quoique les chiffres de la mortalité infantile relevés dans le tableau XVIII soient basés sur les naissances et les décès enregistrés en 1926, il est évident qu'un certain nombre de ces décès s'appliquent à des enfants nés en 1925, bien qu'ayant vécu moins d'un an. On constate en effet que les cas de cette nature étaient au nombre de 5,190 ou 21.9 pour cent du total des décès d'enfants durant l'année, laissant 18,502 ou 78.1 pour cent du total de ces enfants nés en 1926 (tableau XXII). Le petit nombre d'enfants de cet âge nés en une certaine année et décédés l'année suivante permet de conclure que le taux de la mortalité infantile basé sur la relation entre les décès d'une année quelconque et les naissances de la même année présente un tableau assez exact de la réalité et que ces chiffres peuvent se comparer avec ceux des années précédentes, sauf pour le cas exceptionnel où un grand changement se produirait dans le nombre de naissances d'une année à l'autre.

Le tableau XIX, qui répartit par provinces les décès des nouveau-nés en 1926 selon la durée de leur brève existence, nous montre que près de la moitié d'entre eux n'avaient pas encore un mois et qu'environ un tiers sont morts dans la première semaine de leur naissance. Cette lourde mortalité parmi les nouveau-nés explique la grande prépondérance des décès d'enfants dont la naissance et la mort se sont produites durant la même année.

Mortalité infantile en d'autres pays.—Le tableau XX établit un parallèle entre le Canada et certains autre pays, au regard des décès d'enfants de moins d'un an; toutefois dans certains cas, les chiffres ne sont que provisoires. Dans chacun des pays établissant une distinction entre les sexes, on y voit que la mortalité infantile est plus forte chez les garçons que chez les filles.

Mortalité infantile par mois.—Le tableau XXI présente le nombre de décès d'enfants et le taux de la mortalité infantile en chaque mois, basé sur les naissances d'enfants vivants du même mois.

TABLEAU XXI.—MORTALITÉ INFANTILE PAR MOIS, 1926

—	Total	Jan.	Fév.	Mars	Avril	Mai	Juin	Juil.	Août	Sept.	Oct.	Nov.	Déc.
Nombre de naissances vivantes	232,750	19,317	18,284	21,356	21,064	20,706	19,464	19,907	19,682	19,145	18,512	17,402	17,911
Nombre de décès dans la première année	23,692	1,860	1,885	2,236	2,411	2,184	1,743	1,671	2,143	2,265	1,900	1,599	1,795
Taux par 1,000 naissances vivantes	101·8	96·3	103·1	104·7	114·5	105·5	89·5	83·9	108·9	118·3	102·6	91·9	100·2

Le tableau XXII classifie les décès d'enfants de moins d'un an, dans les neuf provinces du Canada, survenus en 1927, selon le mois de la naissance et le mois du décès, que ces mois appartiennent à 1925 ou 1926. Verticalement les chiffres indiquent la répartition par mois de naissance d'enfants qui sont morts avant d'avoir atteint une année dans les mois spécifiés; horizontalement, ils donnent le nombre d'enfants décédés qui étaient nés en un certain mois. Par exemple, 212 des enfants nés en avril 1925 sont morts en 1926 avant d'avoir atteint leur premier anniversaire; soit 62 en janvier, 45 en février, 71 en mars et 34 en avril 1926. En lisant les chiffres diagonalement (les totaux exceptés), de l'angle supérieur gauche à l'angle inférieur droit, on trouve le nombre d'enfants décédés en 1926, dans le mois de leur naissance, dans le mois qui la suivit, etc. L'addition diagonale de la dernière série, de 765 à 654 nous indique qu'en 1926 les enfants morts dans le mois de leur naissance étaient au nombre de 9,064 soit 38.3 pour cent du total de la mortalité infantile durant l'année. On obtient le nombre d'enfants décédés dans leur second mois en additionnant diagonalement la série de chiffres placés immédiatement au-dessus de ceux dont nous venons de parler (depuis 252 à 278), c'est-à-dire 3,339 ou 14.1 pour cent de tous les décès de l'année. Quant aux autres, ceux décédés en 1926 durant un mois qui n'était ni celui de leur naissance ni le mois suivant, ils étaient au nombre de 11,289, soit 47.6 pour cent de tous les décès d'enfants déclarés en 1926.

(1) Voir la note 1 au bas du tableau I.

Le tableau XXIII divise la mortalité infantile de chaque mois entre ces trois catégories, chacune d'elle étant computée sur un dénominateur approprié. Comme les statistiques des naissances en 1925 n'existent que pour les huit provinces comprises dans le territoire d'enregistrement de 1921, le tableau ne s'applique qu'à ce territoire, et permet la comparaison des divers mois de 1926 sur (a) la mortalité des enfants nés durant le mois; (b) la mortalité des enfants nés durant le mois précédent et (c) la mortalité des enfants de moins d'un an nés antérieurement au mois précédent.

Dans le taux de mortalité des enfants nés antérieurement au mois précédent, la longueur de chaque mois a été uniformisée à 30.4 jours. On n'a pas procédé à cet ajustement en calculant les taux des autres catégories, parce que dans ces cas, étant donné la concentration des décès pendant la première semaine de l'existence, la variation de la longueur des mois ne constitue qu'une différence insignifiante.

Le plus fort coefficient de mortalité des enfants nés durant le mois se rencontre en avril et le plus faible en septembre; le plus fort coefficient de mortalité des enfants nés durant le mois précédent existe en décembre et le plus bas en août; enfin le plus fort coefficient de mortalité des enfants de moins d'un an nés antérieurement au mois précédent se voit en avril suivi de septembre, et le plus faible en juillet. L'indice de septembre dans la mortalité de ces enfants contraste avec l'indice relativement peu élevé des autres divisions, mais ce contraste peut vraisemblablement être attribué à la plus grande fréquence en ce mois des maladies gastro-intestinales.

En vue d'unifier le taux mensuel de la mortalité infantile, on a combiné ces trois coefficients en présumant un nombre égal de naissances en chaque mois de l'année. Sur cette base, avril tenait la tête avec un taux unifié de 96.8 pour cent par 1,000 naissance vivantes, tandis que juillet était le dernier avec 66.9 pour cent.

TABLEAU XXIII.—ANALYSE DE LA MORTALITÉ INFANTILE DANS LE TERRITOIRE D'ENREGISTREMENT DE 1921, PAR MOIS EN 1926

Mois	Mortalité des enfants nés durant le mois			Mortalité des enfants nés durant le mois précédent			Mortalité des enfants de moins d'un an nés antérieurement au mois précédent				Taux [1] unifié par 1,000 naissances

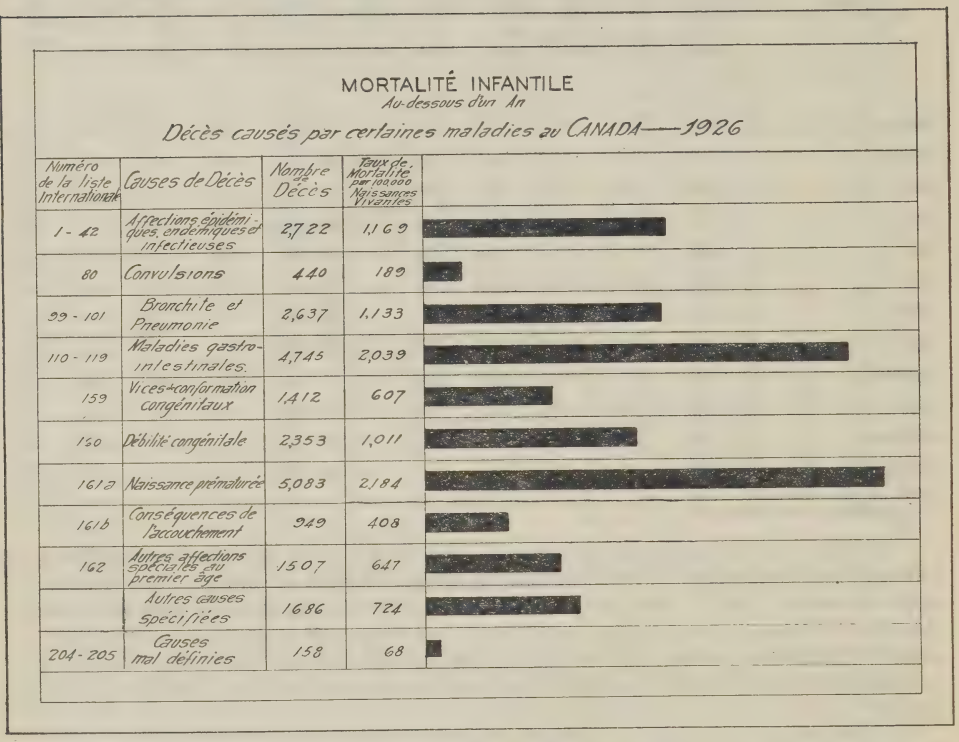
[1] Obtenu en additionnant c + f + (11 x j).

Le tableau XXIV présente également un taux ajusté de la mortalité infantile pour le territoire d'enregistrement de 1921, couvrant la période 1923-26; ces données sont similaires à celles du tableau XXIII. Bien qu'une variation considérable soit indiquée d'année en année des taux de chaque mois, chaque année prouve un déclin des taux entre mars ou avril et juillet. Ce dernier persiste avec le taux le plus bas de l'année. Septembre présente une moyenne considérablement plus élevée que tout autre mois de cette dernière partie de l'année.

TABLEAU XXIV.—TAUX AJUSTÉS DE MORTALITÉ PAR MOIS, DANS LE TERRITOIRE D'ENREGISTREMENT DE 1921, ANNÉES 1923-26



Année	Jan.	Fév.	Mars	Avril	Mai	Juin	Juil.	Août	Sept.	Oct.	Nov.	Déc.
1923	104·6	114·2	119·8	98·7	86·2	68·8	64·9	74·7	82·4	82·9	75·9	72·1
1924	82·8	86·0	91·2	88·3	79·0	72·8	65·9	76·0	83·3	74·0	68·0	77·9
1925	78·4	83·4	91·2	81·9	77·6	66·8	57·6	72·8	101·5	86·6	66·2	74·4
1926	74·9	86·9	87·5	96·8	85·3	70·3	66·9	71·3	82·5	76·6	68·9	83·5

Mortalité infantile, par trimestre.—Le tableau XXV relève le taux de la mortalité infantile en chacun des quatre trimestres de l'année 1926. Le taux brut est obtenu en divisant le nombre de décès d'un trimestre par le nombre de naissances du même trimestre. Non seulement le dernier trimestre de l'année offre le taux le plus bas, mais comme le nombre de naissances dans ce dernier trimestre se compare désavantageusement avec celui des trois autres, la méthode de computation exagère le taux de ce trimestre lequel computé plus exactement serait encore plus bas.

TABLEAU XXV.—MORTALITÉ INFANTILE AU CANADA(1), PAR TRIMESTRES EN 1926

Trimestres	Naissances d'enfants vivants	Décès	Taux des décès par 1,000 naissances vivantes
1er trimestre	58,957	5,981	101·4
2ième trimestre	61,234	6,338	103·5
3ième trimestre	58,734	6,079	103·5
4ième trimestre	53,825	5,294	98·4

(1) Voir la note 1 au bas du tableau I.

Mortalité infantile, par causes.—Sur la totalité de la mortalité infantile dans les neuf provinces du Canada en 1926, 92.6 pour cent ont été victimes des maladies énumérées dans le tableau XXVI. La proportion des garçons est de 92.5 pour cent et celle des filles de 92.8 pour cent. On constate plus de décès causés par les naissances prématurées que par toute autre cause. La diarrhée et l'entérite sont la seconde cause importante de décès; la pneumonie, bien que suivant de très loin vient au troisième rang dépassant quelque peu les cas de débilité congénitale.

TABLEAU XXVI.—MORTALITÉ INFANTILE AU CANADA(1), PAR SEXES ET CAUSES DE DÉCÈS EN 1926

N° liste int.	Causes des décès	Deux sexes			Garçons		Filles

(1) La réduction dans le taux de la mortalité causée par la dysenterie en 1926 est grandement attribuable à la définition plus juste accordé à ce terme.
(2) Comprend les décès des enfants au-dessous de trois mois ou les soins médicaux furent négligés.

Proportion de certaines causes, par sexes.—Le tableau XXVIII nous montre pour les mêmes causes énumérées dans les tableaux XXVI et XXVII le pourcentage de garçons par rapport aux filles. Pour les neuf provinces du Canada, les chiffres existent pour l'année 1926 seulement; tandis que pour le territoire d'enregistrement de 1921, non seulement les chiffres de 1926 sont reproduits, mais ceux des cinq années 1921-25 et ceux de la période entière, ces derniers chiffres étant les plus typiques de ce tableau. On y remarquera que pour les neuf provinces et pour le territoire d'enregistrement également, la proportion de décès chez les garçons, dans presque tous les cas, est plus élevé que chez les filles. La seule maladie qui semble sévir avec plus de sévérité chez les filles que chez les garçons est la coqueluche.

(1) Voir la note 1 au bas du tableau I.

Causes de mortalité infantile, par période d'âges.—Le tableau XXIX présente les taux de mortalité infantile résultant de certaines causes, dans les neuf provinces du Canada en 1926. Les trois premiers mois de l'existence sont divisés en périodes mensuelles et la première semaine du premier mois est distinguée du reste de ce mois; le reste de l'année est divisé en trimestres. Dans le but de permettre une comparaison équitable entre les périodes de longueurs différentes, on a uniformisé les taux hebdomadaires; à cet effet, les taux bruts de la période "une semaine et moins d'un mois" ont été multipliés par 7/23.4, ceux de la période mensuelle par 7/30.4 et ceux du trimestre par 7/91.2. Ainsi réduits ces taux représentent la mortalité par 100,000 naissances vivantes durant une semaine moyenne des périodes les plus longues. Il ne faut pas perdre de vue toutefois que la mortalité durant la première semaine de l'existence est loin de s'égaliser. En 1926, par exemple les décès survenus pendant les premières vingt-quatre heures dépassèrent passablement ceux du surplus de la première semaine. Pour certaines causes la proportion de décès survenus le premier jour fut encore plus forte. Sur 3,936 enfants décédés avant d'avoir vécu une semaine, pour cause de naissance prématurée, 2,601 ou presque les deux tiers ont succombé dans les premières vingt-quatre heures. Une inégalité de distribution similaire, quoique beaucoup moins prononcée, caractérise les décès qui surviennent après la première semaine dans le cours du premier mois.

Le tableau fait ressortir la prédominance des décès résultant des causes nos 159-162 durant la première semaine de l'existence. Il est à remarquer toutefois que la pneumonie se déclare plus fréquemment à cette période de l'existence qu'en toute autre période de l'année; fait qui n'est pas très visible dans la méthode ordinaire de présenter les taux, et vu la brièveté de la période. C'est dans le troisième mois que la diarrhée et l'entérite font le plus de ravages, le second mois toutefois le suit de très près. C'est dans la première semaine que les convulsions (terme peu satisfaisant) font le plus grand nombre de victimes; l'influenza est remarquée durant toute l'année; la coqueluche s'attaque aux divers groupes d'âges, excepté au groupe de la première semaine, mais elle atteint son maximum de décès dans le troisième mois de l'existence.

TABLEAU XXIX.—TAUX DE LA MORTALITÉ (ÉQUIVALENT HEBDOMADAIRE) PAR 100,000 NAISSANCES VIVANTES, CAUSÉE PAR CERTAINES MALADIES, PAR PÉRIODES D'ÂGE DURANT LA PREMIÈRE ANNÉE D'EXISTENCE AU CANADA[1] EN 1926

Mortalité infantile, par villes.—Le tableau XXX nous renseigne sur les naissances vivantes, les décès d'enfants de moins d'un an et le taux de mortalité infantile dans les cités de 40,000 âmes et plus, au cours des années 1921-26. Pour les deux cités de Montréal et de Québec, les chiffres se limitent à 1926. En cette même année, le taux de la mortalité infantile le plus élevé se trouve à Québec et le plus bas à Vancouver, la différence entre

ces deux extrémités étant très grande. Des cités qui peuvent être comparées avec les années précédentes, on doit remarquer que Vancouver occupe toujours la même position enviable, dans chacune des années énumérées; qu'en 1922 son taux s'était abaissé à 66.6 pour cent par 1,000, soit un peu moins que celui de London, Ontario, lequel était de 67.7 pour cent. En 1923, 1925 et 1926, London suivait toujours de près la ville de Vancouver.

(1) Non compris dans le territoire d'enregistrement.
NOTE:—Les cités sont classifiées selon leur population au recensement de 1921.

En étudiant les statistiques des naissances et de la mortalité infantile, il ne faut pas perdre de vue qu'un grand nombre de personnes en dehors des villes ont l'avantage d'être admises dans les institutions urbaines. Afin de soustraire à la comparaison des villes entre elles les naissances survenues aux mères qui ne sont que de passage dans les institutions des villes et les décès d'enfants qui peuvent suivre, la méthode la plus satisfaisante serait de mettre au compte de l'endroit de résidence de la mère, la naissance de son enfant et le décès, s'il a lieu. A défaut de cette formalité, toutefois, l'élimination du total d'une ville des naissances dans les institutions à des mères non résidantes, et des décès de ces enfants peuvent offrir un taux de mortalité infantile assez près de l'exactitude. Le nombre de naissances hors les institutions des villes à des mères non résidantes doit être assez restreint, mais peut en quelque sorte compenser sans erreur sérieuse pour les mères faisant leurs couches en dehors de leur ville d'habitation.

Le tableau XXXI fait connaître la mortalité infantile en 1926, dans les cités de 40,000 âmes et plus, sur une base précise. Les nombres absolus de ce tableau ont été puisés dans les tableaux 6 et 15 des tableaux d'ensemble. Il est intéressant de comparer la mortalité infantile corrigée des cités avec celle du tableau XXX.

MORTALITÉ PUERPÉRALE

Dans le tableau XXXII, les décès de nature puerpérale sont classifiés par âge des défuntes en 1926 pour chacune des provinces. En 1926, ces décès étaient au nombre de 1,317, soit à raison de 5.7 par 1,000 naissances vivantes. Les proportions les plus élevées soit 7.1, 6.5 et 6.4 par 1,000 sont fournies par la Saskatchewan, la Colombie Britannique et le Nouveau-Brunswick respectivement. Le taux le plus réduit est fourni par la Nouvelle-Ecosse 4.6 pour cent, et l'Ile du Prince-Edouard, le taux de cette dernière province étant presque insignifiant.

(1) Voir la note 1 au bas du tableau I. (2) Dans ce total, figure une mère de 14 ans. (3) Dans ce total, figure une mère de 13 ans. (4) Voir notes (2) et (3).

En classifiant les enfants nés vivants dans les neuf provinces du Canada en 1926 selon l'âge de leur mère et en opérant une répartition proportionnelle de ceux dont l'âge de la mère est resté inconnu, nous avons pu établir un parallèle dans l'état qui suit. On y remarquera que les mères âgées de 25 à 30 ans sont celles qui paient le moindre tribut à la mortalité puerpérale. Entre 40 et 49 ans, le taux des décès pour ces causes est près de trois fois celui d'entre 25-29 ans. Ces chiffres corroborent assez bien ceux obtenus durant les années précédentes dans le territoire d'enregistrement de 1921. Des proportions dissemblables des naissances vivantes ou mort-nés dans les divers groupes d'âge fourniraient un élément de classification qui influencerait le taux exprimé dans chaque groupe d'âge.

TAUX DE LA MORTALITÉ PUERPÉRALE AU CANADA, (1) PAR GROUPES D'ÂGES, 1926

Groupes d'âges	Naissances vivantes 1926	Mortalité puerpérale 1926		Groupes d'âges	Naissances vivantes 1926	Mortalité puerpérale 1926	
		Décès	Taux par 1,000 naissances vivantes			Décès	Taux par 1,000 naissances vivantes
Moins de 20 ans	13,094	58	4·4	30–39 ans	85,993	579	6·7
20–24 ans	54,953	247	4·5	40–49 ans	15,340	175	11·4
25–29 ans	63,345	256	4·0	50 ans et plus	25	2	(2)

(1) Voir la note 1 au bas du tableau I. (2) Non computé.

Le tableau XXXIII donne le nombre et la proportion des décès d'une nature puerpérale pour chacune des huit provinces du territoire d'enregistrement de 1921-26. Quelque soit le taux de cette proportion, il est susceptible d'être affecté par l'amélioration constante des données concernant les décès des femmes d'âge fécond.

(1) Voir la note 1 au bas du tableau I.

Quoique le taux de la mortalité puerpérale ait été computé sur les naissances vivantes, il est évident que de nombreux décès classés sous cette rubrique ont eu pour cause soit un avortement, soit la naissance d'un enfant mort-né. Le tableau XXXIV présente le résultat d'une investigation en la matière. L'acte de décès de la mère ne spéficiant pas le résultat de l'accouchement, on a dû opérer des recherches parmi les documents consacrés aux mort-nés. Sous la rubrique "pas de naissance" sont compris les accidents de grossesse, les avortements, les gestations ectopiques et les cas où le foetus est resté dans le corps de la mère après sa mort. Au total, il est né 232,750 enfants vivants en 1926, dont 601 ont coûté la vie à la mère, soit 2.6 par 1,000. Des mort-nés au nombre de 7,105, 235 ont causé la mort de la mère, soit 33.1 par 1,000.

TABLEAU XXXIV.—DÉCÈS DE CAUSES PUERPÉRALES, CLASSIFIÉS SELON LES SOINS MÉDICAUX REÇUS, L'ÉTAT CONJUGAL ET LE FRUIT DE L'ACCOUCHEMENT

Provinces	Total	Soins médicaux		État conjugal		Fruit de l'accouchement mortel		
		Médecin présent	Médecin absent	(4) Mariées	Célibataires	Enfant vivant	Mort-né	Pas de naissance
Île du Prince-Édouard	8	8	–	8	–	(1)3	1	4
Nouvelle-Écosse	51	50	1	44	7	23	6	22

	Total	**868**	**907**	**849**	**945**	**873**	**890**

On trouvera dans le tableau XXXVII l'énumération d'un certain nombre de maladies indiquées comme cause de décès, mais avec complications résultant de l'état puerpéral, et ce dans chacune des provinces en 1926. On y verra que les causes les plus fréquentes sont: la grippe, la pneumonie, la tuberculose et les affections du cœur.

MORTALITÉ (TOUTES CAUSES)

Les décès à tous âges en 1926 dans les neuf provinces, dont la population est approximativement de 9,378,000 âmes, se sont élevés à 107,454, portant ainsi le taux brut de la mortalité à 11.5 par 1,000 personnes. La différence du taux brut de la mortalité par provinces n'est pas précisément le résultat de conditions plus avantageuses ou de santé plus robuste dans une province à l'égard de l'autre, mais est plutôt causé par la composition de leur population selon l'âge. Les comparaisons avec les années précédentes, tout comme pour les naissances, la mortalité infantile et puerpérale, sont limitées aux huit provinces formant le territoire d'enregistrement de 1921. Ce taux en 1926 est de 10.3 par 1,000 personnes, soit inférieur aux années 1921-23, mais en 1924 et 1925, il était de 9.9 p.c. Le tableau XXXVIII est un relevé des décès en nombres absolus, avec accompagnement de leur coefficient par provinces en 1926 et chiffres comparatifs des années 1921-25 pour les provinces comprises dans le territoire d'enregistrement de 1921. Pour les provinces qui peuvent être comparées avec les années passées, le taux de la mortalité en 1926 est plus élevé qu'en 1925 dans la Nouvelle-Écosse, l'Ontario, la Saskatchewan, l'Alberta et la Colombie Britannique, tandis que le Nouveau-Brunswick et le Manitoba sont restés au même niveau, et l'Île du Prince-Édouard a vu baisser le taux de mortalité.

TABLEAU XXXVIII.—NOMBRES ABSOLUS ET TAUX BRUTS DES DÉCÈS (MORT-NÉS EXCLUS) PAR 1,000 ÂMES ET PAR PROVINCES, 1921–26

(1) Voir la note 1 au bas du tableau I.

Répartition des décès selon les âges.—Le tableau XL répartit les décès survenus en 1926, selon l'âge des défunts groupés par quartiles et déciles, tant pour chaque sexe individuellement que pour les deux sexes réunis. Le lecteur désirant une explication de ces termes la trouvera à la page xv accompagnant un tableau similaire consacré aux pères et mères des nouveau-nés.

DÉCÈS AU-DESSOUS DE CHAQUE ÂGE, AU CANADA.
1926
100000
75000
50000
25000
0
3ième Quartile - 70.70 ans
Age Médian 45.50 ans
1er Quartile - 18.3 ans
0 1 2 3 4 5 - 10
AU-DESSOUS DE - 20 - 30 - 40 - 50 - 60 - 70 - 80 - 90 - 100 - 110 ANS

On y remarquera que les trois premiers déciles masculins sont notablement inférieurs aux féminins, le quatrième l'étant par environ quatre ans et le cinquième le suivant de près. Le plus court intervalle entre le quatrième et le cinquième déciles féminins réflète l'influence des maladies de nature puerpérale dans les causes de décès; le niveau d'âge inférieur de tous les déciles du sexe masculin est dû à la plus forte proportion des décès masculins durant la plus grande période de la vie, et ce, en dépit de la plus forte proportion de la population masculine au-dessus de 30 ans, résultant de l'immigration.

TABLEAU XL.—ÂGES DES DÉCÉDÉS SELON LE SEXE, GROUPÉS PAR QUARTILES ET DÉCILES, 1929

Huitième décile	"	74·05	73·28	74·00
Neuvième décile	"	80·82	79·89	81·85

Le tableau XLI donne la répartition numérique et proportionnelle des décès masculins et féminins, puis des deux réunis, dans certains groupes d'âges en 1926 et la répartition numérique et proportionnelle de la population des mêmes âges, d'après le recensement de 1921, afin d'établir un parallèle entre la proportion des décès survenus dans un groupe d'âges et la proportion que représente ce groupe de la population totale. Il ne faut pas perdre de vue, toutefois, que la population d'un pays alimentée en ces récentes années d'une forte immigration, passe continuellement des groupes d'âges de majorité et de maturité aux groupes d'âges plus avancés, à moins que le flot de cette immigration, ne soit maintenu à une allure ascendante. Oubliant pour un moment toute inexactitude de la comparaison résultant de cette tendance, il reste un fait reconnu, c'est que la première année de l'existence qui ne contenait que 2.3 p.c. de la population en 1921, a contribué 22.1 p.c. des décès en 1926; que le groupe d'âges au-dessous de 5 ans, qui était de 11.5 p.c. de la population est passé à 28.9 p.c. et que le groupe de 65 ans et plus, ne représentaient que 4.8 p.c. de la population, a contribué à raison de 32.9 p.c. aux décès de 1926.

TABLEAU XLI.—RÉPARTITION NUMÉRIQUE ET PROPORTIONNELLE DES DÉCÈS AU CANADA(1) DANS CERTAINS GROUPES D'ÂGES, 1926, ET RÉPARTITION NUMÉRIQUE ET PROPORTIONNELLE DE LA POPULATION DES MÊMES ÂGES, D'APRÈS LE RECENSEMENT DE 1921.

(1) Voir la note 1 au bas du tableau I.

Le tableau XLII établit par groupes d'âges, pour le territoire d'enregistrement, la répartition proportionnelle des décès de 1921 à 1926. Ce bref exposé démontre que la proportion des décès au-dessous d'un an par rapport à l'ensemble de la mortalité a décru d'année en année depuis 1921. Ceci s'explique partiellement d'une part par la décroissance de la natalité d'année en année, hormis 1924, et, d'autre part, par l'abaissement substantiel du taux de la mortalité infantile constaté en 1924, circonstances qui ont eu pour effet de réduire la proportion des décès chez les bébés. Le taux de la mortalité infantile, ainsi qu'on a pu le voir dans ce chapitre, a été en 1926 légèrement supérieur à 1924 et 1925, tandis que la mortalité en générale a augmenté dans de plus grandes proportions.

On constate aussi une baisse dans la proportion des décès entre la première année et la vingtième et entre la vingt et unième et la quarantième, tandis que dans les groupes plus élevés, la proportion s'accroît d'année en année. Laissant de côté les améliorations survenues au-dessous d'un an et considérant seulement les autres décès divisés en deux groupes, le premier d'un à quarante ans et le second au delà de quarante ans, on voit que les décès de ce dernier groupe représentaient 196 p.c. de ceux du premier groupe en 1921, 216 p.c. en 1922, 233 p.c. en 1923, 239 p.c. en 1924, 258 p.c. en 1925 et 266 p.c. en 1926. Il serait intéressant de savoir jusqu'où ce changement de proportion des décès est dû au facteur âge et jusqu'à quel point il affecte la proportion des décès entre les deux groupes. Seul le recensement de 1931 pourra nous éclairer sur cette question.

TABLEAU XLII.—RÉPARTITION PROPORTIONNELLE DES DÉCÈS, PAR LARGES GROUPES D'ÂGES, DANS LE TERRITOIRE D'ENREGISTREMENT DE 1921 AU COURS DES ANNÉES 1921-26

60 ans et plus	36·2	38·2	40·0	40·8	42·2	43·2

Décès de centenaires.—On rapporte 91 décès de centenaires au cours de l'année 1926, comprenant 34 hommes et 57 femmes. Le tableau XLIII en fait le relevé par provinces et par année d'âge; il est évident qu'il nous est impossible d'attester l'authenticité de ces déclarations.

TABLEAU XLIII—DÉCÈS DE CENTENAIRES PAR PROVINCES, 1926

(1) Voir la note 1 au bas du tableau I.

Mortalité par mois.—Le tableau XLIV est consacré à la mortalité par mois, dans chaque province en les années 1921-26. Les chiffres du Québec et du total des neuf provinces ne sont que pour l'année 1926; mais le relevé, qui remonte à 1921 inclusivement n'est que pour les huit provinces comprises dans le territoire d'enregistrement de 1921.

Pour l'ensemble du Canada, le mois d'avril a fourni le taux le plus élevé de mortalité en 1926, soit 15.1 par 1,000 personnes, suivi de mars à cet égard avec 13.0. L'influenza et la pneumonie occupent une place importante dans le taux de ces deux mois.

TABLEAU XLIV.—TAUX BRUT DE LA MORTALITÉ PAR 1,000 PERSONNES ET PAR MOIS, DANS CHAQUE PROVINCE, 1921-26

Provinces		Taux annuel	Équivalent du taux annuel de la mortalité

(1) Voir la note 1 au bas du tableau I.

Dans le territoire d'enregistrement, l'augmentation du mois d'avril 1926 apparaît très évidente, si on compare ces chiffres avec ceux des années précédentes. Les mois de mai et juin présentent également un taux plus élevé qu'en aucune autre année dont il est fait mention. D'autre part, le taux de janvier et février est bas, bien qu'il surpasse celui des mêmes mois en 1924 et 1925, tandis que la période août-novembre, dans l'ensemble, offre la proportion de décès la plus basse d'aucune des autres années.

Taux ajustés ou standardisés de la mortalité.—Les taux bruts de la mortalité sont quelque peu influencés par le sexe et beaucoup par les différences d'âge de la population. Afin d'éviter l'influence de ces deux facteurs, des taux ajustés des décès étaient computés dans les rapports des années précédentes pour le territoire d'enregistrement et les provinces qui le constituent en 1921-25. Ces calculs ont été basés, quant aux différences d'âge et de sexe, dans la composition de la population sur celle de l'Angleterre et du pays de Galles dénombrée en 1901.

Dans le présent rapport, des taux similaires sont donnés pour l'ensemble des neuf provinces du Canada et pour chacune séparément. Pour le Manitoba, la Saskatchewan et l'Alberta, la computation a été faite en se basant sur le recensement des provinces des prairies de 1926, de la manière décrite, page lxxix de l'Introduction du troisième rapport annuel. Pour la province du Québec et pour l'ensemble du Canada (à l'exclusion des territoires) les taux ajustés sont établis pour la première fois et selon la méthode adoptée pour les provinces des prairies, en présumant que la proportion, quant aux sexes et à l'âge, n'a pas varié depuis 1921. Pour les autres provinces, il a été présumé que les taux ajustés de 1926 devaient avoir la même proportion que les taux bruts de 1921. Il s'ensuit que l'ajustement des taux des provinces des prairies est le seul dont on puisse réclamer l'exactitude; néanmoins celui des autres provinces sert, bien qu'imparfaitement, à supprimer les inégalités dans les taux bruts dues aux différences d'âge et de sexe parmi la population constituant une collectivité.

TABLEAU XLV.—TAUX BRUTS ET TAUX AJUSTÉS DE LA MORTALITÉ, PAR PROVINCES, 1926

Provinces	Les deux sexes		Décès masculins		Décès féminins	
	Bruts	Ajustés	Bruts	Ajustés	Bruts	Ajustés
Canada(1)	11·5	11·1	11·8	11·6	11·1	10·7
Île du Prince-Édouard	10·3	7·8	10·3	7·9	10·4	7·8
Nouvelle-Écosse	11·8	9·9	12·3	10·5	11·3	9·4
Nouveau-Brunswick	12·3	10·7	12·6	10·9	12·0	10·4
Québec	14·5	14·0	15·0	14·4	14·1	13·7
Ontario	11·4	10·4	11·8	10·9	11·0	9·9
Manitoba	8·3	9·0	8·8	9·4	7·8	8·7
Saskatchewan	7·4	8·5	7·6	8·7	7·1	8·3
Alberta	8·5	9·7	8·8	10·1	8·1	9·4
Colombie Britannique	9·6	10·1	10·5	11·0	8·6	9·3

(1) Voir la note 1 au bas du tableau I.

Il ne faut pas perdre de vue que le taux brut est un taux réel tandis que le taux "ajusté" n'est qu'hypothétique. La valeur de ce dernier se limite exclusivement à la comparaison, car elle ne possède nulle signification particulière. Au point de vue de son sexe et de son âge, la population de l'Angleterre et du pays de Galles en 1901 était exceptionnellement favorable à une basse mortalité. Le Canada, lui aussi, se trouve dans le même cas, notamment en raison du grand nombre de ses immigrants au-dessous de l'âge moyen; cependant, après l'ajustement nécessaire, le taux de la mortalité pour l'ensemble du pays qui était de 11.5 sous sa forme brute, descend à 11.1 par 1,000 âmes sous sa forme ajustée.

Les différences entre le taux brut et le taux ajusté que l'on constate dans le tableau XLV sont causées par les différences d'âge et de sexe de la population. Dans les provinces dont la population est plus avantageusement composée que celle du standard, le taux ajusté est plus haut que le taux brut; dans les autres provinces, c'est le contraire qui se produit.

Les chiffres qui suivent établissent une comparaison du taux ajusté de la mortalité au Canada avec celui de l'Angleterre et le pays de Galles, le territoire d'enregistrement des États-Unis et l'Union Sud-Africaine.

TAUX AJUSTÉS DE LA MORTALITÉ EN 1926

(Au point de vue du sexe et de l'âge de la population de l'Angleterre et du pays de Galles, au recensement de 1901.)

Pays	Deux sexes	Masculin	Féminin
Canada(1)	11·1	11·6	10·7
Territoire d'enregistrement des États-Unis (blancs)	11·3	12·1	10·5
Angleterre et pays de Galles	10·1	11·2	9·1
Union Sud-africaine (blancs)	10·3	11·2	9·3

CAUSES DE DÉCÈS

Environ 87 p.c. de tous les décès dont on connaît la cause, survenus dans les neuf provinces du Canada en 1926, sont attribués aux trente causes de décès énumérées dans le tableau XLVI lequel indique le nombre des décès revendiqués par chacune de ces causes, par provinces.

(1) Voir la note 1 au bas du tableau I.

Le tableau XLVII est basé sur les chiffres absolus du tableau précédent; on y trouve le coefficient, par 100,000 âmes, des décès causés par chacune des causes énumérées.

Principales causes de décès.—On remarquera dans le tableau que pour l'ensemble du Canada et en réalité pour chaque province, les affections du cœur figurant à la liste internationale sous les numéros 87-90, et considérées collectivement, contribuèrent plus que toutes les autres causes à la mortalité; leurs ravages sont au taux de 122 par 100,000 âmes en 1926. Les maladies de la toute première enfance (Nos 160-163) viennent ensuite avec 106. Leur proéminence indique l'importance de la mortalité infantile dans le total des décès, puis il faut tenir compte des décès d'enfants de moins de trois mois qui n'ont reçu aucuns soins médicaux, et dont la cause de décès reste inconnue et qui sont compris avec le N° 162. La pneumonie (Nos 100-101) suit en troisième avec une proportion de 90 par 100,000 âmes et le cancer (Nos 43-49) vient en quatrième avec 81. La tuberculose des voies respiratoires (N° 31) présente un coefficient de 69, tandis que la tuberculose sous toutes autres formes (Nos 32-37) est responsable de 15 décès par 100,000 âmes; ainsi considérée sous toutes ses formes, la tuberculose fournit un taux de 84 par 100,000 âmes, soit légèrement plus que le cancer.

TABLEAU XLVII.—TAUX DE LA MORTALITÉ PAR 100,000 ÂMES, PAR CAUSES SPÉCIFIÉES DE DÉCÈS DANS CHAQUE PROVINCE, 1926

(1) Voir la note 1 au bas du tableau I.

Causes de décès chez les Indiens.—Le tableau XLVIII donne par provinces le nombre absolu de décès chez les Indiens en 1926 attribués aux mêmes causes que celles énumérées dans les tableaux précédents. Les chiffres du tableau XLVII ayant été tirés du Tableau "J" de l'Appendice I. La mortalité due à la tuberculose est très apparente, tandis que la pneumonie et la grippe y contribuent largement. Les maladies de la première enfance (Nos 160-163) fournissent 148 décès et les enfants de moins de trois mois, décédés sans avoir reçu de soins

médicaux, dont la cause de décès n'est pas spécifiée, sont compris dans cette catégorie. Au nombre des maladies contagieuses qui ont fourni la plus forte proportion de décès, on mentionne la rougeole et la coqueluche.

TABLEAU XLVIII.—DÉCÈS DUS À CERTAINES CAUSES, CHEZ LES INDIENS PAR PROVINCES, 1926

(1) Voir la note 1 au bas du tableau I.

Le tableau XLIX établit la proportion de décès chez les Indiens par 100,000 âmes, basée sur le nombre absolu de décès attribués aux causes énumérées dans le tableau XLVIII. La population indienne de 1926 qui a servi de base de compilation est celle du recensement des Provinces des prairies de cette même année; dans toutes les autres provinces, Québec excepté, ces taux ont été obtenus en ajoutant au nombre de cette race énuméré dans le recensement de 1921, l'accroissement naturel des années 1922-26 tel qu'établi dans le rapport des statistiques vitales de ces années. Ces données n'existant pas pour la province de Québec, il a été présumé que l'accroissement naturel devait être proportionné à celui de la province d'Ontario. Le terme "indien" employé dans ce rapport comprend aussi les métis, comme on peut le voir dans l'Appendice I de ce rapport.

La population estimative d'Indiens en 1926, par provinces, se décompose comme il suit:

Canada (à l'exclusion des territoires)	105,098
Île du Prince-Édouard	230
Nouvelle-Écosse	2,137
Nouveau-Brunswick	1,379
Québec	11,951
Ontario	27,540
Manitoba	13,216
Saskatchewan	13,001
Alberta	13,227
Colombie Britannique	22,417

Il est entendu que ces statistiques ne possèdent pas le même degré de perfection et d'exactitude que celles qui s'appliquent aux autres races de la population.

Causes de décès de la population, sans compter les Indiens.—Le tableau L fait connaître le nombre de décès de la population, sans compter les Indiens, dus aux causes déjà énumérées et le Tableau LI les proportions par 100,000 personnes, calculées sur la population estimative, à l'exclusion des Indiens. Ces résultats sont obtenus en soustrayant des chiffres de la population donnés dans le tableau I, la population estimative des Indiens qui a servi de base aux taux contenus dans le tableau XLIX.

La comparaison des chiffres du tableau LI avec ceux du tableau XLIX prouve que l'élimination des Indiens n'a pas un effet bien sensible sur les taux de l'ensemble du Canada, si l'on excepte les décès causés par la tuberculose et les maladies de l'appareil respiratoire. Et ceci s'explique facilement quand on considère la petite proportion qu'occupe la population indienne quant à la population totale du Canada, puisqu'elle ne forme qu'un peu plus d'un pour cent de la population des neuf provinces. Dans les trois provinces le plus à l'ouest, toutefois, la Saskatchewan, l'Alberta et la Colombie Britannique, leur élimination, non seulement abaisse le taux de la tuberculose sous toutes ses formes, mais encore, bien qu'à un moindre degré, ceux de la pneumonie et de la grippe, tandis que le taux de la rougeole est de ce fait réduit de 17 à 12 par 100,000 âmes et celui de la coqueluche de 14 à 12 par 100,000 personnes. La réduction du taux des mortalités séniles de 15 à 9 dans la Colombie Britannique, après l'exclusion des Indiens, est certainement attribuable aux certificats de décès plus exacts fournis par la population blanche. On y remarquera que le taux de la mortalité totale pour toutes causes, dans les trois provinces ci-haut nommées, est sensiblement abaissé par

l'élimination des décès d'Indiens, les chiffres de la Saskatchewan tombant de 738 à 714 par 100,000 âmes, ceux de l'Alberta de 849 à 798 et ceux de la Colombie Britannique de 964 à 927.

Maladies contagieuses.—Les décès dus au Canada aux cinq maladies énumérées dans le tableau XLVI, la typhoïde, la rougeole, la scarlatine, la coqueluche et la diphtérie s'élèvent à 3,875, donnant un coefficient de 42 par 100,000 âmes. Le Québec est à la tête des provinces avec 69, suivi de l'Alberta avec 49 et de la Saskatchewan avec 48, tandis que la Nouvelle-Écosse et la Colombie Britannique restent les dernières avec 19 par 100,000 âmes. Le taux élevé de la natalité a une influence importante sur le taux de ces maladies.

Pour les huit provinces, pour lesquelles la comparaison peut remonter à 1921, les décès causés par la rougeole et la coqueluche présentent des fluctuations violentes d'année en année, tandis que les décès attribués à la diphtérie, la scarlatine et la typhoïde ont une tendance prononcée à la baisse sur la période 1921-26.

Les décès dus à la grippe dans les neuf provinces du Canada s'élevaient à 5,174 en 1926, soit un taux de 55 par 100,000 âmes. La proportion par provinces variait de 17 dans l'Île du Prince-Édouard à 81 dans le Québec.

Pour les huit provinces du territoire d'enregistrement de 1921, la grippe apparaît avec un taux de 45 par 100,000 en 1926, ce taux étant le plus élevé de la période 1921-26, à l'exception de l'année 1923. L'influence de la saison sur les décès dus à la grippe varie considérablement d'année en année. En 1923, sur un total annuel de 3,578 décès causés par la grippe, 1,144 étaient survenus en février et 1,049 en mars, ces deux mois seuls avaient fourni les deux tiers des décès dus à cette maladie. En 1926, d'autre part, 927 sur 3,089 décès au cours de l'année étaient survenus en avril, et mai dépassa tous les autres mois. On trouvera dans le relevé suivant les décès survenus dans les huit provinces, par mois, en 1921-26.

DÉCÈS CAUSÉS PAR LA GRIPPE PAR MOIS

(Nombres absolus)

Mois	Territoire d'enregistrement de 1921						Canada (1)
	1921	1922	1923	1924	1925	1926	1926

(1) Voir la note 1 au bas du tableau I.

Tuberculose.—Les décès attribués à la tuberculose de l'appareil respiratoire en 1926 s'élevaient à 6,485 et ceux attribués à toute autre forme de la tuberculose à 1,444, formant un total de 7,929, ou un taux de 85 par 100,000 âmes. La proportion, par provinces, varie de 47 dans la Saskatchewan à 128 dans le Québec. Il est évident que la répartition par âge de la population a un effet important sur le taux de la tuberculose et que pour établir une comparaison vraiment convaincante, la différence de l'âge devrait être écartée; néanmoins, il est évident qu'un ajustement à cet égard n'équilibrerait pas parfaitement le taux de l'Ontario avec celui du Québec et des provinces maritimes.

Pour les huit provinces comprises dans le territoire d'enregistrement de 1921, le taux de la tuberculose était de 68 par 100,000 âmes en 1926, soit à peu près le même que l'année précédente. Dans la période 1921-26, ces taux ont une tendance à la baisse.

TUBERCULOSE (Nos 31-37)

(Mortalité par 100,000 âmes)

[1] Voir la note 1 au bas du tableau I. [2] Moins de 1 par 100,000 âmes.

En ce qui concerne la tuberculose, la proportion d'Indiens est tellement forte, qu'il a été jugé utile d'en faire un relevé distinct afin de ne pas influencer la totalité de la mortalité. Ces détails sont contenus dans le tableau suivant en nombres absolus, de plus on y trouve la proportion pour les deux sexes pour les diverses formes de cette maladie. L'exclusion des Indiens réduit le taux des décès masculins causés par la tuberculose sous toutes ses formes de **77 à 72** et le taux féminin de **92 à 87.**

[1] Moins de 1 par 100,000 âmes.

Cancer.—Dans les neuf provinces du Canada, le cancer a été la cause de 7,614 décès en 1926, soit 81 pour 100,000 âmes. Ici encore, la répartition de l'âge de la population joue un rôle important dans les proportions des différentes provinces; ces taux varient de 47 en Saskatchewan à 99 en Ontario.

Le taux de ces décès dans le territoire d'enregistrement de 1921 prouve clairement une augmentation sur la période 1921-26. Il serait toutefois téméraire de tirer des conclusions d'une aussi courte période. De plus, une plus parfaite précision des diagnostics peut influencer ces résultats, tandis que dans un pays comme le Canada, il est probable qu'une plus grande proportion de la population entre d'année en année dans l'âge du cancer.

CANCER (Nos 43-49)
(Mortalité par 100,000 âmes)

Provinces	1921	1922	1923	1924	1925	1926
Île du Prince-Édouard	87	97	94	101	100	83
Nouvelle-Écosse	92	102	100	107	101	96

(1) Voir la note 1 au bas du tableau I.

Le taux des décès dus au cancer, quel qu'en soit le siège, est donné, par sexe dans le tableau qui suit, pour les neuf provinces du Canada en 1926 et pour le territoire d'enregistrement en 1921-26. Cette proportion est plus élevée chez les femmes que chez les hommes. En suivant attentivement la comparaison dans le territoire d'enregistrement de 1921, on constatera que le taux de cette maladie sous "autres organes ou non spécifiés" s'est abaissé sensiblement chez les femmes, de 1921 à 1925. On peut présumer que ce fléchissement est le résultat de certificats plus précis, depuis l'habitude prise de retourner aux médecins les certificats ne déterminant pas suffisamment l'organe atteint. En admettant que cette baisse est due aux causes "non spécifiées" et non à "autres organes" ce dévolu est naturellement attribué aux causes spécifiées. Il faut tenir compte de ce détail en comparant les sièges de cette maladie.

MORTALITÉ CAUSÉE PAR LE CANCER EN SES DIFFÉRENTS SIÈGES
(Par 100,000 âmes)

Affections du cœur.—Les décès résultant des affections de cet organe (Liste Int. Nos 87-90) s'élevaient à 11,415 en 1926, soit 122 par 100,000 âmes. Les proportions par provinces varient de 61 en Saskatchewan à 163 en Ontario. Les basses proportions fournies par les provinces des prairies sont le résultat du petit nombre de personnes qui ont dépassé l'âge moyen dans ces provinces.

Les comparaisons établies pour le territoire d'enregistrement révèlent une tendance à la hausse dans les affections du cœur.

AFFECTIONS DU CŒUR (Nos 87-90)
(Mortalité par 100,000 âmes)

Provinces	1921	1922	1923	1924	1925	1926
Île du Prince Édouard	108	131	142	142	122	110

Territoire d'enregistrement de 1921	94	102	114	108	113	125

(1) Voir la note 1 au bas du tableau I.

Affections des artères.—La mortalité résultant de cette cause en 1926 dans les neuf provinces du Canada (Liste Int. N° 91) a été de 53 par 100,000 âmes. Dans les huit provinces constituant le territoire d'enregistrement, ce taux était de 59, soit le plus élevé de cette période 1921-26. Cette proportion n'a cessé d'augmenter au cours de cette période, étant de 40 par 100,000 âmes en 1921 pour atteindre le chiffre ci-haut mentionné en 1926.

Bronchite.—La mortalité imputable à cette maladie en 1926 a été de 6 par 100,000 âmes. Pour les huit provinces qui peuvent subir la comparaison avec les années précédentes, la proportion est la même et ce chiffre est également identique au taux de 1925, légèrement inférieur à celui de 1924 et particulièrement inférieur au taux des années 1921-23.

Pneumonie. La pneumonie, qui embrasse la broncho-pneumonie et la bronchite capillaire (Liste Int. Nos 100-101) a causé 8,427 décès en 1926, soit un taux de 90 par 100,000 âmes. Ces taux, par provinces, varient de 60 par 100,000 âmes en Colombie Britannique à 106 au Nouveau-Brunswick. En raison de la forte mortalité de cette cause chez les enfants, le taux de la natalité exerce une influence importante sur le taux de la mortalité résultant de cette maladie. Il faut remarquer aussi que le taux de la natalité en Colombie Britannique est inférieur à celui de toutes les autres provinces, tandis que celui du Nouveau-Brunswick n'est dépassé que par celui du Québec.

Pour le territoire d'enregistrement de 1921, le taux de la pneumonie en 1926 se compare défavorablement avec celui des deux années précédentes, mais présente toutefois, une réduction substantielle sur les années 1921-23.

PNEUMONIE (Nos 100 ET 101)
(Mortalité par 100,000 âmes)

Provinces	1921	1922	1923	1924	1925	1926
Île du Prince-Édouard	109	121	155	93	80	87
Nouvelle-Écosse	96	126	127	96	96	99
Nouveau-Brunswick	132	123	114	89	112	106

Territoire d'enregistrement de 1921	93	98	95	75	76	85

(1) Voir la note 1 au bas du tableau I.

Diarrhée et entérite.—Les décès de ces causes en 1926 s'expriment par 5,445 et le taux par 58 par 100,000 âmes. Les taux par provinces varient sensiblement, de 10 seulement en Colombie Britannique, il s'élève à 147 en Québec, chiffre plus élevé qu'en aucune autre province. Les deux facteurs les plus importants qui conduisent à ce résultat sont le taux élevé de la natalité et dont le corollaire est une mortalité considérable de ces deux maladies.

Pour les huit provinces constituant le territoire d'enregistrement, la mortalité résultant de ces causes s'est abaissée de 50 par 100,000 en 1921 à 25 par 100,000 en 1926, diminuant graduellement chaque année. Dans le relevé qui suit les taux sont donnés tout à la fois pour le Canada en 1926 et les nombres absolus sont divisés en deux groupes, pour les enfants de deux ans et ceux de deux ans et plus. Ces derniers forment une proportion relativement minime du total des décès et la réduction remarquable déjà constatée dans le territoire d'enregistrement de 1921 est particulièrement attribuable à la baisse des décès dus à la diarrhée et à l'entérite chez les enfants au-dessous de deux ans, baisse favorisée jusqu'à un certain point par une légère diminution de la natalité.

DIARRHÉE ET ENTÉRITE

		Au-dessous de deux ans	Deux ans et au-dessus	Total	Taux par 100,000 âmes
		Nomb.	Nomb.	Nomb.	
Territoire d'enregistrement de 1921	1921	2,695	523	3,218	50
	1922	2,440	403	2,843	44
	1923	1,696	365	2,061	31
	1924	1,555	336	1,891	28
	1925	1,787	411	2,198	33
	1926	1,399	280	1,679	25
Canada(1)	**1926**	**4,821**	**624**	**5,445**	**58**

(1) Voir la note 1 au bas du tableau I.

Néphrite.—La mortalité résultant de cette cause s'élevait à 5,138 en 1926, soit un taux de 55 par 100,000 âmes. Par provinces, cette proportion variait de 23 en Saskatchewan à 79 en Québec. Pour le territoire d'enregistrement de 1921, le taux était de 46 par 100,000 âmes en 1926. Cette proportion s'était graduellement accrue d'année en année depuis 1922, étant alors de 32 par 100,000 âmes, taux presque identique à l'année précédente.

Cet accroissement apparaît surtout pour la néphrite chronique (comprenant les cas non spécifiés dans le groupe d'âges au-dessus de 10 ans), lequel dépasse de beaucoup les décès causés sous la forme aiguë de cette maladie chaque année.

Morts violentes.—Il y eut en 1926, dans les neuf provinces du Canada 680 suicides, soit 7 par 100,000 âmes. Taux variant de 3 par 100,000 dans le Québec et au Nouveau-Brunswick à 18 par 100,000 en Colombie Britannique. Pour les huit provinces constituant le territoire d'enregistrement, le taux était de 9 par 100,000, c'est-à-dire identique à celui de l'année précédente. Au cours de la période 1921-26, les suicides ont eu une tendance à la hausse, les proportions par sexes sont relevées dans le tableau qui suit.

SUICIDES
(Proportion par 100,000 âmes)

Sexe	Territoire d'enregistrement de 1921						Canada (1)
	1921	1922	1923	1924	1925	1926	1926

Féminin	3	4	4	4	4	4	3
Total	**7**	**7**	**8**	**8**	**9**	**9**	**7**

(1) Voir la note 1 au bas du tableau I.

Les morts violentes, autres que les suicides, se chiffraient par 5,189 en 1926, soit un taux de 55 par 100,000 de population, et pour le territoire d'enregistrement de 57 par 100,000. Les morts violentes, à l'exception des suicides, offrent peu de changements de progrès au cours de 1921-26.

Les homicides, en comptant les cas de légitime défense, s'élevaient à 126, en la même année.

Les décès résultant d'accidents d'automobiles sont énumérés dans le tableau ci-dessous. Pour les huit provinces comprises dans le territoire d'enregistrement, les chiffres remontent à 1921 et englobent les décès résultant de collision d'automobiles avec d'autres véhicules, tramways et trains.

Les accidents d'automobile ont coûté la vie à 606 personnes en 1926; de ce nombre, 423 sont imputables aux huit provinces qui peuvent supporter la comparaison. On y remarquera, qu'à l'exception de 1924, chaque année de la période 1921-26 a subi une courbe ascendante substantielle sur l'année précédente du nombre de ces accidents.

Répartition proportionnelle des décès, par sexe et groupe d'âges, selon leur cause.—Le tableau LVI attribue leur proportion relative aux décès dus à chacune des causes énumérées, par rapport à l'ensemble de la mortalité de chaque sexe et groupe d'âges en 1926. Il contient des données intéressantes quant aux facteurs qui contribuent le plus fortement à la mortalité de chaque sexe, aux différentes phases de la vie. Au-dessous de l'âge de cinq ans, les maladies du premier âge (Liste internationale nos 160-163) contribuent lourdement à la mortalité, c'est-à-dire pour presque un tiers des décès des garçons et pour un peu moins des décès des filles. Les décès de cette période sont également affectés considérablement par la diarrhée et l'entérite (nos 113-114) et par la pneumonie (nos 100-101).

Dans le groupe de 5 à 14 ans, les décès résultant d'accidents (Liste internationale nos 175-203) auxquels s'ajoutent quelques homicides, contribuent à concurrence d'un cinquième aux décès masculins de causes spécifiées, tandis que les décès féminins n'atteignent pas la moitié des décès masculins. La tuberculose sous toutes ses formes se place immédiatement après les accidents chez les garçons de ce groupe, sa part représentant un neuvième du total des décès. Chez les filles, la tuberculose prend la tête, causant plus du sixième des décès de causes spécifiées. Parmi les maladies qui contribuèrent le plus notablement à la mortalité des enfants de ce groupe d'âges, les plus importantes furent la diphtérie, l'appendicite et la pneumonie.

[1] Moins de 0·1 par 1,000 décès.

Dans le groupe d'âges de 15 à 29 ans, la tuberculose sous toutes ses formes tient la tête, quant aux décès des deux sexes; elle revendique plus de 27 pour cent des décès masculins et plus de 41 pour cent des décès chez les filles. Les morts violentes (suicides exclus) sont la cause, deuxième en importance, des décès chez les garçons, causant 23.4 p.c. de tous les décès de causes spécifiées. Chez les filles, la proportion est moins importante. Dans ce groupe d'âges, les décès de nature puerpérale représentent 13 p.c. des décès féminins. Dans le groupe d'âges

de 30-49 ans, chez le sexe masculin nulle cause ne domine manifestement; la tuberculose et les morts violentes sont les plus importantes, représentant 19 et 16 p.c. respectivement des décès dont la cause est spécifiée. Les affections du cœur ont contribué pour plus de 9 p.c. des décès masculins, la pneumonie et le cancer pour environ 7 p.c. chacun. Quant aux suicides, c'est dans ce groupe que cette proportion est le plus élevée, soit 3.6 p.c. Chez les femmes du même groupe d'âges, la tuberculose occupe le premier rang avec près de 18 p.c. du total, le cancer ensuite avec 12.3 p.c. et les causes de nature puerpérale 11.3 p.c. Quant à ces deux dernières causes, le groupe d'âges est trop vaste pour avoir sa pleine signification. Entre le trentième et le quarantième anniversaire, les causes de nature puerpérale constituent 18.0 et le cancer 7.4 p.c. de tous les décès de causes connues; entre 40 et 50 ans, la proportion baisse à 5.1 p.c. pour les maladies de nature puerpérale, tandis que le cancer s'élève à 16.8 p.c.

Après le cinquantième anniversaire, les affections du cœur sont la cause la plus importante des décès des deux sexes, leur part contributive étant de 19 p.c. dans les deux cas. Le cancer, la néphrite, la pneumonie et l'hémorragie cérébrale ont aussi amenée une forte proportion de décès.

Répartition par groupes d'âges des décès dus à certaines causes.—Le tableau LVII est consacré à la répartition proportionnelle par groupes d'âges des décès de l'année 1926 selon les causes énumérées au tableau LVI. Ces maladies dont le nom suffit à préciser les victimes ont été omises de la liste dans ce même tableau.

MARIAGES

Le nombre de mariages célébrés dans les neuf provinces du Canada en 1926 est 66,658, ou un taux de 7.1 par 1,000 âmes. Par provinces, le taux le plus élevé fut de 7.8 par 1,000 en Colombie Britannique, suivi par 7.5 par 1,000 atteint en Ontario. L'Ile du Prince-Edouard et la Nouvelle-Ecosse ont le taux le plus bas, qui est 5.3 par 1,000. Les taux bruts des mariages sont, bien entendu, profondément influencés par les situations créées par l'âge et la position des sexes d'une population.

Le territoire d'enregistrement, tel que constitué en 1921, fait voir pour 1926 une augmentation de 1,614 sur l'année précédente dans le nombre absolu de mariages, quoique ces mariages aient été moins nombreux en 1923 qu'en 1921. En raison de l'augmentation estimative de la population d'année en année, le taux de 1926 semblerait plus défavorable que celui des chiffres absolus, néanmoins il était de 7.2 par 1,000 comparativement à 7.0 par 1,000 l'année précédente.

Les chiffres absolus et les taux servant de base à cette comparaison se trouvent au tableau LVIII.

TABLEAU LVIII.—NOMBRES ABSOLUS ET TAUX BRUTS DES MARIAGES, PAR 1,000 ÂMES ET PAR PROVINCES, 1921-26

Répartition mensuelle des mariages.—Les taux des mariages, par mois, de 1921 à 1926 sont contenus dans le tableau LX. On ne peut donner pour la province de Québec que les taux de 1926; la même situation existe quant au total des taux affectant les neuf provinces. Les taux sont des taux annuels équivalents, c'est-à-dire, que le nombre de mariages au cours d'un mois est multiplié par 365 et divisé par le nombre de jours dans ce mois avant que se fasse la computation sur la base de la population.

Pour l'ensemble des neuf provinces en 1926, juin a été le mois favori avec un taux de 11.4 par 1,000 âmes, septembre le suivant avec 9.9 par 1,000 âmes. Le taux pour mars n'est que 3.8 par 1,000 âmes, ce qui le place le dernier sur la liste.

TABLEAU LX.—TAUX DE LA NUPTIALITÉ PAR 1,000 ÂMES, DANS CHAQUE PROVINCE ET PAR MOIS, 1921-26

(1) Voir la note 1 au bas du tableau I.

La même proportion, soit juin comme le mois le plus favorisé et septembre venant en seconde place, se remarque pour le territoire d'enregistrement de 1921. Cependant en ce qui concerne le taux abaissé de mars pour les mariages il n'était pas aussi prononcé, puisqu'il était de 4.6 par 1,000. Cet abaissement des chiffres de mars est bien entendu redevable pour une large part à l'observance du carême et l'inclusion de Québec rendra cette différence encore plus évidente, vu que sa population est en grande majorité catholique romaine.

Une étude de la situation, par provinces, fait ressortir certaines divergences très prononcées dans le choix des mois favoris de la nuptialité. Par exemple, la nécessité pour la Saskatchewan et l'Alberta de faire les semailles en mai a une influence très marquée sur le taux de ce mois qui est presque invariablement le plus bas de l'année pour ces deux provinces.

En 1926, le mois ayant la plus basse proportion de mariages dans l'Ile du Prince-Edouard a été mai, de même qu'en l'année précédente, mais en 1922, 1923 et 1924 mars avait un taux au-dessous de celui de mai. Dans cette province, l'agriculture et la pêche étant les deux industries principales, la dernière partie de l'année donne un taux de nuptialité supérieur à celui de sa première moitié.

Les chiffres qui concernent le territoire d'enregistrement de 1921 dénotent une stabilité marquée pendant les six années sous considération, la plus notable exception étant le taux de mars 1921 qui était de 6.9 par 1,000, chiffre légèrement au-dessous de celui d'avril et un plus élevé que celui de février. Ce détail s'explique facilement par la précocité du carême cette année-là. Entre tous les mois composant les six années sous revue, le taux le plus élevé fut celui de juin 1921, soit 13.1 par 1,000 âmes et le plus bas se plaçant en mars 1925, soit 4.2 par 1,000.

Etat civil des conjoints.—Sur 1,000 hommes ayant contracté mariage en 1926 on comptait 904 célibataires, 89 veufs et 7 divorcés tandis que pour 1,000 de leurs compagnes il y avait 929 célibataires, 63 veuves et 8 divorcées.

La répartition proportionnellle des mariages en 1926, selon l'état civil des conjoints, fait l'objet du tableau LXI. On a laissé de côté ce qui se rapporte aux mariages où l'un des contractants ou les deux sont des divorcés, vu qu'ils ne forment que 1.4 p.c. du nombre total des mariages de l'année.

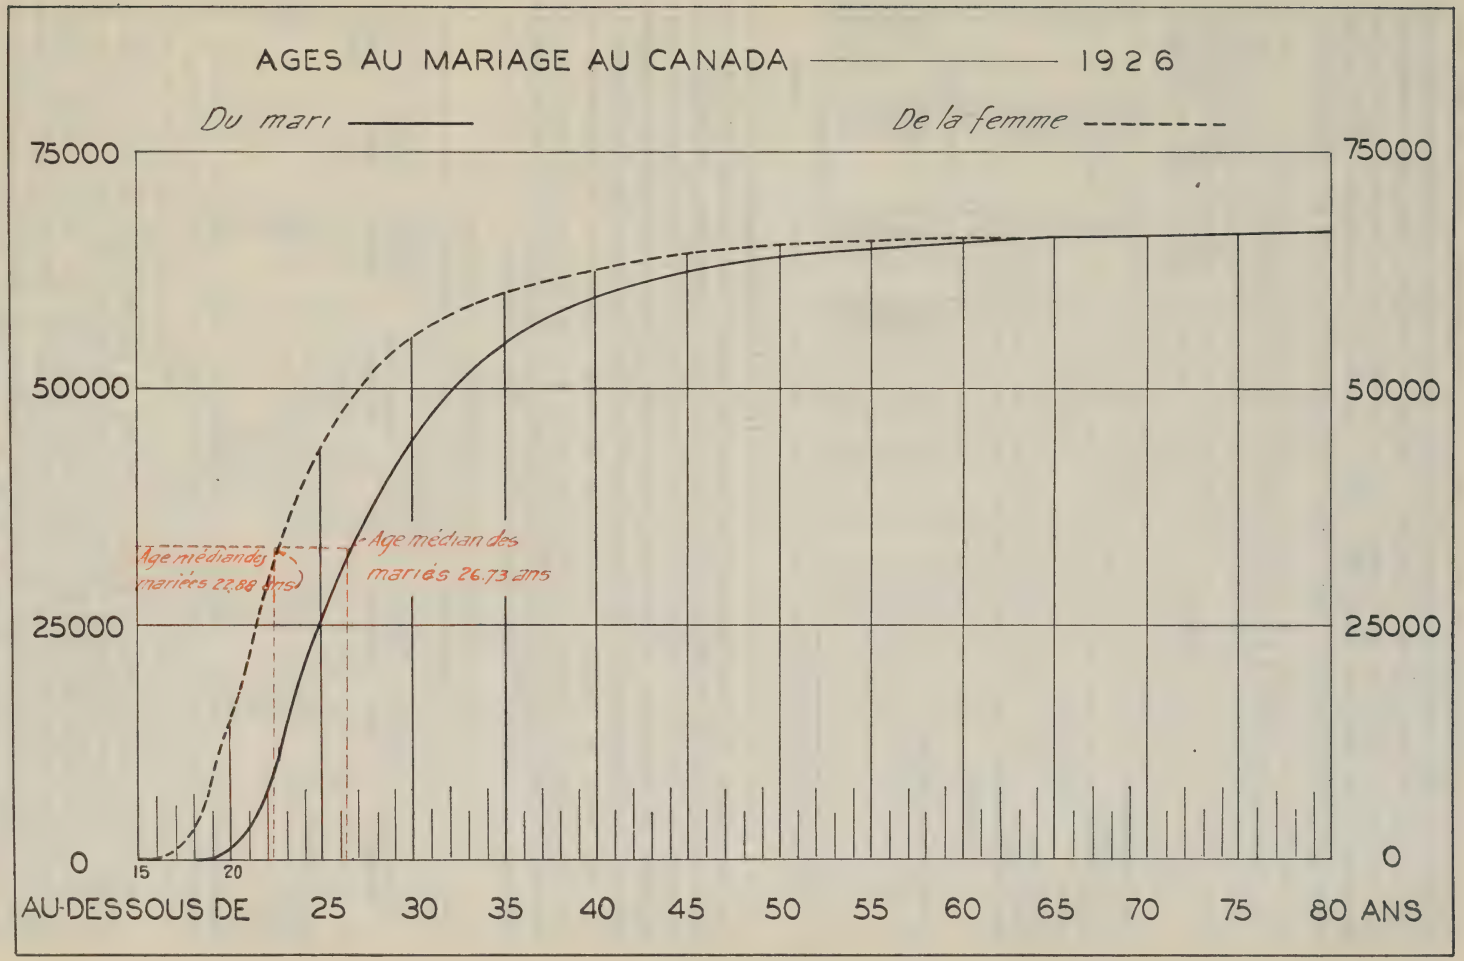

TABLEAU LXI.—RÉPARTITION PROPORTIONNELLE DES MARIAGES SELON L'ÉTAT CONJUGAL DES PARTIES CONTRACTANTES, À L'EXCLUSION DES PERSONNES DIVORCÉES, PAR PROVINCES, 1926

Provinces		Total	Célibataires et		Veufs et

Age des conjoints.—L'âge moyen des époux et épouses en 1926 est donné, par provinces, dans le tableau LXII, avec les chiffres comparatifs des années précédentes pour le territoire d'enregistrement constitué en 1921.

L'âge moyen des époux était en 1926 de 29.3 ans et des épouses 25.1 ans, le surplus en faveur des époux étant 4.2 ans.

AGES AU MARIAGE AU CANADA —— 1926
Du mari ——
De la femme --------
75000
50000
25000
0
Age médian des mariés 26.73 ans
15
20
AU-DESSOUS DE 25 30 35 40 45 50 55 60 65 70 75 80 ANS

La moyenne d'âge des époux pour le territoire d'enregistrement (comme en 1921) était de 29.6 ans en 1926, et celui des épouses, 25.1 ans, ce qui donne un surplus moyen de 4.5 ans pour l'époux. On verra qu'avec l'exclusion du Québec, la moyenne d'âge a une augmentation chez les époux de 0.3 d'une année mais que la moyenne pour les épouses ne subit aucun changement. Au cours des années 1921 à 1926 le territoire d'enregistrement (1921) semble montrer une légère diminution de sa moyenne d'âge tant pour les époux que pour les épouses.

TABLEAU LXII.—MOYENNE D'ÂGE DES CONJOINTS, 1926

(1) Voir la note 1 au bas du tableau I.

On a groupé les mariages dans le tableau LXIII, d'abord par l'âge des époux, puis par l'âge des épouses. On peut remarquer que lorsque les conjoints sont groupés selon l'âge des époux, la moyenne des différences d'âge est plus basse chez les plus jeunes groupes que chez les plus vieux, étant de 1.5 an seulement pour les mariés de 20 à 24 ans et de 9.7 ans pour les mariés de 45 à 49 ans. Ceci se comprend aisément si l'on considère que généralement, l'âge de l'époux excède celui de l'épouse et qu'ainsi l'écart augmente en raison même de l'âge plus avancé de l'époux. Cette différence est moins apparente si les groupements ont lieu d'après l'âge des épouses. L'écart le plus grand sur l'âge de l'époux apparait avec les mariées de moins de 20 ans, celles de 20 à 24 ans venant ensuite, tandis que les autres groupes d'âges ont une moindre différence comparative avec l'âge des époux.

TABLEAU LXIII.—ÂGE DES ÉPOUX ET DES ÉPOUSES, 1926

Groupes d'âges des mariés	Moyenne d'âge des époux	Moyenne d'âge des épouses	Moyenne de l'excédent d'âge des époux	Groupes d'âges des épouses	Moyenne d'âge des épouses	Moyenne d'âge des époux	Moyenne de l'excédent d'âge des époux
Moins de 20 ans	19·1	19·5	0·4	Moins de 20 ans	18·5	24·6	6·1
20–24 ans	22·8	21·3	1·5	20–24 ans	22·3	26·4	4·1

45–49 "	47·2	37·5	9·7	45–49 "	47·3	51·1	3·8
50 ans et plus	59·3	48·4	10·9	50 ans et plus	58·2	60·4	2·2

Le tableau LXIV distribue en pourcentages, dans six groupes d'âges, les époux et épouses de 1926. Le Nouveau-Brunswick détient le plus fort pourcentage des époux ayant moins de 20 ans, soit 3.8, et Île du Prince-Édouard le plus minime, soit 1.1. La plus grande proportion des époux de plus de 40 ans est fournie par la Colombie Britannique, leur pourcentage étant 17 pour ce groupe d'âges; l'Île du Prince-Édouard suit avec 15.3. La proportion la moins élevée pour ce groupe est dans le Québec avec un chiffre de 9.1 p.c.

Le Nouveau-Brunswick détient également la plus forte proportion des épouses ayant moins de vingt ans, soit 31.8 p.c., étant naturellement plus forte que celle des époux du même groupe. La Saskatchewan suit de près mais la Colombie Britannique se place à l'autre extrémité avec la plus basse proportion des épouses de moins de 20 ans qui est de 16 p.c. Le pourcentage des épouses de 40 ans et plus est beaucoup inférieur à celui des époux; l'Ile du Prince-Edouard et la Colombie Britannique offrent les chiffres les plus élevés de ce groupe d'âges; le pourcentage 8.1 de la première province dépasse de très peu celui de la dernière en ce qui concerne les épouses du groupe de 40 ans et plus. 4.1 p.c. seulement des épouses en Saskatchewan dépassaient l'âge de 40 ans, chiffre moins élevé qu'en toute autre province. Malgré la forte proportion des épouses de moins de 20 ans constatée au Nouveau-Brunswick, la proportion pour le groupe de 40 ans et plus n'est pas des plus basses, étant de 5.3 p.c.

TABLEAU LXIV.—POURCENTAGES DE RÉPARTITION DES MARIAGES SELON L'ÂGE DES ÉPOUX, PAR PROVINCES, 1926

(1) Voir la note 1 au bas du tableau I.

L'apportionnement accompli dans le tableau LXIV des époux et épouses, selon leur âge est répété dans le tableau LXV pour les années 1921-26 pour les huit provinces formant le territoire d'enregistrement de 1921. On y trouve une stabilité remarquable au cours des années susdites, avec des traces perceptibles quoique légères d'une augmentation du pourcentage des épouses et époux de moins de 25 ans.

TABLEAU LXV.—POURCENTAGE DE RÉPARTITION DES MARIAGES SELON L'ÂGE DES ÉPOUX DANS LE TERRITOIRE D'ENREGISTREMENT DE 1921, EN 1921-26

Mariages précoces.—Toutes les législatures provinciales ont fixé l'âge minimum du mariage au moins pour ceux accomplis sans le consentement des parents. Les clauses des lois régissant cette question, dans les diverses provinces, sont résumées dans le troisième rapport annuel (p. XLIV de l'Introduction).

Pour les neuf provinces du Canada on compte 1,329 mariages où la mariée était au-dessous de l'âge de 17 ans en 1926, soit 2 p.c. de tous les mariages de l'année. De ce groupe, 1,037 avaient dépassé leur 16e anniversaire de naissance, 244 avaient 15 ans, 46 avaient 14 ans et 2 étaient dans leur 13e année. Il est fort possible que quelque exagération se soit glissée dans le cas de très jeunes épouses, néanmoins les chiffres du tableau LXVI indiquent que ces mariages sont plutôt rares au Canada.

TABLEAU LXVI.—NOUVELLES MARIÉES DE 16 ANS ET AU-DESSOUS, 1926

| Âge des nouveaux mariés | Âge des nouvelles mariées, par provinces | | |

dans la Colombie Britannique. Comme on peut s'y attendre, les provinces de l'ouest ont une proportion beaucoup moins élevée des conjoints nés au Canada que celle constatée dans les provinces de l'est.

STATISTIQUES VITALES DU YUKON ET DES TERRITOIRES DU NORD-OUEST

Les naissances, mariages et décès constatés au Yukon et dans les Territoires du Nord-Ouest en 1926, sont énumérés dans les tableaux suivants. On a distingué les statistiques de ces territoires de celles des provinces, parce que (1) les données sont considérées comme incomplètes et on ne connaît pas suffisamment les détails se rapportant à la population de ces régions pour permettre la computation des coefficients; (2) le nombre de naissances, mariages et décès est si minime qu'il n'affecte pas les totaux s'appliquant au Canada; (3) les rubriques diverses de classification dont on se sert pour commenter les naissances, mariages et décès des huit provinces ne peuvent être utilisées ici, en raison du manque d'informations.

TABLEAU LXIX.—STATISTIQUES VITALES DU TERRITOIRE DU YUKON POUR 1926

Mois	Naissances	Décès	Mariages
Janvier	2	5	–
Février	1	3	–
Mars	1	3	1
Avril	2	2	–
Mai	1	11	1
Juin	–	10	–

TABLE 30—Causes of death by sex and age, in Canada and in each province, 1926—*con.*

QUEBEC—con.

Int. list No.	Causes of death — Causes de décès		Total	Ages								
				Under 1 year — Moins de 1 an	1 year — 1 an	2 years — 2 ans	3 years — 3 ans	4 years — 4 ans	5 to 9 years — 5 à 9 ans	10 to 14 years — 10 à 14 ans	15 to 19 years — 15 à 19 ans	20 to 24 years — 20 à 24 ans
	CLASS XIV-con.—**CLASSE XIV**-suite											
175	Poisoning by food—Empoisonnement par aliments.	M.	4	–	–	1	–	–	–	–	–	–
		F.	1	–	–	–	–	–	–	1	–	–
176	Poisoning by venomous animals—Attaques d'animaux venimeux.	M.	–	–	–	–	–	–	–	–	–	–
		F.	1	–	–	–	–	–	–	1	–	–
177	Other acute accidental poisonings (gas excepted)—Autres empoisonnements accidentels aigus (par gaz exceptés).	M.	26	–	5	1	–	2	4	–	–	–
		F.	18	5	5	1	1	–	–	–	1	1
178	Conflagration—Incendie	M.	11	1	1	1	–	2	–	3	–	–
		F.	12	–	2	1	1	4	1	–	1	–
179	Accidental burns and scalds (conflagration excepted)—Brûlures accidentelles (autres que par l'incendie.)	M.	71	3	11	9	13	5	4	3	1	1
		F.	63	6	3	12	9	1	6	4	2	–
180	Accidental mechanical suffocation—Suffocation mécanique accidentelle.	M.	8	5	–	1	–	–	–	–	–	–
		F.	7	5	2	–	–	–	–	–	–	–
	(a) Overlaying—Étouffé pendant le sommeil.	M.	–	–	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
	(b) Asphyxia—Asphyxie	M.	8	5	–	1	–	–	–	–	–	–
		F.	7	5	2	–	–	–	–	–	–	–
181	Accidental absorption of irrespirable or poisonous gas—Absorption accidentelle de gaz irrespirables ou toxiques.	M.	16	2	–	–	–	–	–	1	–	–
		F.	3	–	–	1	–	–	–	–	–	–
182	Accidental drowning—Submersion accidentelle.	M.	226	–	2	4	7	–	25	27	36	33
		F.	31	2	–	–	3	2	3	2	8	3
183	Accidental traumatism by firearms (wounds of war excepted)—Traumatismes accidentels par armes à feu (blessures de guerre exceptées).	M.	27	–	–	–	–	–	–	1	6	3
		F.	5	–	–	–	–	–	1	–	–	–
184	Accidental traumatism by cutting or piercing instruments—Traumatismes accidentels par instruments tranchants ou piquants.	M.	6	–	–	–	–	–	1	1	1	–
		F.	1	–	–	–	–	–	–	–	–	–
185	Accidental traumatism by fall—Traumatismes accidentels par chute.	M.	122	3	5	5	4	–	3	5	8	6
		F.	57	2	–	4	1	2	1	1	2	1
186	Accidental traumatism in mines and quarries—Traumatismes accidentels par mines et carrières.	M.	5	–	–	–	–	–	–	–	1	3
		F.	–	–	–	–	–	–	–	–	–	–
	(a) Coal mines—Mines de charbon	M.	–	–	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
	(b) Other mines—Autres mines	M.	5	–	–	–	–	–	–	–	1	3
		F.	–	–	–	–	–	–	–	–	–	–
	(c) Quarries—Carrières	M.	–	–	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
187	Accidental traumatism by machines—Traumatismes accidentels par machines.	M.	36	–	–	–	–	–	1	2	6	6
		F.	1	–	–	–	–	–	–	–	1	–
188	Accidental traumatism by other crushing (vehicles, railways, landslides, etc.)—Traumatismes accidentels par autres écrasements (voitures, railways, éboulements, etc.).	M.	270	3	2	5	1	8	27	16	18	26
		F.	79	1	–	3	3	2	14	13	5	5
	(a) Railroad accidents—Accidents par chemins de fer.	M.	65	–	1	1	–	–	3	2	2	7
		F.	12	–	–	–	–	–	2	2	2	1
	(b) Street car accidents—Accidents par tramways.	M.	17	–	–	1	–	–	1	2	–	1
		F.	3	–	–	–	–	–	–	–	–	1
	(c) Automobile accidents—Accidents par automobiles.	M.	125	2	1	2	1	8	23	12	7	10
		F.	58	1	–	3	2	2	12	11	3	2
	(d) Aeroplane and balloon accidents—Accidents par aéroplanes et ballons.	M.	–	–	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
	(e) Injuries by other vehicles—Blessures par autres voitures.	M.	23	1	–	1	–	–	–	–	3	2
		F.	5	–	–	–	1	–	–	–	–	–
	(f) Other crushing—Autres écrasements.	M.	40	–	–	–	–	–	–	–	6	6
		F.	1	–	–	–	–	–	–	–	–	1
189	Injuries by animals (poisoning excepted)—Violences exercées par des animaux (empoisonnements exceptés).	M.	25	–	–	–	1	–	2	3	2	–
		F.	3	–	–	–	–	–	1	–	–	–
192	Starvation (deprivation of food or water)—Faim ou soif.	M.	3	–	–	–	–	–	–	–	1	–
		F.	1	–	–	–	–	–	–	–	–	–
193	Excessive cold—Froid excessif	M.	3	–	–	–	–	–	–	–	–	–
		F.	2	1	–	–	–	–	–	–	–	–
194	Excessive heat—Chaleur excessive	M.	6	3	–	1	–	1	–	–	–	–
		F.	3	–	–	–	2	–	1	–	–	–
195	Lightning—Foudre	M.	3	–	–	–	–	–	–	–	1	–
		F.	–	–	–	–	–	–	–	–	–	–
196	Other accidental electric shocks—Autres électrocutions accidentelles.	M.	18	–	–	–	–	–	–	–	–	5
		F.	1	–	–	–	–	–	–	–	–	1

175	Poisoning by food—Empoisonnement par aliments.	M.	2	–	–	1	–	–	1	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
177	Other acute accidental poisonings (gas excepted)—Autres empoisonnements accidentels aigus (par gaz exceptés).	M.	6	1	–	2	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
178	Conflagration—Incendie	M.	8	–	–	–	–	1	1	–	–	–
		F.	3	1	1	–	–	–	–	–	–	1
179	Accidental burns and scalds (conflagration excepted)—Brûlures accidentelles (autres que par l'incendie).	M.	14	1	1	3	4	–	1	1	–	–
		F.	15	1	4	2	2	–	2	–	–	1
180	Accidental mechanical suffocation—Suffocation mécanique accidentelle.	M.	5	4	1	–	–	–	–	–	–	–
		F.	2	2	–	–	–	–	–	–	–	–
	(a) Overlaying—Étouffé pendant le sommeil.	M.	–	–	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
	(b) Asphyxia—Asphyxie	M.	5	4	1	–	–	–	–	–	–	–
		F.	2	2	–	–	–	–	–	–	–	–
181	Accidental absorption of irrespirable or poisonous gas—Absorption accidentelle de gaz irrespirables ou toxiques.	M.	2	–	–	–	–	–	–	–	–	–
		F.	1	1	–	–	–	–	–	–	–	–
182	Accidental drowning—Submersion accidentelle.	M.	23	–	1	2	1	–	1	2	8	6
		F.	7	–	1	–	–	–	–	1	3	–
183	Accidental traumatism by firearms (wounds of war excepted)—Traumatismes accidentels par armes à feu (blessures de guerre exceptées).	M.	15	–	–	–	–	–	2	3	2	1
		F.	1	–	–	–	–	–	1	–	–	–
185	Accidental traumatism by fall—Traumatismes accidentels par chute.	M.	23	–	–	–	–	–	1	–	–	1
		F.	15	–	–	–	–	–	1	–	–	–
187	Accidental traumatism by machines—Traumatismes accidentels par machines.	M.	11	–	–	–	–	–	2	–	3	1
		F.	–	–	–	–	–	–	–	–	–	–
188	Accidental traumatism by other crushing (vehicles, railways, landslides, etc.)—Traumatismes accidentels par autres écrasements (voitures, railways, éboulements, etc.).	M.	69	–	1	1	1	–	2	3	3	5
		F.	11	–	–	–	–	1	–	1	1	1
	(a) Railroad accidents—Accidents par chemins de fer.	M.	28	–	1	1	–	–	1	–	–	3
		F.	5	–	–	–	–	–	–	–	1	–
	(b) Street car accidents—Accidents par tramways.	M.	2	–	–	–	–	–	–	–	1	–
		F.	–	–	–	–	–	–	–	–	–	–
	(c) Automobile accidents—Accidents par automobiles.	M.	23	–	–	–	–	–	1	3	1	–
		F.	4	–	–	–	–	–	–	1	–	1
	(d) Aeroplane and balloon accidents—Accidents par aéroplanes et ballons...	M.	1	–	–	–	–	–	–	–	–	1
		F.	–	–	–	–	–	–	–	–	–	–
	(e) Injuries by other vehicles—Blessures par autres voitures.	M.	12	–	–	–	1	–	–	–	1	–
		F.	1	–	–	–	–	–	–	–	–	–
	(f) Other crushing—Autres écrasements.	M.	3	–	–	–	–	–	–	–	–	1
		F.	1	–	–	–	–	1	–	–	–	–
189	Injuries by animals (poisoning excepted)—Violences exercées par des animaux (empoisonnements exceptés).	M.	11	–	–	–	1	–	2	1	2	–
		F.	–	–	–	–	–	–	–	–	–	–
192	Starvation (deprivation of food or water)—Faim ou soif.	M.	–	–	–	–	–	–	–	–	–	–
		F.	1	–	–	–	–	–	–	–	–	–
193	Excessive cold—Froid excessif	M.	3	–	–	–	–	–	–	–	1	–
		F.	1	–	–	–	–	–	–	–	–	–
194	Excessive heat—Chaleur excessive	M.	1	–	–	–	–	–	–	1	–	–
		F.	–	–	–	–	–	–	–	–	–	–
195	Lightning—Foudre	M.	1	–	–	–	–	–	–	–	1	–
		F.	–	–	–	–	–	–	–	–	–	–
196	Other accidental electric shocks—Autres électrocutions accidentelles.	M.	3	–	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–	–
197	Homicide by firearms—Homicide par armes à feu.	M.	1	–	–	–	–	–	–	–	1	–
		F.	1	–	–	–	–	–	–	–	–	–
199	Homicide by other means—Homicide par autres moyens.	M.	–	–	–	–	–	–	–	–	–	–
		F.	6	1	–	–	–	–	1	–	–	–
201	Fracture (cause not specified)—Fracture (cause non spécifiée).	M.	1	–	–	–	–	–	–	–	–	–
		F.	6	–	–	–	–	–	–	–	–	–
202	Other external violence (cause specified)—Autres violences extérieures (cause spécifiée).	M.	12	–	1	–	2	–	1	–	1	–
		F.	1	–	–	–	–	–	–	–	–	–
203	External violence (cause not specified)—Violences extérieures (cause non spécifiée)	M.	–	–	–	–	–	–	–	–	–	–
		F.	1	–	–	–	–	–	–	–	–	–

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

The totals of births, deaths and marriages presented in the general tables of the present report include returns for Indians, resembling in this respect the corresponding tables of previous reports. The births and deaths of Indians in Canada form only an inconsiderable portion of the whole but this is not so true of certain provinces considered individually. Moreover, in particular aspects of Vital Statistics, e.g. deaths from tuberculosis, the figures for Indians assume an importance beyond the numerical proportion of this class in the population. It has, therefore, been thought well in this volume to supplement the general tables with an appendix containing the salient features of births and deaths of Indians. Not only will these tabulations enable a special study of the vital statistics of the Indian population, but they will also place the reader in a position to eliminate from the general tables the influence of Indian births or deaths. Indian marriages cannot be separately tabulated since the racial origin of bride and groom is not given on the marriage certificate. In any case such figures would have little significance in so far as the pagan Indians are concerned, as the marriages of these people according to their own customs are not included in the figures recorded.

The term "Indian" as used in these tables includes half-breeds.

The statistics for Indians cannot be considered as having the same degree of completeness as those for the white population. With regard to the accuracy of particular phases of the statistics, such as ages, it is probable that in many cases the knowledge of the informants is vague. As to reported causes of death, a large proportion of these are from laymen rather than from physicians. Statistics of legitimacy of children born have little significance for the Indian population, owing to the informal method of marriage amongst pagan Indians. It is probable that the number of illegitimate children is exaggerated for this reason.

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

Les totaux des naissances, décès et mariages dans les tableaux d'ensemble du présent rapport comprennent ceux des Indiens, comme dans les tableaux correspondants des rapports antérieurs. Les naissances et décès d'Indiens au Canada ne forment qu'une portion minime du total, mais il n'en est pas ainsi quand chaque province est considérée séparément. De plus, sous certains aspects des statistiques vitales, comme dans les décès causés par la tuberculose, les chiffres des Indiens prennent une importance dépassant leur proportion numérique de la population. C'est pourquoi, il a été jugé opportun d'ajouter aux tableaux d'ensemble de ce volume un appendice contenant les données principales sur les naissances et les décès d'Indiens. Non seulement ces tableaux permettent de faire une étude spéciale des statistiques vitales de la population indienne, mais ils mettent aussi le lecteur en état de les éliminer des tableaux d'ensemble, pour l'influence que peuvent y avoir les naissances et décès d'Indiens.

Il est impossible de computer séparément les mariages d'Indiens, parce que l'origine raciale de l'époux et de l'épouse n'est pas donnée sur le certificat de mariage. Dans tous les cas ces chiffres n'auraient que très peu d'importance, en autant que sont concernés les Sauvages encore païens, parce que les mariages contractés selon leur coutume ne sont pas inclus dans les chiffres relevés.

Le terme "Indien", dans ces tableaux, comprend aussi les métis.

Les statistiques des Indiens ne peuvent pas être considérées comme aussi complètes que celles de la population blanche. Pour ce qui est de l'exactitude de certaines phases particulières des statistiques, comme les âges, il est probable que, dans plusieurs cas, la connaissance de ceux fournissant l'information était plutôt vague. Pour ce qui est des causes de décès, telles que données, il faut aussi se rappeler que la plupart de ces causes ne sont pas celles données par les médecins. Les statistiques de la légitimité des naissances ont très peu de signification pour la population indienne, parce que le mariage est un contrat plutôt simple chez les Indiens païens. Il est probable que le nombre d'enfants illégitimes se trouve exagéré pour cette raison.

APPENDIX II

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

APPENDICE II

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

There being no fixed political divisions in Manitoba, Saskatchewan and Alberta corresponding to counties in Eastern Canada, it was deemed advisable, in compiling and publishing the results of the Census of 1921, to divide these provinces for statistical purposes into "Census Divisions", each containing a certain number of rural municipalities, "local improvement districts", cities, towns and incorporated villages. The object of this demarcation was to obtain permanent units smaller than the provinces for comparisons extending over a number of years. The same "Divisions" have been adopted in the present Report.

Maps are inserted, showing the boundaries of the "Divisions" by red lines; the municipalities contained within "Divisions" by heavy black lines and the townships within municipalities by faint black lines. The numbers enclosed in red circles on the maps refer to the numbers assigned to the "Divisions"; the black figures refer to municipalities or local improvement districts (L.I.D.).

The following schedule gives the rural municipalities by name and number (the latter in parenthesis) together with the cities, towns and villages comprised within each "Census Division", according to the Census of 1921. Local Improvement Districts and Unorganized Territorial Units in Saskatchewan and Alberta are given by number only.

MANITOBA

Division No. 1 comprises the municipalities of Birch River (1), Hanover (2), La Broquerie (3), Piney (4), Ste. Anne (5), Sprague (6), Stuartburn (7), Taché (8); Unorganized parts East of the Principal Meridian between townships 3 and 10 (9).

Division No. 2 comprises the municipalities of De Salaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Indian Reserves—Roseau Band; Towns—Emerson, Morden, Morris; Villages—Gretna, Plum Coulee, Winkler.

Division No. 3 comprises the municipalities of Argyle (1), Lorne (2), Louise (3), Pembina (4), Riverside (5), Roblin (6), Strathcona (7), Turtle Mountain (8); Indian Reserves—Swan Lake; Town—Killarney; Villages—Manitou, Pilot Mound.

Division No. 4 comprises the municipalities of Albert (1), Arthur (2), Brenda (3), Cameron (4), Edward (5), Morton (6), Whitewater (7), Winchester (8); Towns—Boissevain, Deloraine, Hartney, Melita; Villages—Napinka.

Division No. 5 comprises the municipalities of Brokenhead (1), Fort Alexander (2), Kildonan East (3), Lac du Bonnet (4), St. Clements (5), St. Paul East (6), Springfield (7), Victoria Beach (8), Whitemouth (9); Unorganized parts East of the Principal Meridian between townships 9 and 21 (10); Indian Reserves—Fort Alexander, Brokenhead; Towns—Beauséjour, Transcona; Villages—Lyall.

Division No. 6 comprises the municipalities of Cartier (1), Charleswood (2), Dufferin (3), Fort Garry (4), Grey (5), Macdonald (6), Portage la Prairie (7), Ritchot (8), St. Vital (9); Indian Reserves—Long Plain, Sioux Village; Cities—Portage la Prairie, St. Boniface, Winnipeg; Towns—Carman, Tuxedo.

Division No. 7 comprises the municipalities of Cornwallis (1), Cypress North (2), Cypress South (3), Elton (4), Norfolk North (5), Norfolk South (6), Oakland (7), Victoria (8); Indian Reserves—Indian Gardens; City—Brandon; Town—Carberry; Village—Wawanesa.

Division No. 8 comprises the municipalities of Daly (1), Glenwood (2), Pipestone (3), Sifton (4), Wallace (5), Whitehead (6), Woodworth (7); Indian Reserves—Oak Lake, Oak River; Towns—Oak Lake, Rivers, Souris, Virden; Villages—Elkhorn.

Division No. 9 comprises the municipalities of Assiniboia (1), Kildonan West (2), Rockwood (3), Rosser (4), St. Andrews (5), St. François Xavier (6), St. James (7), St. Paul West (8), Woodlands (9); Towns—Selkirk, Stonewall, Winnipeg Beach.

Division No. 15 comprises Local Improvement Districts 613, 614, 641, 642, 643, 647, 670, 702, 705, 706, 707, 708, 709, 730, 731, 732, 733, 734, 735, 736, 737, 738, 764, 765, 766, 767, 794, 795, 796, 825, 826, 854, 855; Unorganized Territorial Units 617, 618, 619, 620, 621, 622, 644, 645, 646, 648, 671, 672, 673, 674, 675, 676, 677, 678, 679, 700, 701, 703, 704, 710, 824; Unorganized parts between townships 56 and 69 west of the provincial boundary, and the part of T. 69, R. 10 and 11, W. 5th Meridian south of the Wapiti River; Indian Reserves—Grouard, Sturgeon Lake, Sawridge, Swan River, Drift Pile, Sucker Creek; Towns—Grouard, Peace River.

Division No. 16 comprises the municipalities of Grande Prairie (739) Bear Lake (740), Spirit River (829), Peace (857); Fairview (858); Local Improvement Districts 741, 742, 769, 770, 771, 772, 797, 800, 801, 827, 828, 830, 831, 859, 860, 861, 886, 887, 888, 889, 916, 917; Unorganized Territorial Units 890, 891, 918, 919; Unorganized parts between townships 86 and 90 and between U.T.U. 919 and the western provincial boundary; Indian Reserves—Saskatoon Lake, Moberly Lake, Hudson Hope, St. John, Dunvegan, Peace River; Town—Grande Prairie; Villages—Clairmont, Spirit River.

Division No. 17 comprises the remainder of the province consisting of northern parts; Indian Reserves —Long Lake, Chipewayan, Little Red River, Boyer River, Upper Hay River, Wabaska, Fort Vermilion.

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

Le Manitoba, la Saskatchewan et l'Alberta ne possédant pas de divisions politiques correspondant aux comtés de l'est du Canada, on a cru devoir, aux fins de la compilation et de la publication des résultats du recensement de 1921, diviser ces provinces, pour les besoins de la statistique, en "divisions de recensement", chacune de celles-ci contenant un certain nombre de municipalités rurales, de "districts d'améliorations locales", de cités, de villes et de villages incorporés. En établissant ces lignes de démarcation on a créé des unités territoriales permanentes, plus petites que les provinces et facilitant les comparaisons, pendant un certain nombre d'années. Ce sont ces unités territoriales que l'on trouvera dans le présent rapport.

Sur les cartes ci-jointes, les limites des divisions sont figurées par des lignes rouges, celle des municipalités qui sont contenues dans les divisions par d'épaisses lignes noires et celles des cantons par de minces lignes noires.

Les nombres entourés d'un cercle rouge sont les numéros donnés aux divisions; les chiffres en noir sont les numéros des municipalités ou des districts d'améliorations locales (D.A.L.).

On trouvera dans la liste qui suit l'énumération des municipalités rurales, par nom et numéro (ce dernier entre parenthèses) ainsi que les cités, villes et villages composant chacune des "divisions de recensement", selon le recensement de 1921. Les districts d'améliorations locales et les unités des territoires inorganisés de la Saskatchewan et de l'Alberta sont indiqués simplement par un numéro.

MANITOBA

Division N° 1.—Elle comprend les municipalités de: Birch-River (1), Hanover (2), La Broquerie (3), Piney (4), Ste-Anne (5), Sprague (6), Stuartburn (7), Taché (8); Parties inorganisées à l'est du méridien principal, entre les cantons 3 et 10 (9).

Division N° 2.—Elle comprend les municipalités de: DeSalaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Réserve indienne—Bande Roseau; Villes—Emerson, Morden, Morris; Villages—Gretna, Plum Coulée, Winkler.

Division N° 3.—Elle comprend les municipalités de: Argyle (1), Lorne (2), Louise (3), Pembina (4), Riverside (5), Roblin (6), Strathcona (7), Turtle Mountain (8); Réserve indienne—Swan Lake; Ville—Killarney; Villages—Manitou, Pilot Mound.

Division N° 4.—Elle comprend les municipalités de: Albert (1), Arthur (2), Brenda (3), Cameron (4), Edward (5), Morton (6), Whitewater (7), Winchester (8); Villes—Boissevain, Deloraine, Hartney, Melita; Village—Napinka.

Division N° 5.—Elle comprend les municipalités de: Brokenhead (1), Fort Alexander (2), Kildonan East (3), Lac du Bonnet (4), St-Clements (5), St-Paul East (6), Springfield (7), Victoria Beach (8), Whitemouth (9); Parties inorganisées à l'est du méridien principal, entre les cantons 9 et 21 (10); Réserves indiennes—Fort Alexander, Brokenhead; Villes—Beauséjour, Transcona; Village—Lyall.

Division N° 6.—Elle comprend les municipalités de: Cartier (1), Charleswood (2), Dufferin (3), Fort Garry (4), Grey (5), Macdonald (6), Portage la Prairie (7), Richot (8), St-Vital (9); Réserves indiennes—Long Plain, Sioux Village; Cités—Portage la Prairie, St-Boniface, Winnipeg; Villes—Carman, Tuxedo.

Division N° 7.—Elle comprend les municipalités de: Cornwallis (1), Cypress North (2), Cypress South (3), Elton (4), Norfolk North (5), Norfolk South (6), Oakland (7), Victoria (8); Réserve indienne—Indian Gardens; Cité—Brandon; Ville—Carberry; Village—Wawanesa.

Division N° 8.—Elle comprend les municipalités de: Daly (1), Glenwood (2), Pipestone (3), Sifton (4), Wallace (5), Whitehead (6), Woodworth (7); Réserves indiennes—Oak Lake, Oak River; Villes—Oak Lake, Rivers, Souris, Virden; Village—Elkhorn.

Division N° 9.—Elle comprend les municipalités de: Assiniboia (1), Kildonan West (2), Rockwood (3), Rosser (4), St-Andrews (5), St-François Xavier (6), St-James (7), St-Paul West (8), Woodlands (9); Villes—Selkirk, Stonewall, Winnipeg Beach.

Division N° 10.—Elle comprend les municipalités de: Glenella (1), Lakeview (2), Langford (3), Lansdowne (4), McCreary (5), Rosedale (6), Westbourne (7); Réserve indienne—Lake View; Villes—Gladstone, Neepawa.

Division N° 11.—Elle comprend les municipalités de: Archie (1), Birtle (2), Blanchard (3), Clanwilliam (4), Ellice (5), Hamiota (6), Harrison (7), Miniota (8), Minto (9), Odanah (10), Saskatchewan (11), Shoal Lake (12), Strathclair (13); Réserves indiennes—Bird Tail, Rolling River, Keeseekoowenins; Villes—Birtle, Minnedosa, Rapid City; Villages—Foxwarren, Hamiota, Shoal Lake.

Division N° 12.—Elle comprend les municipalités de: Armstrong (1), Bifrost (2), Chatfield (3), Coldwell (4), Ericksdale (5), Fisher Branch (6), Gimli (7), Kreuzburg (8), St-Laurent (9), Siglunes (10), Woodlea (11); Réserve indienne—Dog Creek; Village—Gimli.

Division N° 13.—Elle comprend les municipalités de: Dauphin (1), Ethelbert (2), Lawrence (3), Mossy River (4), Ochre River (5), Ste-Rose (6); Parties inorganisées au nord du canton 20 entre les frontières orientales des municipalités de Ste-Rose et Lawrence et Lac Manitoba (7); Réserve indiennes—Ebb & Flow, Crane River; Ville—Dauphin; Village—Winnipegosis.

Division N° 14.—Elle comprend les municipalités de: Boulton (1), Gilbert Plains (2), Grandview (3), Hillsburg (4), Rossburn (5), Russell (6), Shellmouth (7), Shell River (8), Silver Creek (9); Territoire inorganisé entre les cantons 18 et 23 et entre les rangs 16 et 26 à l'ouest du méridien principal (10); Réserves indiennes—Valley River, Gamblers, Lizard Point; Villes—Grandview, Russell; Villages—Binscarth, Gilbert Plains, Roblin, Rossburn.

Division N° 15.—Elle comprend les municipalités de: Minitonas (1), Swan River (2); Parties inorganisées entre les cantons 27 et 35 et entre la frontière occidentale provinciale et le rang 23 à l'ouest du méridien principal (3); Ville—Swan River.

Division N° 16.—Elle comprend les parties inorganisées du nord; Réserves indiennes—Agence Norway House, Agence Fisher River, Agence Pas, Black River, Hollow Water, Fairford, Lake St-Martin, Little Saskatchewan, Pine Creek, Shoal River, Waterhen; Ville—The Pas.

SASKATCHEWAN

Division N° 1.—Elle comprend les municipalités de: Argyle (1), Mount Pleasant (2), Enniskillen (3), Coalfields (4), Estevan (5), Storthoaks (31), Reciprocity (32), Moose Creek (33), Browning (34), Benson (35), Antler (61), Moose Mountain (63), Brock (64), Tecumseh (65), Maryfield (91), Walpole (92), Wawken (93), Hazelwood (94), Golden West (95); Réserve indienne—Moose Mountain; Villes—Alameda, Arcola, Carlyle, Carnduff, Estevan, Oxbow; Villages—Antler, Bienfait, Carievale, Fairlight, Forget, Frobisher, Gainsborough, Glen Ewen, Heward, Kennedy, Kisbey, Lampman, Manor, Maryfield, North Portal, Redvers, Roche Percée, Stoughton, Wauchope, Wawota.

Division N° 2.—Elle comprend les municipalités de: Cambria (6), Souris Valley (7), Lake Alma (8), Surprise Valley (9), Happy Valley (10), Cymri (36), Lomond (37), Laurier (38), The Gap (39), Bengough (40), Griffin (66), Weyburn (67), Brokenshell (68), Norton (69), Key West (70), Fillmore (96), Wellington (97), Scott (98), Caledonia (99), Elmsthorpe (100); Cité—Weyburn; Villes—Milestone, Ogema, Radville, Yellowgrass; Villages—Amulet, Avonlea, Bengough, Bromhead, Ceylon, Colgate, Creelman, Fillmore, Forward, Goodwater, Griffin, Halbrite, Horizon, Khedive, Lang, Macoun, McTaggart, Midale, Osage, Pangman, Tribune, Truax, Tyvan.

Division N° 3.—Elle comprend les municipalités de: Hart Butte (11), Poplar Valley (12), Willow Bunch (42), Waverley (44), Mankota (45), Glen McPherson (46), Excel (71), Lake of the Rivers (72), Stonehenge (73), Wood River (74), Pinto Creek (75), Auvergne (76), Terrell (101), Lake Johnston (102), Sutton (103), Gravelbourg (104), Glen Bain (105), Whiska Creek (106); Territoires inorganisés par unités 13, 14, 15, 16, 43; Réserve indienne—Wood Mountain; Villes—Assiniboia, Gravelbourg; Villages—Aneroid, Ardill, Congress, Ettington, Expanse, Hazenmore, Kincaid, Laflèche, Limerick, Mazenod, Meyronne, Mitchellton, Mossbank, Neville, Palmer, Fonteix, Readlyn, Spring Valley, Vanguard, Vantage, Verwood, Viceroy, Woodrow.

Division N° 4.—Elle comprend les municipalités de: Lone Tree (18), Frontier (19), White Valley (49), Reno (51), Wise Creek (77), Grassy Creek (78), Arlington (79), Lac Pelletier (107), Bone Creek (108), Carmichael (109), Piapot (110), Maple Creek (111), Territoires inorganisés par unités 17, 20, 21, 22, 47, 48, 50, 52, 80, 81, 82, 112; Villes—Eastend, Maple Creek, Shaunavon; Villages—Admiral, Cadillac, Carmichael, Consul, Dollard, Hatton, Piapot, Robsart, Scotsguard, Vidora.

Division N° 5.—Elle comprend les municipalités de: Moosomin (121), Martin (122), Silverwood (123), Kingsley (124), Chester (125), Rocanville (151), Spy Hill (152), Willowdale (153), Elcapo (154), Wolseley (155), Langenburg (181), Fertile Belt (183), Grayson (184), McLeod (185), Churchbridge (211), Saltcoats (213), Cana (214), Stanley (215); Réserve indienne—Agence Crooked Lake; Villes—Bredenbury, Broadview, Fleming, Grenfell, Lemberg, Melville, Moosomin, Saltcoats, Wapella, Whitewood, Wolseley; Villages—Atwater, Bangor, Birmingham, Churchbridge, Dubuc, Duff, Esterhazy, Fenwood, Glenavon, Goodeve, Grayson, Killaly, Kipling, Langenburg, MacNutt, Neudorf, Otthon, Rocanville, Spy Hill, Stockholm, Summerberry, Tantallon, Waldron, Welwyn, Windthorst.

Division N° 6.—Elle comprend les municipalités de: Montmartre (126), Francis (127), Lajord (128), Bratt's Lake (129), Redburn (130), Indian Head (156), South Qu'Appelle (157), Edenwold (158), Sherwood (159), Pense (160), Abernethy (186), North Qu'Appelle (187), Lumsden (189), Dufferin (190), Tullymet (216), Lipton (217), Cupar (218), Longlaketon (219), McKillop (220), Sarnia (221); Réserves indiennes—Agence Qu'Appelle, Agence Assiniboine, Agence File Hill; Cité—Regina; Villes—Balgonie, Francis, Indian Head, Lumsden, Qu'Appelle, Rouleau, Sintaluta, Strasbourg; Villages—Abernethy, Balcarres, Belle Plaine, Bethune, Briercrest, B-Say-Tah, Bulyea, Chamberlain, Craven, Cupar, Dilke, Disley, Drinkwater, Dysart, Earl Grey, Edenwold, Findlater, Fort Qu'Appelle, Grand Coulée, Holdfast, Kendal, Kronau, Lebret, Lipton, Markinch, McLean, Montmartre, North Regina, Odessa, Pense, Penzance, Pilot Butte, Regina Beach, Sedley, Silton, Southey, Vibank, Wilcox.

Division N° 7.—Elle comprend les municipalités de: Baildon (131), Hillsborough (132), Rodgers (133), Shamrock (134), Lawtonia (135), Coulee (136), Moose Jaw (161), Caron (162), Wheatlands (163), Chaplin (164), Morse (165), Excelsior (166), Marquis (191), Eyebrow (193), Enfield (194), Vermilion Hills (195), Craik (222), Huron (223), Maple Bush (224), Canaan (225), Victory (226), Coteau (255), King George (256); Cité—Moose Jaw; Villes—Caron, Craik, Herbert, Morse, Mortlach; Villages—Aylesbury, Birsay, Bridgeford, Brownlee, Central Butte, Chaplin, Dunblane, Ernfold, Eyebrow, Hodgeville, Keeler, Lawson, Lucky Lake, Marquis, Mawer, Parkbeg, Riverhurst, Rush Lake, Tugaske, Tuxford, Waldeck.

Division N° 8.—Elle comprend les municipalités de: Swift Current (137), Webb (138), Gull Lake (139), Big Stick (141), Bitter Lake (142), Saskatchewan Landing (167), Riverside (168), Pittville (169), Keebleville (171), Enterprise (172), Lacadena (228), Miry Creek (229), Clinworth (230), Happyland (231), Deer Forks (232), Monet (257), Fairview (258), Snipe Lake (259), Newcombe (260), Royal Canadian (261), Mantario (262); Territoires inorganisés par unités—140, 270, 227; Cité—Swift Current; Villes—Cabri, Gull Lake, Leader; Villages—Abbey, Burstall, Eatonia, Elrose, Eston, Estuary, Glidden, Hughton, Lancer, Lemsford, Pennant, Plato, Portreeve, Prelate, Richlea, Sceptre, Shackleton, Success, Tomkins, Webb.

Division N° 9.—Elle comprend les municipalités de: Calder (241), Wallace (243), Orkney (244), Garry (245), Coté (271), Sliding Hills (273), Good Lake (274), Insinger (275), St-Philips (301), Keys (303), Buchanan (304), Invermay (305), Livingston (331), Clayton (333), Preeceville (334), Hazel Dell (335); Réserve indienne—Agence Pelly; Villes—Canora, Kamsack, Yorkton; Villages—Arran, Buchanan, Calder, Hyas, Insinger, Invermay, Norquay, Pelley, Preeceville, Rama, Rhein, Sheho, Springside, Stenen, Stornoway, Sturgis, Theodore, Togo, Veregin, Willowbrook, Wroxton.

Division N° 10.—Elle comprend les municipalités de: Ituna Bon Accord (246), Kellross (247), Touchwood (248), Millington (249), Beaver (276), Emerald (277), Kutawa (278), Mount Hope (279), Foam Lake (306) Elfros (307), Big Quill (308), Prairie Rose (309), Sasman (336), Lakeview, (337), Lakeside (338) Ayr (339); Réserves indiennes—Muscowequans, Gordon, Day Star, Poorman, Fishing Lake; Villes—Wadena, Watson, Wynyard; Villages—Dafoe, Elfros, Foam Lake, Hubbard, Ituna, Jansen, Jasmin, Kandahar, Kelliher, Kuroki, Leross, Leslie, Lestock, Margo, Punnichy, Quill Lake, Quinton, Raymore, Semans, Tate.

Division N° 11.—Elle comprend les municipalités de: Last Mountain Valley (250), Big Arm (251), Arm River (252), Willner (253), Loreburn (254), Wreford (280), Wood Creek (281), McCraney (282), Rosedale (283), Rudy (284), Usborne (310), Morris (312), Lost River (313), Dundurn (314), Wolverine (340), Viscount (341), Colonsay (342), Blucher (343), Cory (344); Réserve indienne—Moose Woods; Cité—Saskatoon; Villes—Davidson, Govan, Hanley, Lanigan, Nokomis, Outlook, Sutherland, Watrous; Villages—Allan, Bladworth, Bradwell, Broderick, Clavet, Colonsay, Drake, Dundurn, Duval, Elbow, Elstow, Girvin, Glenside, Guernsey, Hawarden, Imperial, Kenaston, Liberty, Lockwood, Loreburn, Meacham, Simpson, Strongfield, Venn, Viscount, Young, Zelma.

Division N° 12.—Elle comprend les municipalités de: Fertile Valley (285), Milden (286), St-Andrews (287), Pleasant Valley (288), Montrose (315), Harris (316), Marriott (317), Mountain View (318), Loganton (345), Perdue (346), Biggar (347), Bushville (348), Park (375), Eagle Creek (376), Glenside (377), Rosemount (378), Prairie (408), Battle River (438), Réserves indiennes—Mosquito, Sweet Grass, Red Pheasant; Villes—Asquith, Battleford, Biggar, Delisle, Langham, Rosetown, Zealandia; Villages—Ardath, Bounty, Conquest, Delmas, Dinsmore, Harris, Herschel, Kinley, Laura, Leney, Macrorie, McGee, Milden, Perdue, Sovereign, Spring Water, Stranraer, Swanson, Tessier, Vanscoy, Wiseton.

Division N° 13.—Elle comprend les municipalités de: Hillsburgh (289), Kindersley (290), Elma (291), Milton (292), Winslow (319), Oakdale (320), Prairiedale (321), Antelope Park (322), Grandview (349), Mariposa (350), Progress (351), Heart's Hill (352), Reford (379), Tramping Lake (380), Grass Lake (381), Eye Hill (382), Buffalo (409), Round Valley (410), Senlac (411), Cut Knife (439), Hillsdale (440), Manitou Lake (442); Réserves indiennes—Poundmaker, Little Pine, Lucky Man; Villes—Alsask, Kerrobert, Kindersley, Macklin, Scott, Unity, Wilkie; Villages—Adanac, Brock, Cavell, Cut Knife, Denzil, Dodsland, Druid, Evesham, Flaxcombe, Handel, Kelfield, Landis, Leipsig, Loverna, Luseland, Major, Marengo, Netherhill, Plenty, Rockhaven, Salvador, Senlac, Smiley, Tramping Lake.

Division N° 14.—Elle comprend les municipalités de: Kelvington (366), Ponass Lake (367), Spalding (368), Barrier Valley (397), Pleasantdale (398), Bjorkdale (426), Tisdale (427), Star City (428), Arborfield (456), Connaught (457), Willow Creek (458), Moose Range (486), Nipawin (487); Territoires inorganisés par unités 361, 363, 364, 365, 391, 393, 394, 395, 396, 421, 423, 424, 425, 451, 453, 454, 455, 481, 483, 484, 485, 488, 511, 513, 514, 515, 516, 517, 518; Réserves indiennes—Kinistino, Nut Lake, Shoal Lake, Red Earth; Villes—Melfort, Tisdale; Villages—Hudson Bay Jct., Naicam, Star City.

Division N° 15.—Elle comprend les municipalités de: St-Peter (369), Humboldt (370), Bayne (371); Grant (372), Aberdeen (373), Warman (374), Lake Lenore (399), Three Lakes (400), Hoodoo (401), Fish Creek (402), Rosthern (403), Laird (404), Carrot River (429), Invergordon (430), St-Louis (431), Weldon (459), Birch Hills (460), Prince Albert (461), Duck Lake (463), Russia (490), Buckland (491), Territoires inorganisés par unités—489, 519, 520, 521; Réserves indiennes—Pensionnat de Duck Lake, Bande One Arrow, Bande Okemassis, Bande John Smith, Bande James Smith, Bande Wahpaton; Cité—Prince Albert; Villes—Duck Lake, Humboldt, Rosthern, Vonda; Villages—Aberdeen, Beatty, Birch Hills, Bruno, Cudworth, Dalmeny, Dana, Domremy, Englefeld, Hague, Hepburn, Howell, Kinistino, Laird, Lake Lenore, Muenster, Osler, St-Brieux, St-Gregor, Wakaw, Waldheim, Warman, Weldon.

Division N° 16.—Elle comprend les municipalités de: Great Bend (405), Mayfield (406), Blaine Lake (434), Redberry (435), Douglas (436), North Battleford (437), Leask (464), Royal (465), Meeting Lake (466), Round Hill (467), Rozilee (493), Canwood (494), Shell River (495), Medstead (497), Territoires inorganisés par unités 496, 523, 524, 525, 526, 527, 553, 554, 555, 556, 557, 587; Réserves indiennes—Agence Carleton, Thunder Child, Sturgeon Lake; Cité—North Battleford; Ville—Radisson; Villages—Blaine Lake, Borden, Canwood, Denholm, Fielding, Hafford, Krydor, Leask, Marcelin, Maymont, Parkside, Richard, Ruddell, Shellbrook, Speers.

Division N° 17.—Elle comprend les municipalités de: Meota (468), Turtle River (469), Paynton (470), Eldon (471), Wilton (472), Parkdale (498), Mervin (499), Paradise Hill (501), Britannia (502), Bright Sand (529), North Star (531), Territoires inorganisés par unités 528, 532, 558, 559, 561, 562, 588, 589, 591, 592; Réserves indiennes—Moosomin, Saultans, Meadow Lake, Waterhen, Agence Onion Lake; Ville—Lloydminster (Partie); Villages—Edam, Lashburn, Maidstone, Marshall, Meota, Mervin, Paynton, Turtleford, Vawn, Waseca.

Division N° 18.—Elle comprend les parties septentrionales inorganisées; Réserves indiennes-Bande Fond du Lac, Bande William Charles, Bande Cumberland, Bande Pine Bluff, Lac la Ronge, Lac Stanley, South End, Pelican Narrows, English River, Clear Lake, Canoe Lake.

ALBERTA

Division N° 1.—Elle comprend les municipalités de: Flowery Plain (33), Burlington (34), Warner (36), Forty Mile (64), Eureka (65), Excelsior (92), Bow Island (94); Districts d'améliorations locales—1, 2, 3, 4, 5, 6, 31, 32, 35, 61, 62, 63, 66, 91, 93; Cité—Medicine Hat; Villes—Bow Island, Irvine, Taber; Villages—Burdett, Grassy Lake, Milk River, Walsh, Warner.

Division N° 2.—Elle comprend les municipalités de: Cochrane (10), Kerr (39), Castle River (40), Bright (69), Livingstone (70), Argyle (99); Districts d'améliorations locales—7, 8, 9, 37, 38, 67, 68, 71, 100, 101; Réserves indiennes—Réserve Peigan, Agence Blood; Cité—Lethbridge; Villes—Blairmore, Cardston, Claresholm, Coleman, Diamond City, Granum, Macleod, Magrath, Pincher Creek, Raymond; Villages—Coaldale, Coalhurst, Commerce, Cowley, Frank, Monarch, Pincher City, Stirling.

Division N° 3.—Elle comprend les municipalités de: McLean (96), Sunny South (123), King (153), Britannia (183); Districts d'améliorations locales—121, 122, 124, 125, 126, 151, 152, 154, 155, 156, 181, 182, 184 185, 186, 211; Villes—Bassano, Brooks, Redcliffe; Villages—Alderson, Duchess, Empress, Enchant, Jenner, Retlaw, Suffield.

Division N° 4.—Elle comprend les municipalités de: Little Bow (98), Clifton (127), Harmony (128), Clear Lake (129), Marquis (157), Royal (158), Riley (159), Dinton (189), Sheep Creek (190), Stockland (191); Districts d'améliorations locales—97, 130, 131, 160, 161, 192; Parties inorganisées entre les cantons 17 et 22 ouest à la frontière provinciale; Villes—Carmangay, High River, Nanton, Okotoks, Staveley, Vulcan; Villages—Barons, Blackie, Cayley, Champion, Lomond, Nobleford.

Division N° 5.—Elle comprend les municipalités de: Berry Creek (214), Bulyea (215), Acadia (241), Cereal (242), Collholme (243), Flowerdale (244), Lonebutte (245), Bertawan (271), Golden Centre (272), Sounding Creek (273), Richdale (274), Hand Hills (275), Michichi (277), Canmer (301), Stewart (302), Wiste (303), Hiram (304), Dowling Lake (305), Lambton (306), Starland (307); Districts d'améliorations locales—212, 213, 246; Villes—Drumheller, Hanna, Youngstown; Villages—Cereal, Chinook, Craigmyle, Delia, Morrin, Munson, Oyen, Richdale, Rumsey.

Division N° 6.—Elle comprend les municipalités de: Blackfoot (218), Bow Valley (219), Shepard (220), Springbank (221), Grasswood (248), Keoma (249), Beddington (250), Carbon (278), Norquay (279), Rosebud (280), Beaver Dam (281), Ghost Pine (308), Stauffer (309), Mountain View (310), Westerdale (311); Districts d'améliorations locales—216, 217, 222, 247, 251, 252, 282; Parties inorganisées entre les cantons 21 et 31 ouest à la frontière provinciale; Réserves indiennes—Réserve Stony, Réserve Sarcee, Agence Blackfoot; Cités—Calgary, Banff (non-incorporée); Villes—Didsbury, Gleichen, Olds, Strathmore; Villages—Acme, Airdrie, Beiseker, Carbon, Carstairs, Cochrane, Crossfield, Irricana, Langdon, Rockyford, Rosebud, Three Hills, Trochu.
